f. The Sultans of Malwa AH 804 - 937 and 943 - 968
g. Deccan states of the Post - Bahmani period -
   1 'Adil Shahis of Bijapur AH 895 - 1097
   2 Nizam Shahis of Ahmadnagar AH 896 - 1004
   3 Qutb Shahis of Golconda AH 918 - 1098
h. The Sultans of Kashmir AH 735 - 995

20 The Moghul Empire 378

21 Moghul succession states in India 405

a. The Marathas
   1 Major Maratha coin series of Western India : -
   The Maratha sovereign (Satara), the Peshwa (Poona) and other mints (Nipani, Kalyan)
   2 The Nawabs of Surat, Broach and Ahmadabad
   3 The Marathas in Eastern Central India: the Bhonsla Rajas
   4 The Marathas in Penninsular India: Marathas of Tanjore
   5 Transient Maratha conquests north of the River Jumna: Kalpi, Etawa, Patna
   6 Early Maratha Confederate coinage of Malwa and environs: Ravishnagar-Saugor
   7 Maratha states and their neighbours in Malwa and adjacent regions: c. 1780's - 1947
   1. West Malwa and environs — The Gaikwars of Baroda; The Holkars of Indore
   2. Lesser States near Indore — Banswara, Dhar, Jaora, Ratlam
   3. East Malwa and environs — The Sindhias of Gwalior; The Begums of Bhopal
   4. Lesser states incorporated by Gwalior — Bajranggarh, Narwar, Saugor
   5. Lesser states near Gwalior — Bijawar, Chhatarpur, Datia, Orchha
b. Kutch and Kathiawar
   1. Jams of Nawanagar; 2. Ranas of Porbander
   3. Diwans of Junagadh; 4. Nawabs of Radhanpur
   5. Kutch (Kutch-Bhuj)
c. The States of Rajputana
   1. The Five major states — Jaisalmir, Jaipur, Bhartpur, Jodhpur, Mewar
   2. Lesser states — Bikanir, Kuchawan, Tonk, Alwar, Kishangarh Islamabad-Mathura, Muminabad-Bindraban, Bundi, Kotah, Jhalawar, Shahpura, Partabgarh, Rewah.
d. Northern states
   1. Awadh (Oudh) in the Ganges valley; 2. The Chand Rajas of Garhwal
e. Southern states
   1. Nizams of the Deccan (Hyderabad) AD 1724 - 1948
   2. Feudatories of the Nizams — Rajas of Narayan Pett, Rajas of Wanparti; Local coinage of Elichpur
   3. Nawabs of the Carnatic (Arcot) AD 1690 - 1825
f. Some European coins struck in the Moghul style and fabric

22 Some states in the far north and the far south of India 448
a. The Ahom Kingdom of Assam
representative rupees with Ahom, Devanagari and Persian inscriptions
b. The Kingdom of Mysore
Islamic period: AD 1761 - 1799

23 Islands off India 453
a. Ceylon b. Laccadive Islands c. Maldive Islands

24 Islam in South - east Asia 455
a. Pre - Islamic coinage : -
1 Namo currency of Srivijaya, circa AD 7th. - 13th. century
2 Emblem currency of Majopahit, circa AD 1293 - 1520
b. The Malay Penninsula before circa AD 1750 : -
1 Malacca c. AD 1403 - 1511 2 Johore 16th - 18th centuries AD
3 Trangganu 4 Kelantan - Patani
5 Kedah
c. The Malay Penninsula after circa AD 1750 : -
North
1 Patalung 2 Singgora
Centre
1 Patani 2 Patani Ligeh
3 Patani Saiburi 4 Patani Jala
5 Kelantan 6 Trengganu
South
1 Pahang
d. Sumatra : -
1 Atjih AD 1496 - 1874 2 Bandar Al Rahman
3 Palembang
e. Island of Bangka : from c. AD 1710
f. Java : -
1 Sultanate of Mataran c. AD 1582 - 1755
2 Sultanate of Bantam c. AD 1526 - 1687
g. Islamic style coinage struck in Malaya and Indonesia by European colonising powers
h. Borneo : -
1 Sultanate of Brunei, from c. AD 1500
2 Pontianak
i. Celebes Islands : -
1 Sultanate of Macassar, Islamic from AD 1603
j. Iron currency of the North-east Indonesian Sultanates

25 Some Islamic seals and sealings 477

Appendix Four Maps

EASTERN COINAGE

THE WORLD OF ISLAM

PREFACE

Islam has embraced a substantial portion of the world for many centuries. Following a first flush of expansion during the 7 th. and 8 th. centuries AD the Caliphate extended from Southern France and Spain in the west, along Northern Africa to Egypt and Arabia. From the seat of the Caliphate at Damascus the domain of Islam extended thence across Syria, Mesopotamia, Eastern Turkey and the Caucasus; and beyond these provinces eastwards across Iran and Afghanistan to the most distant provinces of Transoxiana and Sind. Christendom soon regained control of Southern France and Northern Spain and in the 15 th. century expelled the last outpost of Islam from Southern Spain but at the same time Islam was in the process of expelling the last footholds of Christendom (Byzantium and Trebizond) from Turkey. In the meantime the East African coast, much of Russia and most of India had been brought within the fold of Islam. The East African coast came within the sphere of interest of Islamic traders seeking copper from the rich mines of Rhodesia but extension of Islam in Central Asia was largely a result of the adoption of this Religion by the Mongol Hordes. In India Islam spread by conquest when Mohammed of Ghor marched down from Afghanistan and established the Delhi Sultanate. The early 16 th. century saw the last major extension of Islam as the local states in Southern Malaya and the Indonesian islands adopted Islam one after the other. By 1520 the most easterly Islamic Sultanates were prospering at Brunei in northern Borneo and on the Islands of Ternate and Tidore in the Moluccas. This is the geographical extend of the Islamic world.

The present book is but a survey when compared with the many volumes that would be required to compile a detailed catalogue. Attention has been given to selecting material that provides a representative cross-section of Islamic coinage, including both commonly encountered issues and the emissions of minor dynasties whose Emirs only struck a scanty coinage. The coins catalogued here are nearly all being published for the first time and although many of the issues are well known there are also a substantial number of new issues as well as some rulers and even dynasties not previously known to have struck coins. Some of the mints represented here are also of interest and a few dates call for minor revisions of existing chronologies. The coins themselves are all in private hands and to this extent the selection of material reflects both the availability of coins and also collectors' preferences. The element of availability is important insofar as it is influenced by the composition of various coin hoards that have come onto the market during recent years. Several such recent hoards have produced a) the Samanid-Ghaznavid multiple dirhems of Northern Afghanistan, b) a series of Timurid - Ak Koyunlu tankahs that includes many countermarked specimens, c) a series of late Urtukid silver dirhems, d) a series of silver tankahs of the earlier Bengal Sultans. A number of these classes of coin, particularly those in the first three groups, were poorly represented in most of the major Catalogues of Islamic coinage. On the other hand inspection of Museum Catalogues, most of which were compiled several decades ago, provides a somewhat different spectrum of coinage reflecting the coin hoards and collecting preferences of earlier years.

As there is sometimes a tendancy for persons to consider that the formation of a representative collection of Islamic coins is a goal that is difficult to achieve it may be worth pointing out that all the coins shown here have been acquired by their respective owners during the course of the last few years. Most of the 4,000 coins belong to the author and the bulk of these have been acquired in London. One group of coins infrequently encountered in England is that struck by the medieval dynasties of North Africa and most specimens of these series catalogued here belong to Dr. Henri Arroyo of Toulon. Any single collection of material contains numerous lacunae that one would wish to fill and for their help in allowing me to catalogue coins that help to fill some of these gaps I am grateful not only to Dr. Arroyo but also to Messrs. K. M. MacKenzie, N. Rhodes, P. Seaby, R. Senior, C. M. Webdale and K. Wiggins; also to Messrs. A. H. Baldwin and Sons and Messrs. Spink and Sons: to Mr. Jan Lingen and others.

INTRODUCTION

Arabic letters

Arabic script is read from right to left. Because most letters are joined together within words there exist slightly differing forms depending on whether the particular letter is at the beginning, at the end, or in the middle of the word.

Transliteration

Although it is tidy to adopt an entirely consistent scheme of transliteration such a procedure leads to various anomalies. Conventions tend to differ in detail from country to country and from time to time. Thus, for instance, 'Dj' transliterates the Arabic character ج on the European continent whereas 'J' is normally used for the same character in England and America. Hence the common use of 'Djibouti' for that French colony but 'Java' for the Indonesian island. It is also usual to speak of 'Qazvin' in Persia but of 'Kandahar' in Afghanistan though both place names commence with the same Arabic character – ق . The character 'Ain is often dropped from western renderings of Arabic names, as in Ali ('Ali) and Ismail (Ism'ail). Oman in Hadramut and Amman in Jordan are both spelt the same in Arabic and both names commence with 'Ain : ع عمان ('Aman). Using any standard convention there would be little hope of correctly reading the phrase كوين وكطوريا ; this is the ruling sovereign's name rendered in Arabic script : - Queen Victoria. For such reasons the system of transliteration adopted in this book is a compromise between accepted conventions and common usage.

Arabic characters, including Persian, Indian and Malay forms

M	Mim	م	ـم	ـمـ	مـ
N	Nun	ن	ـن	ـنـ	نـ
N	No (Malay)	ڽ	ـڽ	ـڽـ	ڽـ
W, U	Waw	و	ـو	ـو	و
H	He	ه	ـه	ـهـ	هـ
Y	Ye	ي	ـي	ـيـ	يـ
La	Lam - Alif	لا	ـلا	ـلا	لا

Diacritical marks rarely appear on coins. Thus : -

ا	=	ا		A
ب	=	ب پ ت ث ٹ ٹ ں ی		B, P, T, Sh. Th, N, Y
ج	=	ج چ ح خ		J, Ch, H, Kh
د	=	د ڈ گ		D, Z
ر	=	ر ز ژ		R, Z
س	=	س ش		S, Sh
ص	=	ص ض		S, Z (Dh)
ط	=	ط ظ		t, z
ع	=	ع غ غ		'A, Gh, Ng
ف	=	ف ق ق	(NB medial ـفـ)	F, Q, P
ک	=	ک گ گ		K, G
ل	=	ل		L
م	=	م	(NB medial ـمـ)	M
و	=	و		W
ہ	=	ہ		H
لا	=	لا		LA

When similar letters are combined their height is usually varied to facilitate reading. Thus :-

سلع and لسع for 7 سبع and 9 تسع

اثنين for 2 اثنين

Arabic numerals

Dates in ciphers read from left to right (1977) but when written in words dates are read from right to left, as in ordinary text, commencing with the units (seven and seventy and nine hundred and one thousand).

Numerals

		Arabic Feminine	Masculine	Persian
1	١	احدى	احد	يک
2	٢	اثنتين	اثنين	دو
3	٣	ثلث ثلاث	ثلاثه	سه
4	٤ ۴	اربع	اربعه	چهار
5	٥ ۵ ۵	خمس	خمسه	پنج
6	٦ ۶	ست	سته	شش
7	٧ ۷	سبع	سبعه	هفت
8	٨ ۸	ثمان	ثمانيه	هشت
9	٩ ۹	تسع	تسعه	نه
10	١٠ ۱۰	عشر	عشره	ده
11	١١	احدى عشر	احد عشره	يازده
12	١٢	اثنتى عشر		دوازده
13	١٣	ثلث عشر		سيزده
14	١٤ ۱۴	اربع عشر		چهارده
15	١٥ ۱۵	خمس عشر		پانزده
16	١٦	ست عشر		سانزده
17	١٧	سبع عشر		هفتده
18	١٨	ثمان عشر		هشتده
19	١٩	تسع عشر		نوازده
20	٢٠ ۲۰	عشرين		بيست
21	٢١	احدى و عشرين		بيست و يک
22	٢٢	اثنتين و عشرين		بيست و دو
30	٣٠ ۳۰	ثلاثين ثلثين		سى
40	٤٠ ۴۰	اربعين		چهل
50	٥٠ ۵۰	خمسين		پنجاه
60	٦٠	ستين		شصت
70	٧٠	سبعين		هفتاد
80	٨٠	ثمانين		هشتاد
90	٩٠	تسعين		نود

100	١٠٠	مائه مئه	صد
101	١٠١	احدى و مائه	صد و يک
111	١١١	احدى عشر و مائه	صد و يازده
121	١٢١		
200	٢٠٠	مائتين مئتين	دو صد دو يست
300	٣٠٠	ثلثمائه ثلثمئه	سه صد
400	٤٠٠ ۴۰۰	اربعمائه اربعمئه	چهارصد
500	٥٠٠ ۵۰۰	خمسمائه خمسمئه	پنج صد
600	٦٠٠	ستمائه ستمئه	شش صد
700	٧٠٠	سبعمائه سبعمئه	هفت صد
800	٨٠٠	ثمانمائه ثمنمئه	هشت صد
900	٩٠٠	تسعمائه تسعمئه	نه صد
1000	١٠٠٠	الف	هزار
1/2		نصف ادها	نيم
1/3		ثلث	
1/4		ربع پاو	

Arabic numerals are usually written in the feminine.
The date usually follows the word 'Sanat' (سنه). During the Moghul period the form سنه جلوس ميمنت مانوس (in the year of his reign of tranquil prosperity) was adopted.

The word 'Am (عام) replaces Sanat on some coins of North Africa and Spain.

Composition of the Classical Islamic Coin Type

The Abbasid coin design, modified from that of their Omayyad predecessors, was handed down to numerous successor dynasties and remained in widespread use until about the eleventh century AD. Elements of the classical design were retained for much longer. The classical coin type was originally a Religious motif in which the only secular element was the Mint - Date Formula (Bismillah) disposed around the obverse margin. During the middle years of the Abbasid Caliphate further secular elements were added when the Caliph placed either his own name and titles or those of the heir apparent below the Kalima in the reverse field; sometimes spilling over to occupy the space below the Kalima in the obverse field also. The name of the provincial governor in whose domain the issuing mint was situated also began to find a place on the coin. In the case of copper issues the governor's name frequently appeared in one of the marginal legends whereas silver coins tended to bear his name in either the obverse or the reverse field; above or below the Kalima. With the fragmentation of the Abbasid Caliphate most successor dynasties retained a similar pattern of coinage, including retention of the Caliph's name since the Caliph was still normally acknowledged as the Religious head of Islam by breakaway states which assumed autonomy only in secular matters. The newly emergent local dynasts tended to place their own names in the coin field, either below the obverse Kalima, or below the Caliph's name on the reverse.

Obverse Coin Field:

The Kalima (The First or negative, part: Koran XLVII, 21)

لا اله الا الله

"There is no God but God"

This statement is often amplified and distributed in three lines Thus : -

لا اله الا الله وحده لا شريك له

"There is no God but God, who has no associate"

Reverse Coin Field:

The Kalima (The Second or positive, part: Koran XLVIII, 29)

محمد رسول الله

"Mohammed is the Prophet of God"

This is distributed on three separate lines when it is the only statement in the reverse field but occupies a single line when the name of the Caliph (or other persons) appears below.

During later periods both halves of the Kalima were often combined on one face of the coin and suffixes were sometimes added.

لا اله الا الله
محمد رسول الله
صلى الله عليه و سلم

In the case of the Shiite sect the Kalima was often followed by the statement "Ali is the favourite of Allah" : – علي ولي الله

On the earlier Omayyad coinage the reverse field was occupied by a different religious formula (Koran CXII) : –

الله احد الله الصمد لم يلد و لم يولد و لم يكن له كفوا احد

"God is alone, God is eternal, He begets not and is not begotten, nor is there like unto Him anyone"

Examples of Obverse and Reverse coin fields with added secular inscriptions (Abbasid and post-Abbasid period) -

لا اله الا الله الله و حده لا شريك له	محمد رسول الله صلى الله عليه و سلم الخليفه المهدى	Caliph Al Mahdi (158 - 169)
لا اله الا الله الله و حده لا شريك له	محمد رسول الله مما امر به هرون بن امير المومنين	"Harun (Al Rashid, heir apparent) son of the Commander of the Faithfull" on a coin of the Caliph Al Mahdi
لا اله الا الله الله و حده لا شريك له ابو العباس بن امير المومنين	لله محمد رسول الله المقتدر بالله	Caliph Al Muktadir (295 - 320) and his son, the heir apparent Al 'Abbas
لا اله الا الله الله و حده لا شريك له عمر بن الليث	محمد رسول الله المعتمد على الله احمد بن الموفق بالله	Saffarids: 'Amr ibn al Layth (265-87) citing the Caliph Al Mu'tamid (256-79) and the heir apparent Ahmad "son of the favoured one of Allah" (ie. Caliph's son)
لا اله الا الله الله و حده لا شريك له	محمد رسول الله المقتدر بالله نصر بن احمد	Samanids: Nasr ibn Ahmad (301-331) citing the Caliph Al Muktadir (295-320)

The Christian Formula of Faith

This appears on certain coins of Georgia, of the Crusaders and of Spanish Kings. It occupies the obverse field on dirhems of the two former classes and is usually associated with a cross : –

بسم الاب الابن و الروح القدوس لله و احد

"In the name of the Father and the Son and the Holy Spirit, one God"

The Mint – Date Formula (Bismillah)

This formula commences with the words "Bismillah", *in the name of Allah*, hence its name. It occupies the obverse coin margin and, in the case of coins bearing two obverse marginal legends, the Bismillah is the inner inscription.

بسم الله ضرب هذا الدينار الدرهم الفلس

"In the name of Allah was struck this Dinar (Dirhem or Fals ie. Gold coin, silver coin or copper coin) ....."

This affirmation is followed by the name of the mint with the prefix بـ (ba : at) and then the date prefixed by the word سنه (sanat : year). In the date the unit number comes first, followed by the tens and then the hundreds.

eg. بسم الله ضرب هذا الدرهم بالكوفه سنه ثمان و ستين و ماه

"In the name of Allah was struck this dirhem (silver coin) at Al Kufah in the year eight and sixty and one hundred"

From about the eleventh century AD this formula was variously abbreviated. Sometimes it became a simple mint-date formula, as on many Ayyubid-Urtukid dirhems : -

"Struck at Aleppo, year ....." ضرب بحلب سنه .....

and on Tankahs struck by the Sultans of Delhi and Bengal : - ضرب هذا الفضه بحضرت دهلي في سنه خمس و .....

Sometimes the date appeared in the margin and the mint name was placed in the coin field (obverse or reverse), as on some Ilkhanid and late Urtukid dirhems : - ضرب في سنه ضرب بمردين

("Struck in the year.....": margin) ("Struck at Mardin" : field)

A non-sectarian formula appears in the margin of some Crusader dirhems : - بسم الله الرحمن الرحيم

Religious marginal inscriptions

The reverse marginal legends and the outer of the two obverse marginal legends (when present) are usually religious quotations from the Koran. This is generally true of silver coins though one should note that Idrisid dirhems bear the Amir's inscription as a marginal legend. In the case of copper coins the nature of the marginal inscriptions is more variable: they are usually religious but not uncommonly secular (local governor's name).

The commonest reverse marginal legend is Koran IX, 33 ; (the segment in brackets is often omitted)

محمد رسول الله ارسله بالهدى و دين الحق (ليظهره على الدين كله ولو كره المشركون)

"Mohammed is the prophet of Allah sent with guidance and the Religion of Truth, to make it prevail over every other Religion, averse though idolaters may be"

The commonest obverse outer marginal legend is Koran XXX, 3-4 :

لله الامر من قبل و من بعد و يومئذ يفرح المؤمنون بنصر الله

"To God belongs the order before and after; and in that day the believers shall rejoice in the help of God"

On later coins, especially Persian, where the Profession of Faith was restricted to one side of the coin, the Kalima was often enclosed by citation of the Four Imams (Orthodox Caliphs) and on larger coins the names of the Twelve Legitimate Caliphs acknowledged by the Shia sect were added.

Four Imams	ابو بكر	عمر	عثمان	علي
(sometimes amplified)	Abu Bakr	Umar	Uthman	Ali

Twelve Imams علي و الحسن و الحسين و علي و محمد و جعفر و موسى و علي و محمد و علي و الحسن و محمد

(Names amplified by citing the Laqab in larger coins) : Ali (ibn Abu Talib), Hasan (ibn Ali), Al Hussain (ibn Ali), Ali (ibn Hussain), Mohammed (ibn Ali Zain al Abidin), Ja'far (ibn Mohammed Al Bakir), Musi (ibn Ja'far), Ali (ibn Musi), Mohammed (ibn Ali al Reza), Ali (ibn Mohammed al Tuki), Hasan (ibn Ali al Naki), Mohammed (ibn Hasan al Askari).

Distich

The regal legend of a number of coins struck in Persia, Afghanistan, India and Assam took the form of a poetical couplet (distich). These are transcribed, where relevant, in the text of the catalogue that follows. See Codrington (1904) for further examples, excluding Assam; and see J. Allan (NC. 1909) and H.N. Wright (JASB. 1904, NS IV) for those on Moghul style Assamese coins.

Personal honorary titles adopted by Islamic rulers (Laqab).

Islamic rulers were known not only by their personal names ('Alam: علم eg. Ahmad) but also by their relationship to a father, son or other relative, real or hypothetical (Kunyat: كنيه eg. Ahmad ibn Mohammed, Ahmad Abu Ja'far - father of a young lion). Persons were also known by various personal honorary titles (Laqab: لقب) and by other titles of more general application (Al Alamat and Anwan).
Islamic Emirs were often cited on their coins by a combination of 'Alam and Laqab and not infrequently by the Laqab alone (eg. Buyids, Delhi Sultans).

Fugitive	ابق الدين
Lion (of State)	اسد الدوله
Alexander of the Age	اسكندر الزمان
Good fortune (of the State)	اقبال الدوله
The Trusty	الامين امير المومنين , الملة

General regal titles used by Islamic rulers (Alamat & Anwan)

Such titles were often adopted as the badge of a particular dynasty

Officer	عامل الامیر
Slave	عبد الله , الله و ولیه , الراجی , الملک , معبود
Officer	عمید الدوله
Slave of Ali	علام علی
Kaan	قان , قاآن الاعظم , اعظم , العادل
Caesar Augustus	قیصر اوعست
Kaiser i Hind (Lord of India)	قیصر هند
Dog	کلب استات رضا , استات علی , علی , سلطان خراسان
Count (Sicily)	الکنت
Imam (religious leader)	امام الامرا , الامم , الایمه , الاعظم , الحق , الزمان و خلیفه , الظاهر
Lord	اتابک الاعظم
King of the Horde	اوردو ملکه
Amir (Prince)	امیر , امر الاجل , الاعظم , الامرا , الجلیل , الحامی لدین , السید , المشرق و الغرب , العادل , المسلمین , المظفر , المعظم , المومنین , الموید

Ilkhan	ایلخان	الاعظم , المعظم
Pope	بابا	اسلام , رومه
Badshah	بادشاه	الاعظم , بحر و بر , بیگم , جهان , زمان , العادل , عالم , غازی
Regent	بردوله	
Prince	برهان	
Prince	بک بیک	
Bahadur	بهادر	
Chamberlain	حاجب	
Emperor	خاقان	الاعظم , الافخم , الاکرم , البحرین , العادل , المکرم
Khan	خان	الاجل , الاعظم , بهادر , العادل , غازی , المؤید
Caliph	خلیفه	الامام , الله , امیر المومنین , الرحمن , الزمان
Duke	دوقه	
Raja	راجا	
Lord	رب	العالمین , المشرقین
Sultan	سلطان	الامرا , ابن سلطان , الحسان , الاسلام , الاسلام و المسلمین , الاعظم , الاکبر , الباذل , البرین , البر و البحر , جهان , الحلیم , الدوله , الزمان , السعید , سلاطین , المشرق , الشهید , العادل , العدل , العالم , العزیز , العهد و الزمان , الغازی , الغالب , الفاتح , الفضل , القاهر , الکامل , الکریم , المسلمین , المطیع , المطاع , المعظم , الملک , الولی , الهدی
Prince	سید	الامرا , الدوله , اشرف , الراس , السلاطین , المرسلین
Shah	شاه	ارمن , جهان , الدوله , دیاربکر , دین پناه , زمن , عالم , لندن ,
King of Kings	شاهانشاه	شاهنشاه , الاجل , اعظم , باذل , زمان
Sharif	شریف	الحسنی , النبوی
Shaikh	شیخ	
Lord	صاحب	زمان , العادل , العز و النصر فی البر و البحر , قران , قران ثانی

Queen Victoria	وکتوریا	وکتوریا وکتوریا
King	الملک	الاسلام , الاشرف , الاعظم , افضل , الامرا , الامم , امرا المشرق و الغرب , امرا محبین , الاوحد , البر و البحر , البرین و البحرین , دیاربکر , الرحمن , الرحیم , السعید , السید , الصالح , الظاهر , العالم , العادل , الغرب و العجم , العزیز , غازی , القاهر , الکامل , الکبیر , المسعود , المشدد , المظفر , المعظم , الملک , الملوک , الملوک و الملاکات , المنصور , الموفق , المؤید , الناصر , الولی
Queen	ملکه	المسلمین المعظمه الملکات
Slave	مولا	
Prince	مولی	امیر المومنین السلاطین المامون
Maharaja	مهاراجا	مهاراجه
Maharao	مهاراو	
The Mahdi	المهدی	امامنا , امام الامم , امیر المومنین , خلیفه الله
Viceroy	نائب	الامیر , امیر المومنین
	نبی	الله , رحمه
Nizam	نظام	الدوله , الدین , المومنین
Chief	نقیب	
Nawab	نواب	
Governor	الوالی	
Vizier	الوزیر	
Heir	وصی	علی وصی الرسول
Wali	ولی	الامر , الدوله , امیر المومنین , عهد , عهد المسلمین , العهد فی زمان

The second halves of these titles (in brackets) have the following meanings : -

Most illustrious	الاجل	Happy	السعید
The Greatest	الافخم	Of the Sultan of Khorasan	سلطان خراسان
The Great	الاعظم	The Witness	الشهید
The Most Noble	الاکرم	Of Allah and his Wali	الله و ولیه
Of Amirs	الامرا	Lord	السید
Of the People	الامم	The Manifest	الظاهر
Of the thresholds of the Pleasing One	استان رضا	Just	العادل
Of the threshold of Ali	استان علی	Victorious	عازی
Islam	اسلام	Of the World	عالم
Excellent	افضل	Of the Worlds	العالمین
Our Imam	امامنا	Of Arabs and Foreigners	العرب و العجم
Of the Amirs of East and West	امرا المشرق و الغرب	Of Ali	علی
Of Honoured Amirs	امرا محبین	Of the Epoch and the Age	العهد و الزمان
Munificent	الباذل باذل	Of the Happy Conjunction	قران
Of Sea and Land	بحر و بر	Second Lord of the Happy Conjunction	قران ثانی
Of the Two Seas	البحرین	Powerful	الکبیر
Of the Two Continents	البرین	London (ie. England)	لندن
Begum (Queen)	بیگم	Of Apostles	المرسلین
Illustrious	الجلیل	Prosperous	المسعود
Of the World	جهان	Of the Moslems	المسلمین
Protector of the Faith	الحامی لدین	Strengthened	المشدد
Excellent	الحسان	Of East and West	المشرق و الغرب
Of the Truth	الحق	Of the Easts	المشرقین
Gracious	الحلیم	Obedient and Obeyed	المطیع المطاع
Of Diyarbakr	دیاربکر	Conqueror	المظفر
Of the Asylum of Faith	دین پناه	Eminent	المعظم
Hoper	الراجی	Noble	المکرم
Merciful	الرحمن	Of Kings and Queens	الملوک و الملاکات
Of Armenia	ارمن	Favoured	الموفق
Chief	الرئس	Of the Faithful	المومنین
Of Rome	رومه	Strengthened	المؤید
Of the Age and the Caliphate	الزمان و خلیفه	Prophet	نبی

Islamic Mints

Most of the mints cited below are listed in one or other of the following works : Millies (1871: Malay-Indonesia), Codrington (1904: Islam in general), Singhal (1953: Moghul), Zambaur (1968: Lands of the Caliphate), Pridmore (1970-3: Malaya). The list that follows is fairly comprehensive but by no means complete; a number of mint names whose reading or location is uncertain have been omitted and so have a few lesser mints known from only one or two coins. For details of many towns see Le Strange (1905) and Minorsky (1970) and for various Islamic dynasties see Lane-Poole (1893), Zambaur (1927), Sewell (1932), Bosworth (1967) and Hall (1968). Mint names inscribed on coins published in the catalogue that follows are printed in *ITALICS* together with the name of the *dynasty* concerned.

Abbreviations

The names of the various dynasties that struck coins in Western Mints have nearly all been abbreviated in accordance with Zambaur's (1968) proposals. Fewer abbreviations are needed for more easterly mints and some of these are influenced by Codrington's (1904) terminology, particularly 'DeK' (Delhi Kings) and 'DeE' (Delhi Emperors) for the Sultans of Delhi and for the Moghul Emperors respectively.

Ab	Abbasids	132 - 656
Ac	Abbadids of Seville	414 - 484
Ae	Abd al Qadir of Algeria	1248 - 1264
	Atabegs	Azerbaijan (vide Ildegezids)
		Damascus (vide Burids)
		Fars (vide Salgharids)
		Luristan (vide Hazaraspids)
		Mosul (vide Zangids)
		Yezd (vide Yezd)
Ag	Aghlabids of N. Africa	184 - 292
Ah	Almohades (Muwahhids) of Morocco & Spain	515 - 667
Al	Alids of Tabaristan	250 - 424
Alm	Moghul Shah Alam II	some coins bearing his name were genuine Moghul issues but many were imitative coins struck in Maratha and other local states
Am	Almoravids of Morocco & Spain	448 - 543
An	Amirs of Nishapur in Khorasan	548 - 595
Ao	East African dynasties: Harar, Mombasa, Zanzibar etc.:	modern
Md	Midrarites of Sijilmasa	155 - 366
Mg	Mangits of Bokhara	1170 - 1329
Mh	Mahdites of the Sudan	1298 - 1316

Zp	Zands of Persia	1163 - 1211
Zs	Zangids of Sinjar	566 - 677
Re	Various rebels (see Zambaur's list)	

NB Dates of dynasties from various sources do not always correlate:-
1. because a ruler's induction into office, his initiation of coinage and his assumption of independance often all occurred in different years. (eg. Samanids).
2. because some dynasties, powerful at their apogee, had obscure beginnings or an obscure end whose dates remain debateable.

For more detailed discussion of mints, their locations and the dynasts who struck coins there see references cited and, in relevant instances, the catalogue that follows.

Titles associated with some Islamic mint names

Most Holy ground	ارض اقدس
Most noble of Cities	اشرف البلاد
District	اقليم
Mother of Cities	ام البلاد
Pleasing road	امام رضا
(the tomb of Imam Ali er Reza is at Meshad where this epithet was sometimes used to qualify the mint name)

Country	نگری

Dates and Eras

The great majority of Islamic coins are dated according to the Hijra (Hegira), an era dating from Mohammed's flight from Mecca to Medina on the 15 th. July AD 622. The Hijra has a lunar year composed of 12 months with 28 days each plus one intercalated day in eleven years per cycle of thirty years. Thus the Hijra year of 354 (sometimes + 1) days is 3 % shorter than the Christian year of 365 (sometimes + 1) days. A short, but fairly accurate, conversion of Christian to Hijra dates is thus achieved by subtracting 622 from the Christian date and then adding 3 % to the resulting figure. Thus : -

AD 1976 - 622 = 1354. Add 1354 x 0.03 = AH 1395

Conversely : AH 1395 - 3 % = 1354. Add 622 = AD 1976.

A more accurate equivalence between Hijra and Christian dates is given in the following table : -

AH	AD	Start													
1	622	Jy 16	21	641	D 10	41	661	My 7	61	680	O 1	81	700	F 26
2	623	Jy 5	22	642	N 30	42	662	Ap 26	62	681	S 20	82	701	F 15
3	624	Jn 24	23	643	N 19	43	663	Ap 15	63	682	S 10	83	702	F 4
4	625	Jn 13	24	644	N 7	44	664	Ap 4	64	683	Ag 30	84	703	Ja 24

Other eras used on Islamic coins include : –

The Yezdigird and the Post-Yezdigird Eras.

A number of Arab-Sassanian coins were dated according to the reign of the last Sassanian Emperor, Yezdigird III (AD 632-651). Dating according to the regnal year of the Emperor was the normal system used in the Sassanian Empire and was retained in some instances by their Arab conquerors. Islamic coins dated according to the Yezdigird Era range from year 20, the year of Yezdigird's reign in which he was finally defeated by the Arabs, until year 60.

YE (ie regnal year) 20 = AH 31 = AD 651 YE 60 = AH 72 = AD 692

The Ispahbads founded their Kingdom in Tabaristan, south of the Caspian, by assuming autonomy from their erstwhile Sassanian sovereigns shortly after the death of Yezdigird III. Their era, the Post-Yezdigird Era, dates from the foundation of their kingdom in the year of Yezdigird's death. Use of this era was continued on Islamic coins of the Abbasid period struck in Tabaristan until year 143.

PYE 1 = AH 31 = AD 652 PYE 143 = AH 178 = AD 794

The Khanian Era الخانيه

This was a transient Persian era founded by the Ilkhan Ghazan Mahmud on 1st. Rajab AH 701. It was used on certain coins of the Ilkhan Abu Sa'id (rarely later) struck in Georgian and Anatolian mints.

Al Khania year 1 = AH 701 = AD 1301

The Ilahi Era الهی

The Moghul Emperor Akbar established the Ilahi in his 30th. regnal year (AH 992) and made the era commence from his accession on 5th. Rabi al Sani AH 963 (19th. Feb. AD 1556). The Persian names of months were retained and often appear on coins. The Ilahi year being solar, whereas the Hijra is lunar, the Ilahi New Year commenced at different times in the Hijra year, as shown in the following table.

Ilahi and Hijra dates during Akbar's reign

Ilahi	Hijra		Christian				
29	992	8 Rabi I	1584	40	1003	9 Rajab	1595
30	993	19 Rabi I	1585	41	1004	20 Rajab	1596
31	994	29 Rabi I	1586	42	1005	2 Sha'ban	1597
32	995	11 Rabi II	1587	43	1006	13 Sha'ban	1598
33	996	22 Rabi II	1588	44	1007	23 Sha'ban	1599
34	997	4 Jumada I	1589	45	1008	4 Ramazan	1600
35	998	14 Jumada I	1590	46	1009	15 Ramazan	1601
36	999	24 Jumada I	1591	47	1010	26 Ramazan	1602
37	1000	5 Jumada II	1592	48	1011	6 Shawwal	1603
38	1001	17 Jumada II	1593	49	1012	17 Shawwal	1604
39	1002	28 Jumada II	1594	50	1013	28 Shawwal	1605

The Solar Hijra

During the present century the inconvenience of a lunar calendar has been rectified in both Afghanistan and Iran by adoption of the solar Hijra. This era, like the normal (lunar) Hijra, dates from AD 622 but it has a solar length year of 365 (var.) days.

Thus: AD 1925 = AH (Lunar Hijra) 1344 = SH (Solar Hijra) 1304

The Mulaudi era and the Fasli era

These were two other forms of Islamic solar era adopted in 19 th. century India. Tipu Sultan of Mysore introduced the Mulaudi era dating from Mohammed's birth in AD 571. This was first used in AD 1787 = AM (Mulaudi) 1215. The Fasli era was used by the Maratha Peshwas in South-western India and dated from Mohammed's conversion in AD 591 (AD 1831 = Fasli 1240).

The Spanish Era

This era used by medieval Christian kings in Spain was reckoned from the Roman conquest of Spain in 38 BC. It was used on Arabic style coins of the Christian kings in gold and copper, as well as on occasional Christian type issues.

The Era of the (British) Raj

Coins of some Indian Native States were dated from the suppression of the Indian mutiny. Year 1 of the Raj was AD 1857 - 8.

Other Eras

Some Islamic coins were dated according to the Christian era and others to the Vikrama Samvat (سمبت) of 57 BC.

Samvat date minus 57 = AD date

The Abjad Chronogram تاريخ ابجد

Letters in the Arabic alphabet are each given a numerical value for the chronogram. The date is expressed in terms of these letters, of which the first four are 'Abjad'. Thus : –

1	ا	10	ي	100	ق
2	ب	20	ك	200	ر
3	ج	30	ل	300	ش
4	د	40	م	400	ت
5	ه	50	ن	500	ث
6	و	60	س	600	خ
7	ز	70	ع	700	ذ
8	ح	80	ف	800	ض
9	ط	90	ص	900	ظ
				1000	غ

A Persian issue of Nadir Shah represented in this catalogue is dated – بتاريخ الخير فيما وقع

(By the Tarikh 'whatever happens is best')

ع ق و ا م ي ف ر ي خ ل ا

70 + 100 + 6 + 1 + 40 + 10 + 80 + 200 + 10 + 600 + 30 + 1 = AH 1148

An analougous system, the Abtas, was introduced by Tipu Sultan of Mysore. He gave ascending values to successive letters of the alphabet : A B T S = 1 2 3 4 ..... etc.

Months of the Year

Persian					Arabic
Farwandin		فروردیت	1	محرم	Mihram
Ardibihisht		اردی بهشت	2	صفر	Safar
Khurdad	خرداد	خورداد	3	ربیع الاول	Rabi I
Tir		تیر	4	ربیع الاخر	Rabi II
Mardad		مرداد	5	جمادی الاول	Jamada I
Shahrir : Shahrewar	شهریور	شهریر	6	جمادی الاخر	Jamada II
Mihr		مهر	7	رجب	Rajab
Aban		ابان	8	شعبان	Sha'ban
Azer		اذر	9	شوال	Shawwal
Di		دی	10	رمضان	Ramadan
Bahman		بهمت	11	ذو القعده	Dhu al Qada
Asfandarmuz		اسفندارمذ	12	ذو الحجه	Dhu al Hijah

Notes on the Catalogue

All coins cited in the Catalogue are illustrated and all photographs are natural size.
Coin weights (in grammes) are listed in an appendix.
Descriptions of coins have been reduced to citation of the information that appears most important for identification of the issue. Other details of the coin design can be gleaned from inspection of the photographs.
Coinage has been catalogued in a general "early to late" and "west to east" order. The rise of such dynasties as the Seljuqs, the Ayyubids, the Mongols and the Ottomans provides chronological watersheds for substantial tracts of the Islamic world while North Africa, the Fertile Crescent, the Iranian-Afghan plateau and India provide major geographical and often cultural divisions.
Apart from a very small number of issues, the coinages struck in Islamic countries during recent centuries by the various European colonising powers have been excluded from this study
In order to keep the length of the text as concise as possible discussion has been kept to a minimum and references have been reduced, for the most part, to the general listing in the Introduction.
For the great majority of dynasties the descriptions of the coins have been prefaced by a brief historical introduction and a list of rulers. In the case of some lesser known dynasties where conflicting dynastic lists exist a choice has normally been made to use the list that conforms most closely with the numismatic evidence: with occasional modifications introduced by coins published here.
In the case of a few issues the coin legends are capable of more than one reading. In such instances the interpretation that appears most probable to the author has been adopted
The Catalogue that follows is a representative cross - section of Islamic coinage illustrated by over 8,000 photographs.

The Creation of the Islamic Caliphate : AH 1 - 132 : AD 622 - 750

Mohammed was born in Mecca about AD 570, then an important religious and commercial centre. He began preaching about AD 610 and was obliged to leave Mecca and seek refuge at Medina in AD 622. This "flight" on 15th. July 622 provided the episode from which the Mohammedan era, the Hijra (Hegira) commenced. From this time Mohammed became established as the leader of a religious and political movement. When he died in 632 (AH 11) his influence was still restricted to Arabia and his father - in - law Abu Bakr (11 - 13: 632 - 634) had to re-establish Moslem allegiance in the penninsula by force of arms. But, having done this, Abu Bakr led the tide of Islam out of the penninsula and established Islam in Iraq (AH 12) and Syria (AH 13). He was followed by another father - in - law of the prophet named 'Umar (13 - 23: 633 - 644) under whose leadership the remainder of Syria and Mesopotamia were subdued during AH 14 - 17 and the cities of Basra and Kufa founded. In AH 20 Egypt was conquered and in the following year the defeat of the Sassanians at Nehavend (AH 21 : AD 642) gave 'Umar control of their possessions in Iran and Afghanistan, though pacification of the eastern provinces was to take some years. 'Umar adopted the title "Commander of the Faithful" (Amir Al Muminin) which was to be used by many later Caliphs. His elected successor, 'Othman (23 - 35 : 644 - 650), son - in - law of Mohammed, was in turn followed by another son - in - law of the prophet named 'Ali (35 - 40 : 656 - 661) who was also Mohammed's foster brother and cousin. These first four rulers, known as the Orthodox Caliphs, were succeeded by the first Islamic dynasty, the Omayyad Caliphate with its seat at Damascus. The transition occurred in 41 (661) when Mo'awiya, governor of Syria, took power after 'Ali had been murdered while trying to subdue him. Meanwhile the conquests of Islam were proceeding apace. In the east the River Oxus had been crossed by AH 54 (674: Bokhara) and the occupation of Transoxiana consolidated by 93, while in the west Carthage had been approached by 26 (647), though control of the region was not consolidated until 74 (693), after which the remainder of North Africa fell rapidly and Spain was overrun during 91 - 93 (710 - 712). At its greatest extent the Omayyad Caliphate embraced Southern France, Spain, North Africa, Egypt, Arabia, Syria, Mesopotamia, Eastern Turkey and the Caucasus, Iran, much of Afghanistan and the most distant provinces of Transoxiana and Sind. The Omayyads adopted and adapted the Byzantine and Sassanian administrations of the provinces they conquered but were unable to overcome internal dissension produced by the followers of 'Ali (the Shia) though they were eventually overthrown in 132 by the revolt of another Arabian party, the descendant of Al 'Abbas, uncle of Mohammed.

Orthodox Caliphs					
Abu Bakr	11	632	'Othman ibn 'Affan	23	644
'Umar ibn Al Khattab	13	634	'Ali ibn Abi Talib	35 - 40	656 - 661
Omayyad Caliphs					
Mo'awiya ibn Abi Sufyan	41	661	'Umar ibn 'abd al 'Aziz	99	717
Yazid I	60	680	Yazid II	101	720
Mo'awiya II	64	683	Hisham	105	724
Marwan ibn Al Hakim	64	684	Al Walid II	125	743
'Abd al Malik	65	685	Yazid III	126	744
Al Walid I	86	705	Ibrahim	126	744
Suleiman	96	715	Marwan II	127 - 132	744 - 750

Coinage

Until the currency reforms of AH 77 - 9 (697 - 9) distinctive eastern and western coinages were struck in continuance of the pre-existing currencies of the conquered provinces. In provinces conquered from the Byzantine Empire, Syria and Mesopotamia westwards, the circulating Byzantine coinage was supplemented by Islamic issues of "Arab-Byzantine" type while in provinces conquered from the Sassanians, Iran eastwards, the currency of Sassanian silver drachms was supplemented by comparable "Arab-Sassanian" issues. During the years AH 77 - 79 a new and distinctively Islamic coinage was created for use throughout the Caliphate. Adoption of the 'Reformed currency' was not, however, instantaneous in all mints; coins of Byzantine and of Sassanian inspiration still being issued from some mints and occasionally alternating with the new issues (eg. Seistan, Bokhara).

A) Arab - Byzantine coinage

The Arab-Byzantine copper coinage with Emperor designs appears to have preceeded that with Caliph types and the latter include issues of the Caliph 'Abd al Malik (65 - 86), though the design was probably inaugurated by Mo'awiya (41-60 cfr. BMC). Dates cited below are approximate. The coins listed are from the Syria-Palestine-Mesopotamia region where copper emissions exceeded gold. By contrast North African gold output (not represented here) exceeded copper.

AE Fals

Emperor series : circa AH 14 - 50 (AD 635 - 670)

B) Arab - Sassanian coinage struck before the currency reform of AH 77/79.

The earliest Arab-Sassanian coins were struck in AD 651, the year of Yezdegird III's final defeat. These Arab drachms were close imitations of Yezdegird's issues and were appropriately dated as his 20th. regnal year, only adding that they were struck "in the name of Allah". The Arabs then reverted to imitating the predominant current coin, the plentiful issues of Khusru II; these they dated from year 21 to year 60 of Yezdegird's hypothetical reign. This chronological system, the 'Yezdegird era (YE)', commences from the accession of that monarch in AD 632. Meanwhile coins with the same designs were issued in the names of various local governors in provinces of the Iranian-Afghan plateau until AH 83 when the last issues gave way to reformed dirhems of the type introduced in 79. Some Arab-Sassanian drachms issued by provincial governors were dated according to the Yezdegird era of AD 632 but most, particularly the later issues, were dated according to the Hijra.

Governor of Kufa and Basra AH 71 - 74

38 Azerbaijan (ATRA) بشر كتب
year 73 (AH)
Caliph standing facing with raised arms, attendant on either side S. Erel 1970, 1

C) Reformed Omayyad coinage : circa AH 79 - 132

The new currency consisted of gold Dinars and silver Dirhems bearing standard inscriptional designs, together with a varied series of copper Fals.
Omayyad dirhems are broad, thin coins after the fashion of Sassanian predecessors and they weigh 2.9 / 3.0 grammes following early issues at 2.6 gm. Their design is constant with the obverse and reverse fields occupied by the Kalima; the Islamic invocation of Faith. The mint-date formula (Bismillah) is the obverse marginal legend and a Koranic quotation appears around the reverse margin.

Obv. field : لا اله الا الله و حده لا شريك له
"There is no god except Allah alone. He has no partner"
Rev. field : الله احد الله الصمد لم يلد و لم يولد
"Allah is One, Allah is the Eternal. He begets not neither is He begotten"
Obv. margin : بسم الله ضرب هذا الدرهم بـ MINT سنه DATE
"In the name of Allah this dirhem was struck at (mint) , year (date)"
Rev. margin : محمد رسول الله ارسله بالهدى و دين الحق ليظهره على الدين كله
"Mohammed is the Prophet of Allah whom He sent with guidance and the Religion of Truth that he may make it victorious over every other religion"

Gold dinars, modelled metrologically on Byzantine solidi, are somewhat thicker than dirhems, with a smaller diameter but a slightly heavier weight of 4.3 grammes. Inscriptions in the obverse and reverse fields are the same as on dirhems but the margins are transposed with the Bismillah placed on the reverse and shortened to give date but not mint. In the western provinces of North Africa and Spain dinars, or more often their fractions, bore slightly different inscriptions until AH 114 when they were brought into line with the standard issues of the Central Provinces.

AV Dinars (4.3 gm)

39-40 AH 114 (no mint name)
بسم الله ضرب هذا الدينار سنه اربع عشر و مئه

41 AH 118

AV Third Dinars (1.4 gm)

Contemporaries of the Omayyads in Afghanistan

The advance of Islam was arrested in Afghanistan by the resistence of the Turco - Hephthalite tribesmen who inhabited Tokharistan (NE. Afghanistan), the Central Afghan massif and Zabulistan (SE. Afghanistan). The resistance of these peoples, the Hephthalites who had controlled the region for some centuries, and recent immigrant Turkish tribes, was organised during much of the late 7 th. century AD by one Tarkhan Nizak. He can probably be identified with Shahi Tigin who struck coins in AD 696.

The Turco - Hephthalites

Anonymous

95 Turco-Hephthalite tamgha countermarked on a Sassanian drachm of Khusru II (AHM yr 37)

Anonymous silver drachm : circa AD 610

96 In the name 'Sri Shaho'
(Mitchiner 1974 : Gobl type 243)

Sri Bahmana Vasu Deva

97 Date 65 (AH 65 : AD 685)
Mint ZAM
Obv. Bust modified from Khusru II
brahmi *Sri Vajara Vakhadevah*
Rev. Fire altar and attendants
pehlvi mint (ZAM) and date (65)
(Gobl type 244)

Shahi Tigin (? = Tarkhan Nizak)

98 - 9 Date 77 (AH 77 = AD 696)
Mint Hwrasan : Khorasan
legends: *1 : Sri Shaho*
2 : Sri Hiti Vira Kharalava Paramesvara Sri Vahi Tigina Devakari Tam
3 : Tgyna Hwrasan Malka 77
(Mitchiner 1974 : Gobl type 208)

100 Prince and Sun-god type copper issue of Shahi Tigin
Obv : Sri Shaho
Rev : Hwrasan
(Mitchiner 1974 : Gobl type 210)

Kingdom of Zabul

Anonymous silver drachm : circa 8 th. century AD

101 Horseman right : cursive Greek legend around
(prototype for the "Bull & Horseman" coinage struck by the Shahis and later dynasties : Gobl types 105 - 7)

Contemporaries of the Omayyads in the West

Definitive separation of the Roman Empire into Eastern and Western Kingdoms followed the death of Theodosius in 395. The Western Empire of Honorius retained the two large Prefectures of Italy (Italy, Rome, Illyria, Africa) and Gaul (Spain, Gaul, Britain) while the Eastern Kingdom of Arcadius comprised the Prefectures of Eastern Illyria (Dacia, Macedonia) and the Orient (Egypt, the East, the Turkish provinces). During the ensuing century the Western Kingdom fragmented as provinces fell one by one to the Barbarians : Visigoths, Alans, Suevi, Vandals, Burgundians and Franks. In 476 Odovacer, chief of the Heruli, deposed the last Western Emperor, Romulus. The Eastern Kingdom became the Byzantine Empire which reached its greatest territorial extent during the reign of Justinian (AD 527 - 566) who occupied much of North Africa and Italy together with part of Spain. During the late 6 th. century large tracts in Italy passed to the newly immigrant Lombards and in 624 the Byzantines were expelled from their Spanish provinces when the Visigoths consolidated their Kingdom in that country. When the Arabs burst on to the scene Byzantine authority in the West was already on the wane.

Coinage in the various progeny of the Roman Empire evolved from Roman prototypes. In the Byzantine world the gold Solidus and its third, the Tremissis, were struck in large numbers. The small silver Siliqua was less often struck, subsidiary denominations being provided, for the most part, by the large copper follis of 40 nummia and its fractions. The Western Kingdoms produced their own interpretations of late Roman and Byzantine prototypes. The Ostrogoths favoured the silver Siliqua and the Merovingians the gold tremissis while the Lombards and Visigoths based their coinage on the gold Solidus. Alongside such issues many Western Kingdoms issued small copper coins bearing the King's monogram on the reverse.

Byzantium : Early period

Gold Solidus (4.39 gm)

102 Heraclius (610 - 641)
Busts of Heraclius and his son Heraclius Constantine / Cross on steps (Sear 738)

The common late Roman 'Nike' reverse type gave way to the 'Cross on Steps' temporarily under Tiberius II (578 - 82) and more permanently under Heraclius. Solidi of Heraclius were occasionally imitated (3 emperors type) in the Central Provinces of the Caliphate but much more commonly copied (2 busts type) in the Western Provinces where both Byzantine and Islamic coins had a typically dumpy fabric.

Gold Tremissis (1.46 gm)

103 Focas (602 - 610)
The tremissis normally has a profile bust in contrast to the facing busts used on solidi

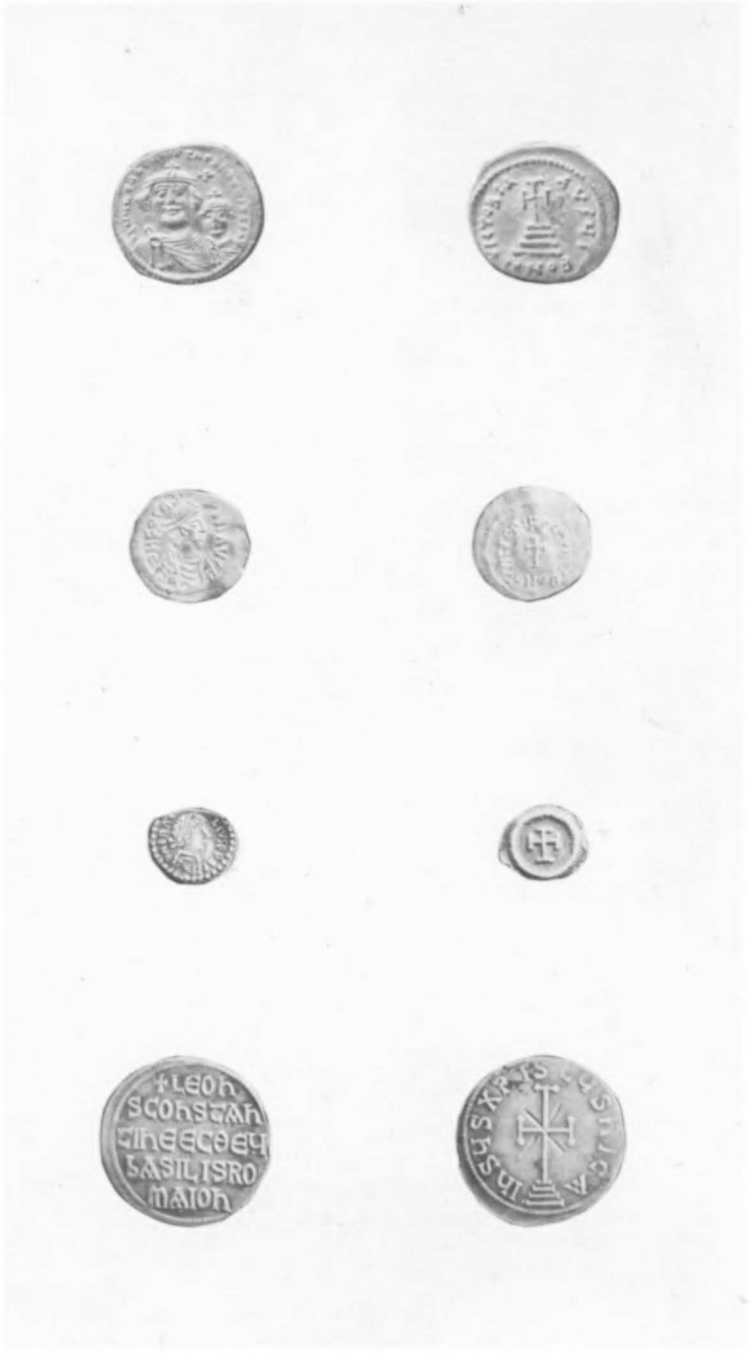
Silver Quarter Siliqua (0.4 gm)

104 Heraclius (610 - 641)
Ravenna mint
The siliqua and fractions were Roman denominations

Silver Miliaresion (2.2 gm. reducing)

105 Leo V with Constanitne (813 - 820)
Constantinople mint

The large silver denomination (Hexagram) introduced by Heraclius fell into disuse but its broad flan successor, the silver Miliaresion introduced by Leo III (717-41) was destined to endure until the reform of Alexius I (1081-1118).



Copper Follis of 40 Nummia : 'M' on the coins

The denomination was introduced by Anastasius (491-518)

106 Justinian I (527 - 565) : Constantinople yr. 13
Facing bust

107 Justinian I : Antioch (Theoupolis) no date
Enthroned Emperor (Sear 214)

108 Justin II (656 - 578) with Sophia : Nikomedia yr. 3

109 Justin and Sophia : Carthage yr. 8

110 Maurice Tiberius (582 - 602) : Antioch (Theoupolis)
year 13 (Sear 533)

111 Maurice Tiberius : Antioch yr. 14

112 Focas (602 - 610) : Constantinople yr. 5
overstruck on Maurice (Const. yr. 7) (Sear 640)

113 Focas with Leontia : Antioch yr. 2 (Sear 671)

114 Heraclius (610 - 641) : Cyzicus yr. 3 (Sear 839)

115 Heraclius with Heraclius Constantine
Constantinople yr 3 (Sear 805)

116 Sim. Constantinople yr. 5
overstruck on Justin with Sophia (Cyzicus)

117 Sim. Constantinople yr. 5
overstruck on Focas

118 as 117

119 Sim. Unc. mint, yr. 5
overstruck on Focas (Nicomedia)

120 Heraclius with Heraclius Constantine
Constantinople yr. 20 (Sear 809)
Note weight reduction

121 Constans II (641 - 668) : Constantinople yr. 2
AD 642 (Sear 1001)
Compare with early Arab-Byzantine AE

122 Constans II with Constantine IV, Heraclius & Tiberius
(after 659) : Constantinople (Sear 1011)

123 Nikephorus I (802 - 811) : Syracuse (Sear 1612)

124 Michael II (820 - 829) and Theophilus
Syracuse (Sear 1652)
Note progressive deterioration of the copper coinage

The Ostrogoths
Representing Western Post - Roman coinage

Silver Half Siliquae

125 Athalaric (526 - 634)
Bust r. : DN IVSTINIAN AVG
Rev. in wreath DN ATHALARICVS AVG

126 Erraric (AD 541)
Bust r. : DN IVSTINIAN AVG
Rev. Erraric's monogram in wreath
Erraric used the same monogram as Thoedoric but Theodoric (493 - 523) died before the accession of Justinian who was acknowledged as suzerain by Erraric.

Copper : Byzantine type

127 Theodoric (493 0 523)
5 nummia : imitating Justin I

Copper : Post - Roman type

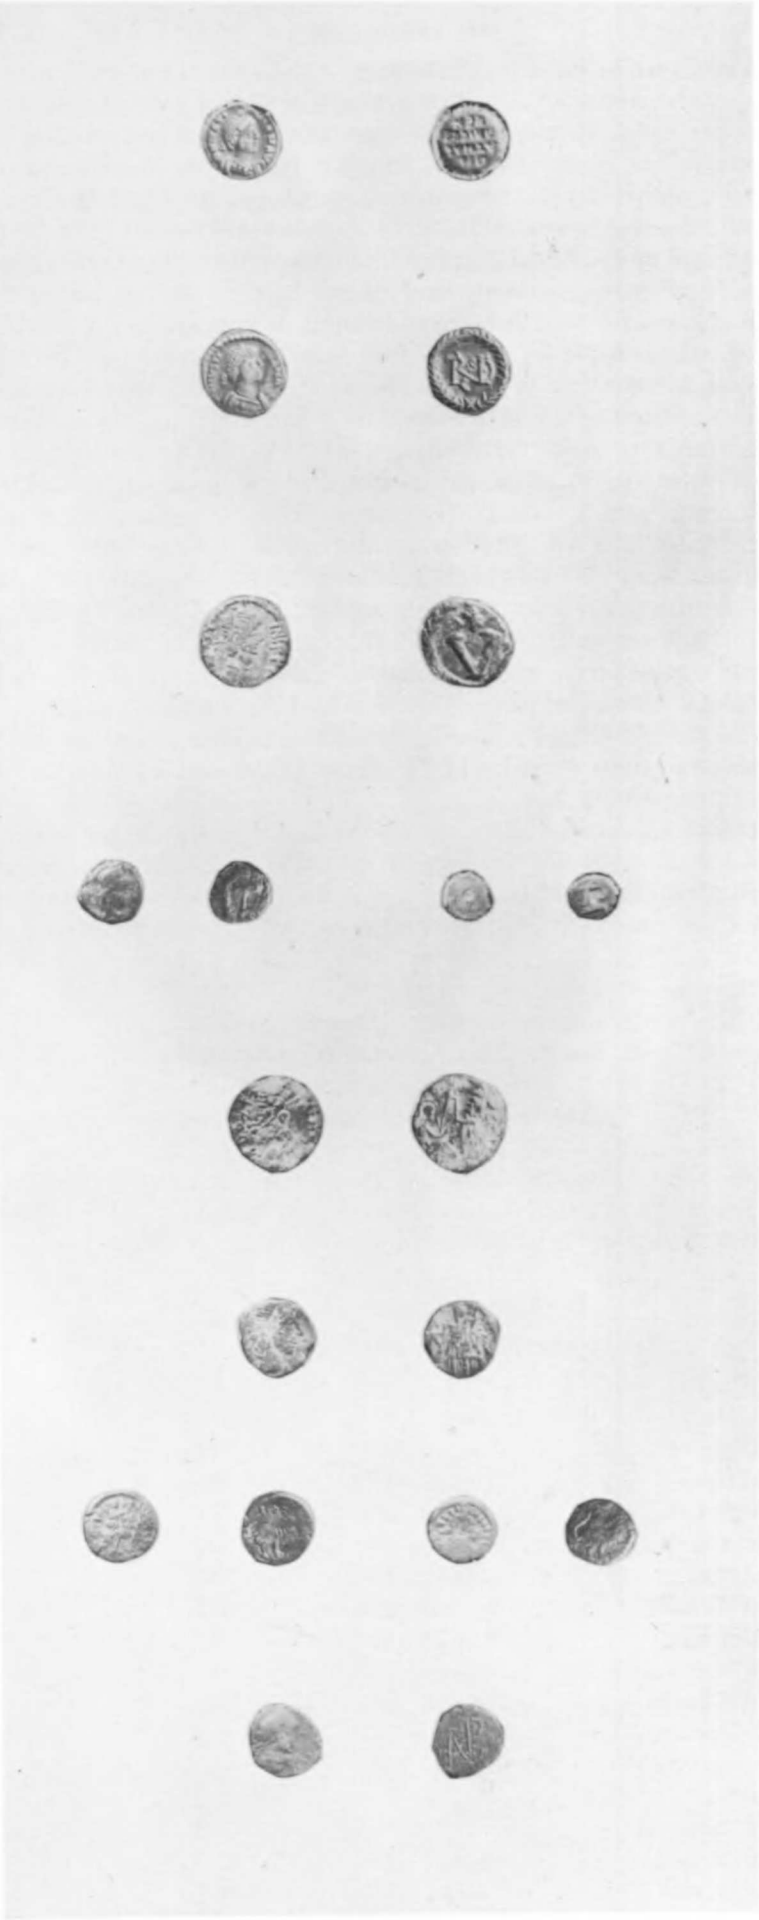
128 Baduila (541 - 552) : also known as Totila
-129 Bust r. / Baduila's monogram

130 Baduila
Bust + legend ΒΑΔΟΛΤΛ /King and soldier

131 Anonymous circa AD 550
Bust / Soldier

132 Anonymous circa AD 550
-133 Bust / Lion right

134 Uncertain
Perhaps Gondabaud the Burgundian (473-516)
Bust r. / monogram



The Abbasid Caliphs of Bagdad
AH 132 to 334 and later till 656 : AD 749 to 946 and later till 1258

A revolt led by the descendants of Al 'Abbas, an uncle of the Prophet, unseated the Omayyads in 132 (749) and replaced them by a new, Abbasid, Caliphate with its seat at Bagdad. One member of the supressed Omayyad family, 'Abd al Rahman, grandson of the Caliph Hisham, escaped persecution and was welcomed in Spain where he and his successors continued to rule an independant Spanish Omayyad Caliphate (from 138). In other regions the frontiers of the early Abbasid Caliphate remained stable until 172 (788) when new unrest was provoked by followers of the murdered 'Ali. On this occasion Idris, grandson of 'Ali succeeded in establishing his independant Alid dynasty (172 - 310) in Morocco with its capital at Tudgha. The example was followed by the Aghlabid governor who assumed autonomy in his North African domain centred on Tunis during 184 (800). By this time Abbasid authority barely passed Egypt in the west. During the next century the Abbasid Caliphate was steadily eroded as province followed province in declaring its independance in all matters temporal. The religious authority of the Caliph was still acknowledged by most of these independant dynasts and his name still appeared on the majority of coins stuck outside Spain and Morocco. In the west Ahmad ibn Tulun, son of a Turkish slave, was appointed governor of Egypt in 254 (868) but soon assumed virtual independance in Egypt and Syria. Abbasid authority was restored there in 292 but the region regained independance under the Ikhshidids in 323 (935). A comparable situation developed in the eastern provinces where Tahir, appointed viceroy of the East in 204 (819), assumed autonomous status that was enjoyed by his family as vassal dynasts of Khorasan until 259 (872). The eastern provinces became fully autonomous under Saffarid and Samanid dynasts during the 250's and 260's AH. Other secessionist movements of the same century saw autonomous dynasties established in other pockets around Islam : the Dulafids in Kurdistan (AH c. 210 - 285), the Sajids in Azerbaijan (AH 216 - c. 318) and an Alid dynasty in Tabaristan (250 - 316). The death knell of temporal Abbasid authority was sounded by the rise of another Persian dynasty, the Buyids (Buweyhids: 320 - 447) who occupied Bagdad in 334 (945).

The coinage of the Abbasid Caliphate spans the period AH 132 to 334 together with a restoration during the resurgence of Caliphal temporal authority (AH 566 - 656) that preceeded execution of the last Abbasid Caliph by the Mongols in 656 (1258). The Abbasid Caliphs retained an inscriptional form of coinage that was slightly modified from the Omayyad coinage. The outlying eastern provinces of Tabaristan, Choresmia, Sogdiana and Seistan provided an exception where some Sassanian style drachms were still issued.

Normal Abbasid silver dirhems bear the Kalima in obverse and reverse fields, slightly modified from the Omayyad formula, and may additionally bear the name of the Caliph or Heir apparent below the Kalima: sometimes also the name of the provincial governor. The bismillah still appears as the obverse marginal legend, latterly often associated with a second, external, Koranic marginal inscription. The reverse marginal legend is also taken from the Koran : –

Obv. field : لا اله الا الله وحده لا شريك له

Rev. field 1 : Kalima only – محمد رسول الله

2 : Kalima + Caliph (eg. Harun Al Rashid) – محمد رسول الله محال امر به عبد الله هرون امير المومنين

3 : Kalima + Heir Apparent (eg. Al Mamun on a coin of Al Rashid) –

محمد رسول الله محال امر به الامير المامون عبد الله بن امير المومنين

(The Amir Al Mamun 'Abd Allah son of the Commander of the Faithful)

Script forms on dirhems develop curious attenuated features during the period circa 160 to 230 and the fabric of dirhems becomes more dumpy for a while during Al Rashid's Caliphate. Their weight remains stable at 2.9 grammes until about 280. After this the weight of dirhems tends to fluctuate between 3 and 4 grammes; rarely falling below 2.5 or rising above 4.5 grammes.

The Abbasid Caliphs

Abbasid Provincial Coinage of Tabaristan

Tabaristan, on the south coast of the Caspian Sea, became an independant principality under the Ispahbads when the Sassanian sovereign Yezdegird III was assasinated in AD 651. The Ispahbad coinage of Sassanian type hemidrachms was issued during the last half-century of the dynasty, from year 60 to year 110 (PYE) when the Arabs conquered Tabaristan. For several years, until PYE 115, the Arabs continued issuing hemidrachms with the name and type of Khurshid. Thereafter a series of similar coins were either anonymous or bore the names of successive Arab governors who controlled the province until PYE 143 when this local coinage ended.

The following issued coins : –

Ispahbads

Farkhan	(= Farrox)	𐭯𐭫𐭮𐭫𐭠	60 - 70
	(= Farroxan)	𐭯𐭫𐭮𐭫𐭮𐭠𐭭	72 - 79
Datburzmihr		𐭣𐭯𐭲𐭥𐭫𐭦𐭥𐭣𐭫	79 - 88
Khurshid		𐭫𐭥𐭫𐭮𐭫𐭱𐭣	89 - 111

Arab Governors

Posthumous Khurshid coinage			111 - 115
Khalid		𐭩𐭠𐭤𐭠𐭣	116 - 120
'Omar	(Pehlvi name)	𐭠𐭥𐭥𐭠𐭤	120 - 127
	(Arabic name)	عمر	120 - 129
Sa'id		𐭠𐭥𐭥𐭠𐭤 𐭣𐭠𐭩𐭩	125
Sa'id		سعيد	121 - 129

In the penultimate year of their issue the weight of these Sassanian standard hemi-drachms was raised from a constant 2 grammes towards the weight of the dirhem. The two coins of year 142 catalogued here weigh 2.4 and 2.94 grammes.

Abbasid Provincial coinage in the East
Bokhara, Choresmia and Seistan

Traditional coinage forms remained in use for purposes of local commerce in the three eastern provinces, Seistan, Sogdiana and Choresmia, until the 8 th. century AD. In Seistan (SW. Afghanistan) crude Sassanian style coinage of the Abbasid period was issued alongside normal dirhems of the Omayyad - Abbasid period. An analogous situation existed in Sogdiana where Arab derivatives of Sassanian style drachms introduced by the Hephthalite 'Lords of Bokhara' were issued until some decades after the Bokhara mint had begun issuing normal Abbasid dirhems and fals. Issues of 'Bust / Horseman' silver drachms derived from those of the Choresmian kings were also continued by Abbasid governors in this province which straddled the lower reaches of the River Oxus.

The Tulunids and the Tahirids

In certain respects these two dynasties mark a transition between Abbasid and local rule in eastern and western provinces of the Caliphate. In political terms Tahir and his successors acknowledged their position as vassal Amirs of the Caliph and paid him annual tribute though they acted as autonomous sovereigns. In numismatic terms only a minority of coins issued under the authority of the Tahirids actually bore the name of the Tahirid dynast and most followed Abbasid patterns and bore only the Caliph's name. An analagous situation existed in the Tulunid domains. The numismatic position has produced some confusion in catalogues because coins struck by order of Tahirid and Tulunid Amirs tend to be attributed to the local Amir if they bear his name but to the Abbasid Caliph if only his name appears. Thus BMC lists Abbasid coins struck at Samarkand, Tashkent and Merv in AH 253 but Tahirid coins struck at Merv in 239 and at Bokhara in 253. In practice all these coins were struck for Tahirid Amirs who acknowledged their position as vassals of the Caliph. In the present instance coins struck under the authority of Tahirid or Tulunid Amirs are catalogued under these dynasts irrespective of whether or not the local Amir is named on the coins.

Tahir Dhu al Yaminayn was a successful general of the Caliph Al Mamun appointed viceroy of Khorasan (including Transoxiana) in 205 (820). The frontiers of the Tahirid Amirate remained stable until the rise of the Saffarids who, expanding from Seistan superseded the Tahirids in 259 though they were unable to occupy Transoxiana which was consolidated by the governor of Samarkand, Nasr ibn Ahmad Samani. Tulun was a Turk from Transoxiana and an erstwhile slave of the Caliph Al Mamun. He rose to high office in Bagdad. Tulun's son Ahmad was made governor of Egypt in 254 and included Syria in his domain during 264. These two provinces remained in the possession of virtually independant Tulunid Amirs until 292 when they reverted to the Abbasids.

The Omayyads of Spain (Al Andalus : Çordoba)

Spain became part of the Omayyad Caliphate ruled from Damascus during the years AH 91 - 93 (AD 710 - 712) when North African Arabs were called upon to assist in the dynastic struggle of the Spanish Visigothic Kingdom. In April 711 an Arab army landed beside a hill which they re-named Tarik's Hill (Djebel Tarik : Gibralter). By 712 most of Spain was in Moslem hands though the last Visigothic resistance at Barcelona in the north-east and Galicia in the north-west was not overcome until 718. Further northern campaigns across the Pyrenees gave the Arabs Toulouse in 721, Carcassonne in 725 and Bordeaux during the same decade. The progress of Islam was arrested by Charles Martel, Mayor of Palace who held real authority in the Merovingian realm, when he defeated the Moslems at Poitiers in 732 and restricted them to south-eastern France. Charles Martel's son Pepin, proclaimed king in 751, completed expulsion of the Moslems from France during the years 752 - 759 and exchanged embassies with the Abbasid Caliph Al Mansur, who was equally opposed to the Omayyad Emirate in Spain. For the erstwhile Moslem province of Spain had recently (AH 138 : AD 756) become an independant Emirate. When the Abbasid revolution displaced the Omayyad Caliphate of Damascus in AH 132 (AD 750) 'Abd al Rahman, a grandson of the Caliph Hisham, had escaped persecution and been welcomed in Spain which was thenceforth (from AH 138 : AD 756) an independant Spanish Omayyad Emirate ruled from Cordoba. After the time of Pepin conflicts between Spanish Omayyads and Franks produced only relatively minor fluctuations in their mutual frontier. Charlemagne, Pepin's successor, campaigning against Saragossa, was defeated during his retreat (Roncevaux 778) though he later succeeded in moving the eastern part of the frontier southwards from the Pyrenees to Barcelona (795 - 803). Further to the west the northern coast of Spain retained a precarious independance under Christian rulers as the Kingdom of Asturias. During the 9th. and 10th. centuries AD (c. 184 - 390 AH) relationships between Moslems and Christians remained fairly stable. The Emirate of Cordoba flourished both commercially and as a cultural focus, particularly during the Caliphate of 'Abd al Rahman III (300 - 350 : 912 - 961). 'Abd al Rahman was the first self-proclaimed Caliph of the Spanish Omayyads. Catalonia had become the domain of the Counts of Barcelona when the Carolingians became decadent while Asturias had slowly enlarged as a focus of Christian resistance, bolstered by the foundation of the Shrine at Compostella, and had given birth to the principalities of Leon and Castille on its southern borders. In a final flourish of the Omayyads Catalonia (985), Castille, Leon and Compostella (997) were occupied for Hisham II (976 - 1013 : 366 - 403) by his general Al Mansur (Almanzor). Separatist movements by regional groups within the Spanish Omayyad Caliphate led to its fragmentation during the ensuing two decades (AH 400 - 420).

The Muluk al Tuwaif (Reyes Taifas) : 11 th. century AD

The name, "Kings of the Bands", describes the many fragments into which the Cordoba Caliphate was dismembered. The Hammudid dynasts, established at Malaga in 410 (1010), initiated the move towards regional autonomy and sometimes usurped the Caliphate during the period AH 407 to 418. The Hammudid example was soon followed at Grenada (Zirids 403), Saragossa (Tujibids 410; later the Hudids), Valencia ('Amirids 412), Badajoz (Aftasids 413), Majorca (Banu Mujahid 413), Seville ('Abbadids 414), Toledo (Dhu al Nunids circa 415) and at Cordoba itself (Jahwarids 422) as well as in less important places to a total number of some 23 dynasties. These dynasties ranged from major states controlling large tracts of land, such as most of those cited above, to petty and transient city states. Their rulers belonged to a variety of ethnic groups and were descended, for the most part, either from the original Arab conquerors or from African Berber mercenaries imported during previous decades. Internecine warfare was endemic but culture flourished. Weakened Moslem power gave advantage to the Christian Kingdoms of the north. The principality of Catalonia (Barcelona) flourished under the two Raymond Beranger (1018 - 76) but remained separated from the north-western kingdoms by the Moslem principality of Saragossa in the upper Ebro valley. In the north-west Sancho the Great of Navarre (1000 - 1035) extended his sway over Leon, Castille and Aragon, a realm that was to be split between his sons in 1035. Navarre then went to Garcia, Aragon to Ramirez and later to Sancho Ramirez (1064 - 94), while Castille with Leon went to Ferdinand (1036 - 64). Ferdinand's son, Alphonso VI (1072 - 1109) occupied Toledo and made Castille the foremost Christian kingdom in Spain. During the course of his long reign Alphonso elevated Lusitania to the rank of an independant Countship for his son-in-law Henry of Burgundy (1094): the origin of the Portuguese realm. This period of Christian expansion saw both the introduction of coinage struck in the Christian kingdoms and also the renowned exploits of El Cid who not only served Christian masters, for whom he occupied Seville (484 : 1091), but also acted as protector of Valencia and Saragossa at the bequest of their Moslem masters. The internecine warfare of petty Moslem states and the rising power of the Christian kingdoms led Al Mu'tamid of Seville (461 - 484) to call on the Almoravids of North Africa for aid. They duly came and then proceeded to occupy the rest of Moslem Spain (Majorca excepted) during the period 483 - 9 (1090 - 6).

The Idrisids and the Aghlabids of North Africa

Large sections of North Africa split off from the Abbasid Caliphate soon after the Spanish had refused to accept the inception of that dynasty. Idris, grandson of 'Ali, established his own Alid dynasty in Morocco with its capital at Tudgha in 172 (789). This example was soon followed by the Aghlabid governor who assumed autonomy in his North African domain centred on Tunis (Ifriqiya) during 184 (800). By this time Abbasid influence hardly extended west of Egypt. The Aghlabids gained control of South Mediterranean sea trade; conquered Malta in 255 and occupied Sicily in a series of campaigns extending from 217 to 264 (827 - 878). During the years around 300 Aghlabid possessions passed to the Fatimids and within a few years the Idrisid Emirate in Morocco (314) had also been incorporated by the Fatimids. During the decades when sovereignty over north-western Africa was passing from the Idrisids to the Fatimids a number of Berber tribes (Miknasa, Zenata et al.) exercised transient independance (c. AH 300 - 360). Fatimid control over their western provinces, weakened after removal of the Fatimid capital to Egypt in 362, was exercised by a succession of Berber governors (362 - 440's) belonging to the Zirid family who had their seat at Al Mansuriya from 362. During the 440's the Zirids revolted and assumed independance which they exercised until conquered by the Normans of Sicily in 543 (1148).

The Almoravids of North Africa and Spain

The Murabits (Marebouts : Almoravids) were members of a religious movement among the Berbers of North Africa which overran Morocco. The Almoravids established their capital at Marrakesh in 454 (1062). In 479 (1086) Yusuf ibn Tashfin crossed over to Spain, answering a request for aid, and during the next decade overran most of the Muluk al Tuwaif, leaving only the Hudids of Saragossa as his vassals. Toledo remained within the Christian kingdom of Castille despite their defeat at Yusuf's hands. Some decades later , in 1118 (512), the vassal Emirate of Saragossa was occupied by Alfonso I of Aragon (1104 - 1134) who made Saragossa the capital of an enlarged Aragonese Kingdom. During the next half century the now adjacent Kingdoms of Aragon and Catalonia became united in the person of Alfonso II (1162 - 1190). In the meantime the Counts of Portugal had declared their independance of Castille when Alfonso - Henry (1128 - 1178) elevated himself to King of Portugal in 1128. Within twenty years he extended the Portuguese Kingdom southwards to include Lisbon (1147). The rise of the Muwahhids in North Africa ('Abd al Mu'min : 524 - 558 : 1130 - 1163) deprived the Almoravids of their southern provinces and weakened their control of Spain where a short period of fragmented rule recurred during the 540's and 550's.

Minor Spanish Dynasties of the Post Almoravid Period
AH 538 - 555 : AD 1143 - 1160

The Muwahhids destroyed Almoravid power in North Africa during the years between 524 and 541 when the last Almoravid Amir was killed. But neither the Muwahhids nor the Christian kings immediately occupied former Almoravid possessions in Spain where a new, though short, period of fragmented rule supervened. Minor Moslem Amirates were established for a few years in Seville (Taifas Almoravids), Cordoba and Valencia. During the 540's and 550's these minor Amirates were overrun when the Muwahhids crossed over to Spain and established a realm centred on Seville.

The Muwahhids of North Africa and Spain and their successors
The Christian conquest of Spain

The founder of the Muwahhids (Almohades), Mohammed ibn Tumart, was an ascetic reforming Mahdi who led a mass movement in Morocco against the lax Almoravids. His deputy, 'Abd al Mu'min (524 - 558), established the Muwahhid realm, occupying Marrakesh from the Almoravids in 541 and settling Moslem Spain during the 540's. The Muwahhid realm, with a Spanish capital at Seville and a North Africn capital at Fas in Morocco, embraced the North African coast as far as Tripoli and Tunis. The major Spanish Christian Kingdom, Castille, was weakened at the time of the Muwahhid occupation by the death of Alfonso VII in 1157 and the ensuing partition of the realm between his two sons Sancho (Castille) and Ferdinand (Leon). This partition was followed by a period of strife between Portugal, Castille and Leon in which Navarre and Aragon were also involved. A subsequent descent on Algeciras by Alfonso VIII of Castille preceeded his defeat at the hands of Abu Yusuf Ya'qub, the Muwahhid in 1195 (591). A new Christian offensive by the combined forces of Castille, Navarre and Aragon resulted in the defeat of the Muwahhids at Las Navas de Tolosa in 1212 (609) and gave the Christians control over Andalusia. Definitive re-unification of Castille and Leon in the person of Ferdinand III (1230) added further strength and the surge of Christian conquest took Cordoba, Jaen and Seville (1248) for Castille, the Balearic Islands (1232-5) for Aragon and the Algarve for Portugal (Alfonso III: 1248-78). In 1252 Ferdinand, King of Castille and Leon, died at Seville, the former Muwahhid capital of Spain. The Muwahhids had meanwhile retired from Spain, leaving residual Islamic possessions, Granada and the southern coastline of Malaga and Almeria, in the hands of the Nasrids (629 - 897 : 1232 - 1492). It was not until a new period of political cohesion among the Christian Kingdoms was introduced by the unification of Castille and Aragon in 1479 under Ferdinand and Isabella that another campaign was mounted against Islam; a campaign that ended with the occupation of the Nasrid domains in 1492 (897). Meanwhile in North Africa the Muwahhids had begun to lose control of peripheral provinces soon after their expulsion from Spain in 629 (1232). Tripoli had already been occupied by the Ayyubids (Saladin : 567 : 1172), Tunis became independant under its Hafsid governor in 627 (1230) and Western Algeria followed under the Ziyanids in 633 (1236) who initially acknowledged Hafsid suzerainty. Then the Marinid tribesemen of Morocco descended and occupied that land (capital Fez), suppressing the Muwahhids in 668 (1269). When they were at their peak the Marinids conquered both the Ziyanids and the Hafsids on several occasions during the 8 th. century AH, but Tunisia. Algeria and Morocco continued under the separate rule of Hafsid, Ziyanid and Marinid Amirs until the decades around AD 1500 (AH 905). Growing power of the Ottomans, the Christian Kingdoms (primarily Spain) and the Corsairs combined with the decadence of the North African Amirates to lead, after many vicissitudes, to incorporation of the Hafsid (982) and Ziyanid (964) Amirates within the Ottoman Empire. Meanwhile Morocco had passed from the Marinids to their Berber kinsmen, the Wattasids, in 869 (1465).

Christian conquest of Valencia	636	1238

The Muwahhid currency reform

The Muwahhids introduced the Broad Gold Double Dinar that was to remain the basic unit of north-west African currency systems for the next millenium. Silver was also coined, but to a lesser extent, the silver unit being a dirhem of 1.5 grammes derived metrologically from Fatimid silver coinage. The weights of the various gold and silver denominations were as follows :-

	Broad Gold Double Dinar	Dinar	Half Dinar	Silver Dirhem
Muwahhids	4.7 grammes	2.35	1.2	1.5
Hafsids, Ziyanids, Marinids	4.6	2.3	1.15	1.5
Hasani Sharifs (Sa'adians)	4.6, declining to 3.8	pro rata	pro rata	Uncertain
Filali Sharifs	3.4 (= Benduqi)	--	--	c. 3 gm

Coinage of the Christian Spanish Kingdoms from the period of the Muluk Al Tuwaif until the unification of Spain

During the period of the Muluk al Tuwaif the Christian Kingdoms of the north consolidated their domains and began striking individual coin series. Gold coins struck by the Raymond Beranger of Barcelona and some struck by Alfonso VIII of Castille bore Arabic inscriptions but the billon deniers struck in most Kingdoms were more purely Christian in character. From the 1280's Portugal laid claim to part of Algeria.

Castille

Alfonso VI **1073 - 1109**

Billon Denier of Toledo

509 Obv. Cross : ΛΛFVS REX
Rev. Pax mgr. : TOLETVO
Toledo was captured by Alfonso in 1085

Alfonso VII **1126 - 1157**

AE Fals

510 - 511 Pseudo-Arabic inscriptions imitating those on Almoravid gold dinars
Obv. : ANF (?)
Rev. : date 1181 (= AD 1143)
NB. If the date is read according to the Christian era this issue should be attributed to Alfonso VIII (AD 1158 - 1214), but other dated coins of Alfonso VIII (both western and eastern style), bear their dates in the Spanish era of Saphar. The Spanish year 1181 was AD 1143. In that case the issue should be attributed to Alfonso VII.

Sancho IV **1204 - 1215**

Billon Denier of 'Castille & Leon'

512 Bust left : SANC REX
Castle : CA LEGIONIS
The castle was a popular motif

Ferdinand I **1230 - 1252**

Billon Denier of 'Castille & Leon'

513 Castle : F REX CASTEL
Lion : E LEGIONIS

Henry IV **1454 - 1475**

AR Real of Toledo

West European imitations of Islamic Coins

A) Gold

AV *Mancus*

527 Imitating Dinar of Late Cordoba Omayyad type

B) Silver

AR *Millares*

528 - 532 Imitating Muwahhid Dirhems
Note malformed characters

Such gold and silver coins were made of good quality metal and were acceptable alongside their prototypes in European trade (until forbidden by the Pope). Because of their crude form, in Islamic eyes, such coins were not welcomed in the Islamic world. A number of dinars, related to the issue shown above, bear the Latin name of Raymond Beranger I, Count of Barcelona (AD 1035 - 1076: Engel & Serrure p. 439). Later Almoravid style issues were struck by Alfonso VIII of Castille (AD 1158 - 1214) at Toledo - referred to in western literature as 'marabotin alfonsin'.

The Post - Abbasid dynasties of the West - Central Provinces

This heading, West-Central provinces, is used to indicate the western end of the Fertile Crescent (Syria & Egypt) together with such politically related regions as Crete, parts of North Africa, Sicily and the Arabian Penninsula. By AH 292 (AD 908) the Abbasids were ruling Egypt and Syria, which had reverted from the Tulunids to the Caliphate, but North Africa beyond Egypt was the domain of the Idrisids and the Aghlabids, which latter also ruled Sicily and Malta. The island of Crete had been indèpendant under its own line of Amirs since about 212 (827) and, in the south, the Yemen had assumed independance from the Caliphate under a line of Rassid Imams (280 : 893). This situation was modified by the rise of the Fatimids whose Emirate was created in the wake of another 'Alid revolt (297 : 909) led, this time, by a Fatimid Mahdi named 'Obaidallah. He suppressed the Aghlabids and established the Fatimid capital at Al Mahdiya near Tunis. In 314 'Obaidallah added the Idrisid homeland of Morocco and then, turning east, he took Egypt and southern Syria from the Ikhshidids in 358 (969) and later added Aleppo (381 : 991). The Fatimid capital was then moved from Al Mahdiya to the newly founded Egyptian city of Al Kahirah (Cairo), a shift in political balance away from the west that let the Normans take Sicily (1071), Malta (1098), Tripoli (1146) and Al Mahdiya (1148) though Fatimid control of Egypt and Syria remained un-affected until the rise of the Ayyubids (Saladin : 567 : 1171). The Fatimids also succeeded in maintaining a strong presence further south in the Hejaz.

The Ikhshidids, from whom the Fatimids took Egypt and southern Syria, ruled those provinces from 323 (935) until 358 (969) as virtually autonomous vassals of the Abbasid Caliph. The founder of the dynasty, Mohammed ibn Tughj al Ikhshid, member of a Turkish military family, had earlier been appointed governor of Egypt and had then assumed autonomy and added Syria to his domain (330). After the death of Mohammed ibn Tughj real power was vested in the hands of the Nubian slave-regent Kafur who later succeeded in making himsel Amir (355). Following Kafur's death in 357 the Ikhshidids presented little real resistance to Fatimid conquest (358).

Fatimid sovereignty over the Yemen was weakened by the rise of the Sulayhids who assumed independance in 439 under their religious leader 'Ali. During later years effective control passed into the hands of Al Sayyida Arwa, the wife of 'Ali's son Ahmad (459 - 477),. She was the effective ruler from the last years of Ahmad's life (c. 475) until her own death in 532 at the age of 92 years. Power then passed to the Zurayids who had originally been appointed governors of Aden in 476 by Al Mukarram Ahmad Sulayhi. Both the Sulayhids and the Zurayids admitted nominal Fatimid suzerainty. In 569 control of the Arabian Penninsula passed to the Ayyubid conquerors.

Fatimid un-attributed

Glass weights

576 - 580 The majority of Medieval Glass weights were struck by Fatimid Caliphs and they also appear to have been used for currency. Some weights were also struck by other Islamic dynasties (eg. Mamlukes: vide infa) and by the Byzantines.

The Normans in the South Mediterranean

Sicily had passed from the Byzantines to the Aghlabids during the 3 rd. century AH and had then formed part of the Fatimid domain from AH 297 (AD 909). The Normans conquered Sicily from the Fatimids. First, however, the Normans settled in southern Italy during the early 11 th. century AD, a region where the Lomabards were now decadent and where the authority of the Holy Roman Empire was weak. From footholds consolidated in Southern Italy the Normans invaded and occupied Sicily and from these two adjacent provinces evolved their Kingdom of the Two Sicilies. Norman coinage in Sicily commenced during the reign of Roger I (1072 - 1101) but the issues of Roger II (count : 1105 - 30. King : 1130 - 54) are some what more plentiful. The last coinage of this Kingdom, including some bilingual issues, was struck by Tancred (1189 - 1194). Southern Italy and Sicily were then occupied by the Holy Roman Emperor Henry VI, whose wife, Constance, was a daughter of the former Norman king of Sicily William II.

Post Abbasid Dynasties of the East Central Provinces

This heading has been used to indicate the eastern end of the Fertile Crescent; Mesopotamia and northern Syria, together with politically related parts of Eastern Turkey and Western Iran. During the fourth and fifth centuries of the Hijra various families of Arabs who had settled Mesopotamia and adjacent regions during the early Arab Diaspora assumed independance from the Abbasid Caliphs. Among the first families to carve out an independant Amirate were the Hamdanids, descended from the Arab tribe of Taghlib, who had settled around Mosul. One of their number, 'Abdallah ibn Hamdan, was appointed by the Caliph to govern Mosul in 292 (904) and other members of the same family received local governorships in the region. 'Abdallah's son Al Hasan, appointed governor of Mosul and Diyarbakr in 317 (929), assumed virtual sovereignty and was given the title 'Nasir al daulah' by the Caliph in 330 (941). His brother 'Ali was given the title 'Sayf al daulah' (330) and subsequently established himself in Aleppo which he conquered from the Ikhshidids (333). The deaths of these two brothers during the late 350's was followed by Hamdanid decline and the occupation of their lands by the Fatimids (Aleppo 394 : 1003) and by the Buyids (Mosul 369 : 979). East of the Hamdanids the mountains of Kurdistan, stretching down to Isfahan, were held by the Dulafids during the third century AH and above this Azerbaijan became the semi-autonomous Amirate of the Sajid family in 276 (889). The Sajid domain of Azerbaijan was expanded by Mohammed (276 - 288) and his brother Yusuf (288 - 315) to include Armenia and Rayy (Tehran). All these dynasts acted as virtually independant sovereigns within their own domains though they acknowledged the technical and religious authority of the Abbasid Caliph, often received their appointments from him and usually cited his name on their coins.

During the fourth century AH the political situation was modified by the rise of the Buyids, an indigenous mountain clan of Western Iran. Acknowledging first the Samanids and later the Ziyarids, the Buyid Amir 'Ali, governor of Karaj, extended the family domain from Dailam and Gilan on the Caspian, southwards to Isfahan and then to Shiraz (322 : 934) with the help of his two brothers Hasan and Ahmad. Ahmad then occupied Kirman in the east and returned westwards to Ahwaz. He subsequently moved northwards to occupy Bagdad in 334 (945) and there accepted titles bestowed on himself and his brother by the Caliph Al Mustakfi who was henceforth to be a Buyid puppet : 'Imad al daulah 'Ali; Mu'izz al daulah Ahmad and Rukn al daulah Hasan. Ahmad was also given the office of 'Amir al Umara' (Supreme Commander). For nearly a century the Buyids continued to rule Iraq and Western Iran as a con-dominion of provinces ruled by separate members of the family. Initially Ahmad retained Mesopotamia, Ali ruled Southwestern Iran (Fars) and Hasan was in the Jibal (Hamadan, Isfahan & Rayy). Eventually the disunity of the Buyid Amirate permitted its piecemeal dissection by Ghaznavids, Kakwayhids, Seljuks and others during the early 400's AH.

In Northern Mesopotamia the Hamdanids of Mosul had been suppressed by the Buyids of Iraq though Buyid influence in that northern region remained tenuous. Effective power thus passed to members of the Okaylid family (386 - 489) who had formerly acknowledged the Hamdanids and now paid nominal allegiance to the Buyids. Various branches of the Okaylid family governed such centres in Northern Mesopotamia and Eastern Turkey as Al Mosul, Al Jezirah, Nisibin, Hit and Takrit. Their influence even spread to Aleppo and Bagdad; the short lived Okaylid occupation of Aleppo being achieved at the expense of the Mirdasid family (414 - 472) who had ruled intermittently during intervals of freedom from Fatimid control. During the same period the Marwanids (372 - 478), a Kurdish family, ruled the Diyarbakr region of south-eastern Turkey and the Mazdyadids (c. 350 - 545) controlled the Hilla district of central Iraq. The disunity to which government had descended in Iraq, Syria and Eastern Turkey was brought to an end by the advent of the Seljuks who came from the east and entered Bagdad in 447 (1055 : Tughril Beg).

Kakweyhids of Kurdistan

The Kakweyhids came, like the Buyids, from the mountains of Western Iran. During the years around AH 400 they occupied parts of Southwestern Iran from the Buyids but were soon obliged to acknowledge the suzerainty of the Seljuks by whom they were subsequently suppressed.

Post Abbasid Coinage of the Eastern Provinces

Large tracts of Afghanistan and Transoxiana enjoyed local autonomy under the Tahirid Amirs (205 - 259) who, however, acknowledged themselves technically vassals of the Abbasid Caliphs. Various moves towards independance were also intermittently manifest in the South-west Afghan province of Seistan, a region that was given more definitive independance by Ya'qub ibn Al Layth al Saffar (the Coppersmith) in 254 (867). He was an erstwhile brigand who had risen to importance in the service of the local governor. During the next few years Ya'qub extended his sway over Herat, then occupied Fars (including Shiraz) and extended his suzerainty over Northern Afghanistan (Tokharestan and Balkh). He deprived the Tahirids of their remaining possessions (Nishapur) in 259 (872), went on to occupy Tabaristan from its 'Alid governors, and declared his independance from the Caliphate. Ya'qub died in 265 following a defeat at the hands of the Caliphal army and was succeeded by his brother 'Amr who retained control over Seistan, Fars and Kurdistan. A new power now appeared on the scene in Transoxiana in the form of the Samanids. The House of Saman originated at Balkh and rose to prominence when four brothers were rewarded for services to the Caliph Al Mamun by appointment to provincial governorships in 204 (819): Nuh ibn Asad received Samarkand, Ahmad received Ferghana, Yahya received Al Shash and Ilyas received Herat. Ahmad rose to dominance and added Samarkand to his own domain when Nuh died; he also conquered Kashgar. However, all members of the House of Saman remained loyal to their local sovereigns, the Tahirids. Ahmad's son Nasr succeeded his father as governor of Samarkand and its dependancies in 250 and later assumed independance in Transoxiana when the Tahirid Emirate was destroyed by the Saffarid uprising in 259 (872). This situation was recognised by the Caliph who confirmed Nasr in Transoxiana (261) and requested his assistance against the Saffarids whose advance westwards was threatening Bagdad. Nasr's brother Isma'il (279 - 295) defeated 'Amr the Saffarid in 287 and finally destroyed the pretensions of his grandson Tahir in 290 (903). This gave the Samanids control over Khorasan and Seistan. During the course of the next few years the Samanids also succeeded in conquering south-western Saffarid territories as far as Fars, provinces they were soon to lose to the Buyids (320 - 454). In the northwest the fall of the Saffarids gave their Samanid conquerors control of the south Caspian coastlands (Gurgan and Tabaristan) but these were soon to fall to the Ziyarids (315 - c. 483). After losing their western provinces to the Buyids and the Ziyarids the frontiers of the Samanid Emirate remained fairly stable. The Emirate suffered, however, from internal problems provoked by the importation of large numbers of Turkish slaves from the steppe lands of Central Asia; slaves who often rose to hold high offices, particularly in military circles. At the same time Provincial Governors in the Samanid Emirate tended to acquire steadily increasing power at the expense of Central Government. Benefitting from this situation one family of erstwhile Turkish slaves, the Ghaznavids, was able to establish a virtually autonomous south-east Afghan principality within the Samanid realm. From this foothold Mahmud of Ghazni was later able to establish his authority over the whole of Afghanistan (389) at the same time as the Ilak Khans (Qarakhanids), migrating from further east conquered the northern provinces of the Samanid Amirate (394).

Northern Persia had been lost to the Samanids when Mardawij ibn Ziyar (316 - 323) assumed independance and founded his Ziyarid Emirate based on the south Caspian provinces of Gurgan and Tabaristan, an emirate that initially extended southwards to include Hamadan and Isfahan. Mardawij assisted the Buyid rise to independance in Western Iran (320) but thereby forfieted his own western provinces. The Ziyarid Emirate, thenceforth restricted to the South Caspian provinces persisted until the rise of the Ghaznavids. During this time the capital, Jurjan, was more than once attacked by Viking traders making maritime raids across the Caspian.

Beyond the Afghan provinces of the Tahirids and the Saffarids lay the south-east Afghan plateau and, marching down the pass from Kandahar, the lowlands of Sind. Sind, the most distant province of the Abbasid Caliphate was administered by its own line of provincial governors. Although Sind lay beyond the Abbasid province of Seistan the most accessible route of communication, via Kandahar, lay through territory that never owed allegiance to the Caliphate. The south-east Afghan plateau was the Hephthalite Kingdom of Zabul, the last remnant of Hephthalite sovereignty in Afghanistan, a realm that metamorphosed into the realm of the Shahi kings who issued an extensive series of silver coins bearing 'Bull and Horseman' designs from about AD 750. Shahi issues bearing the name Spalapati Deva continue from Hephthalite series and, together with those bearing the name Khudavayaka, appear to have been struck in Afghanistan whereas Shahi issues inscribed Samanta Deva and Vakka Deva were probably all struck in Pakistan. The Afghan part of the Shahi realm (Kabul, Ghazni and perhaps Kandahar) was conquered by the Samanids soon after their definitive defeat of the Saffarids in 290. The Samanids continued issuing a scanty 'Bull and Horseman' coinage in this newly conquered province; some such coins bearing the name Khudavayaka with the additional Arabic word 'Adl (Just currency) and other coins bearing the name of the reigning Caliph Al Muqtadir (295 - 320). From 351 (962) this region, the south-east Afghan plateau was controlled by the Ghaznavids who continued to acknowledge nominal Samanid sovereignty until 389; some of their coins continued to bear traditional 'Bull and Horseman' designs.

Meanwhile Sind had also become an indepandant Emirate, an event that took place a few years after the rise of the Saffarids (254 : 867) made Caliphal supervision of this distant province impractical. The Amirs of Sind struck their own coinage during the period circa 257 to 400; the period between the Omayyad-Abbasid governors of Sind (AH 42 - 257), a line of governors whose names are known from dynastic lists but who do not appear to have struck their own coins, and the Ghaznavid occupation of Sind.

الوضی الحمد عبد الله و الطفر

Al Kohistani struck heavy dirhems at Nishapur in 267, 268 and 269 and at Herat in 268.

Banijurids (Abu Daudids)

The Banijurid family governed the Anderabah valley in the northern Hindu Kush, an important silver mining region, and sometimes extended their sway northwards over Balkh. Family allegiance changed from the Tahirids to the Saffarids in 259 and then from the Saffarids to the Samanids in 290. The overlord's name was often omitted from the coins

Ahmad ibn Mohammed ibn Ahmad **circa 270 - 310**

احمد بن محمد بن احمد

Fraehn and Markoff read the complete name as Ahmad ibn Mohammed ibn Yahya on Balkh dirhems of 295 and 297. This reading is possible on one of the coins cited below but 'Ahmad ibn Mohammed ibn Ahmad' is more likely.

AR *Dirhems (3 gm)*

Provincial governor Al Harith (obv) الحرث
الدرهم کوره بدخشان

677 Kura Badakhshan nd. (KB.2)
slightly modified bismillah الدرهم بکوره بدخشان

All Multiple Dirhems of Nuh ibn Nasr were struck at mints situated in Badakhshan province; the eastern end of the North Afghan plateau.

678 Al Ma'dan nd. (M.2) المعدن

679 Al Ma'dan nd. (M.3)

Multiple dirhems provided a peculiar form of local coinage in the provinces of the Hindu Kush during the 4th. century AH. At this time the Samanid realm was suffering from the economic problem that much of its silver, mainly in the form of coined dirhems, was being exported westwards to end up in Viking lands where many hoards have been found (vide infra). This factor stimulated exploitation of silver mines within the Samanid realm and the most important of these were situated at Panjhir and other sites in the Hindu Kush. These large silver coins of indifferent quality appear to have provided a means whereby newly mined silver was rapidly converted into a readily utilisable form. The earliest Multiple Dirhems, struck during the 320's AH for the Samanid Amir Nasr ibn Ahmad, are intermediate in weight and general form between normal issues and the fully evolved Multiple Dirhems of Nuh ibn Nasr's reign. Two of these early issues bear the names of local Turkish governors, Balkategin (AH 320 - 326: KS 1: coin 672) and Qarategin (AH 326 - 330: KS 2).

723 Kura Badakhshan, nd. (KB 16) كوره بدخشان
rev. marginal inscription modified
The most commonly used reverse design

Mint organisation in Badakhshan province.
Activity at the various mints in this province was controlled by a monopoly in the engraving of reverse dies which were distributed from the chief mint (Kura Badakhshan). Most reverse designs are common to all mints in the province, apart from a small number specific to Kura Badakhshan, and there are reverse die links between many coins struck at different mints; apparently because copies (reproduced by hubbing) of the official master die were despatched from

724 Kura Badakhshan, nd. (KB 19)
Gov. Al Harith ibn Harb also cited round obv.

Kura Badakhshan to the various secondary mints. Obverse dies, on the other hand, appear to have been engraved locally and show a wide range of style and technical ability. The three chief mints at Kura Badakhshan, Al Ma'dan and Kishm produced dies of reasonable quality but lesser mints that can be provisionally linked with the towns of Zaybak and Yumgan in the eastern part of the province combined standard official reverse dies with local obverse dies whose quality verges on barbarous.

725 Kura Badakhshan, nd. (KB 20) كوره بدخشان
Simjurid gov: of Khorasan Al Wali Mohammed
cited in obv. field الولي محمد

A range of minor varieties of this reverse type are shown by the coins of Kura Badakhshan presented here. Coins from the other mints in this province are shown with the commonest variant of this standard design. All coins were struck from official replicas of the reverse Master die engraved at Kura Badakhshan and distributed from there to the various mints. Note the reverse die links.

726 Kura Badakhshan, nd. (KB 26)

'Ubaid (prob. Abu 'Ali) عبيد
Neither Caliph, Samanid nor Ghaznavid cited : an omission consistent with the adoption of the Shi'ite form of Kalima by a local dignitary wishing to express his own importance. (Bull. Soc. Fr. de Num. 1974)

Samanid - Ghaznavid coinage of N. Afghanistan

During the years 384 to 389 the Ghaznavids were in effective control of Northern Afghanistan but still acknowledged Samanid suzerainty. Sayf al daulah Mahmud ibn Sebuktegin of Ghazni was Governor of Khorasan for the Samanid Amir Nuh ibn Mansur and his successor Mansur ibn Nuh. Most North Afghan coins of this period, 384 - 389, bear the name of either Nuh or Mansur alongside that of Mahmud: a few bear Sebuktegin's name, having been struck during his north Afghan campaign of 384. Other scarce issues were struck in the name of Bektuzun who was Governor of Khorasan for a few months during 387 and Ism'il ibn Sebuktegin who was in conflict with his brother Mahmud following their father's death in 387.

The Ghaznavids 351 - 583

The Ghaznavids, originally Turkish slaves of the Samanids, established themselves around Ghazni in SE. Afghanistan from the mid 4th. century and grew increasingly powerful under the leadership of Sebuktegin and his son Mahmud until they were able to replace their erstwhile Samanid masters as the sovereigns of Afghanistan. Mahmud later made substantial conquests in what is now Pakistan, from Sind to Peshawar, and later campaigned as far as Mathura. The western provinces of the Ghaznavids were lost to the Seljuks during the 420's and 430's and later remaining Afghan provinces became the domain of the Ghorids (556 : 1161). Shortly after this Mohammed ibn Sam Ghori occupied NW. India.

The Ayyubid - Seljuq Period

The Ayyubids

The Ayyubid dynasty was founded in AH 564 (AD 1169) by one of its best known rulers, Al Nasir Salah al din Yusuf ibn Ayyub, the Saladin who was in combat with Richard I of England. Saladin, a Kurdish general of Mahmud ibn Zangi (Syria), had earlier annexed Egypt from the Fatimids on behalf of his master. He than declared his independance in Egypt during 564 and later annexed Syria in 570 on the death of his erstwhile Zangid master. The Ayyubid realm was divided on Saladin's death among his numerous relatives. However, one of Saladin's brothers, Al 'Adil, gradually acquired overal supremacy which he enjoyed until his own death in 615. Thereafter the Ayyubid realm was again sub-divided, this time among the offspring of Al 'Adil. The main groups of Ayyubids were those of Egypt, Damascus, Aleppo and Mesopotamia (Mayafarikin) but there were lesser branches established in Hamah, Hims and the Yemen. Ayyubid coinage, struck in gold, silver and copper, tended to adopt regionally distinctive designs; the hexagonal frames of Aleppo silver coins and the pictorial designs of Mayafarikin copper issues being two examples. During the 7 th. century AH north-eastern Ayyubid provinces (Mayafarikin, Damascus, Aleppo) passed to the Mongols while the south-western provinces (Egypt, Hamah, Hims) were taken over by erstwhile Ayyubid slaves, the Mamlukes.

The Seljuqs

The Seljuqs were Turks from Central Asia who settled among the Ilak Khans (Qarakhanids: infra) of the Bokhara region where they embraced Islam. In 429 the Seljuqs crossed the river Oxus and occupied Northern Afghanistan where the first 'Great Seljuq' Amir Tughril Beg was proclaimed at Nishapur, the chief city of Khorasan. Tughril Beg progressively expanded his realm towards the west until the time when he was proclaimed Sultan in Bagdad during 447 (AD 1055). During the later decades of the 5 th. century AH the extensive Seljuq Empire was weakened by partition among separate sub-divisions of the Seljuq family, still nominally subject to the 'Great Seljuq' whose real authority was only effective in the eastern province of Khorasan.

The Ilak Khans (Qarakhanids) AH 315 - 607

The Ilak Khans expanded westwards from their homeland around Kashgar, along the northern foothills of the Pamirs and occupied Samanid provinces lying to the north of the River Oxus at the end of the 4 th. century AH. This was a time when the Ghaznavids were in the process of occupying the southern Samanid provinces. During later years the Ilak Khans were sovereigns of the Seljuqs until the period of Seljuq expansion. The Trans-oxine realm of the Ilak Khans was only supplanted during the later years of the 6 th. century AH by a family of erstwhile Seljuq vassals, the Khwarezmshahs. A scanty coinage of silver dirhems based on Samanid prototypes struck at mints from Bokhara eastwards since the 390's evolved to the broad flan, billon dirhems of the 6 th. century that were to be copied by the Khwarezmshahs.

The Khwarezm Shahs

The Khwarezm Shahs were originally appointed as local governors by the Seljuqs but they acquired their independance when the 'Great Seljuqs' grew weak. The Khwarezm Shahs expanded their suzerainty over the Trans-oxine provinces at the expense of the Ilak Khans and over Northern Afghanistan at the expense of the Great Seljuqs. The Khwarezmshah Atsiz revolted against the Great Seljuq Sinjar in 533 and following an initial exile was able to regain autonomy and establish his rule over lands situated between the Oxus and Jaxartes rivers. Later, Tekesh occupied Khorasan and much of Iran, conquests consolidated by his son 'Ala al din Mohammed. After their brief period of prosperity the realm of the Khwarezmshahs was incorporated into the Mongol realm of Genghiz Khan (617). The final Khwarezmshah, Jalal al din Mangbarni, merely held scattered provinces for short periods; North-western Pakistan (617-21), where his billon coinage was struck following expulsion from Khwarezm by Genghiz Khan and later Azerbaijan (622-28).

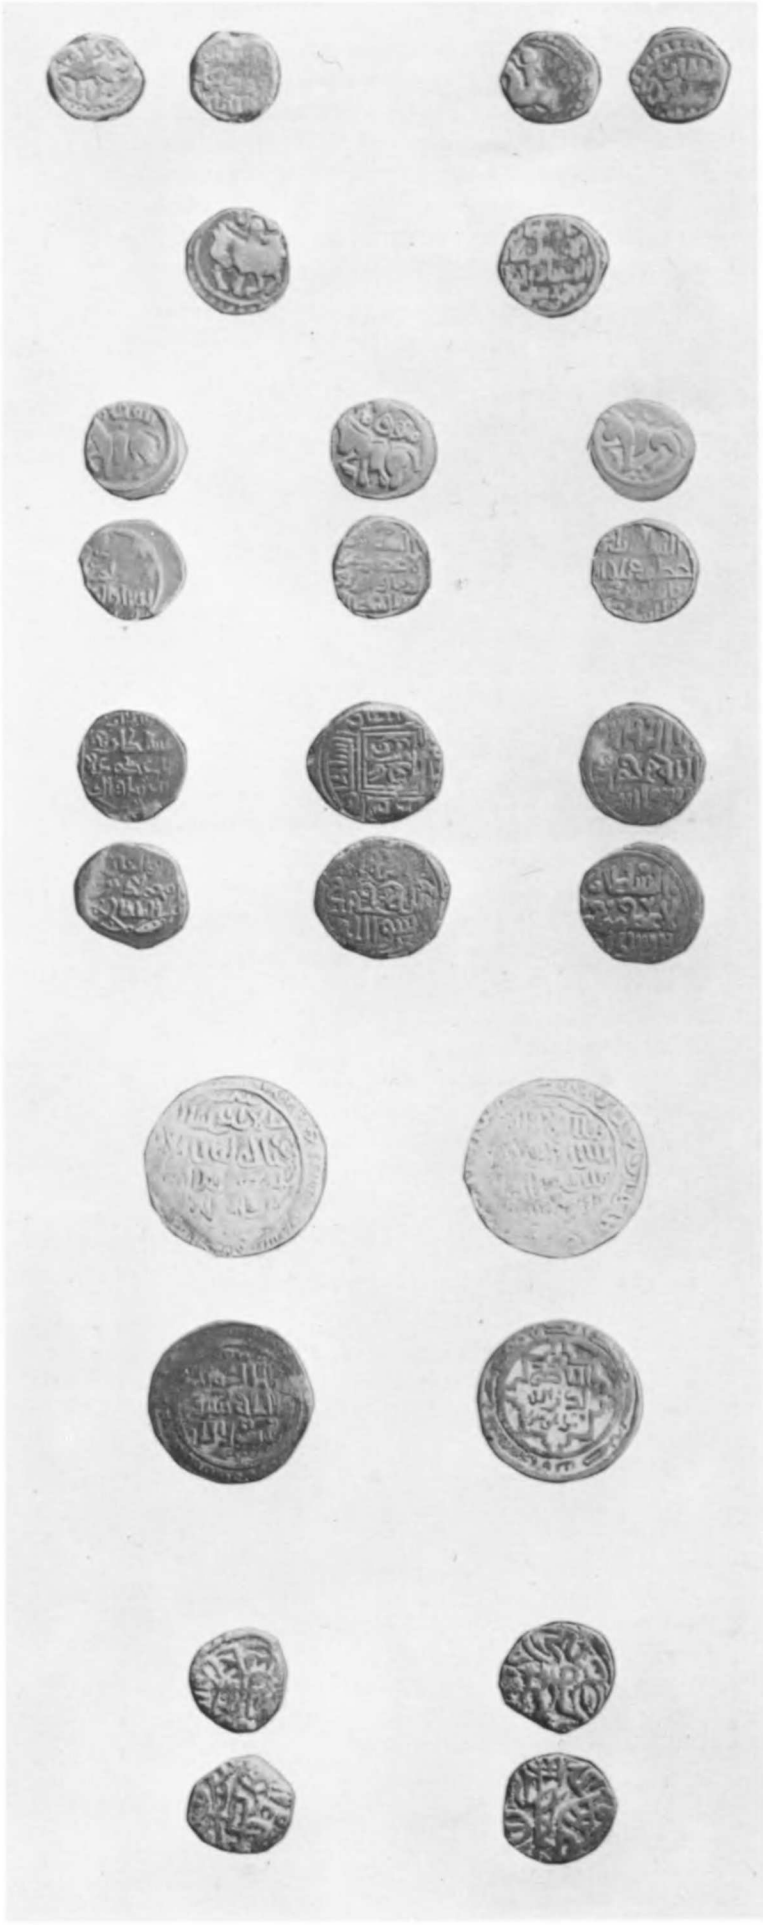
Horseman with 'Sri Hamirah' above

After Genghiz Khan's conquest of most Khwarezmshahi lands Jalal al din succeeded in occupying the Kurram valley of north-west Pakistan during the years 619 - 621 until he was expelled by Iltutmish, Sultan of Delhi.



The Ghorids

The rulers of Ghor, in the mountains east of Herat, asserted their independance from the Ghaznavids when 'Ala al din Hosayn Jahansah (544 - 556) revolted, consolidated a realm and then sacked Ghazni in 550. The Ghorid dynasty is, however, best known from the exploits of Hosayn's nephew Shihab al din Mu'izz al din Mohammed ibn Sam Ghori who was appointed to rule the province of Ghazna in 569 (1173). Mohammed later conquered much of northern India and established the Delhi Sultanate, dying in 602 (vide infra). With the death of Mohammed ibn Sam Ghor, like Ghazni and Kurraman, became independant of the Delhi Sultanate.Ghor passed, like Ghazni, to 'Ala al din Mohammed the Khwarezmshah in 612 and a few years later these provinces became part of Genghiz Khan's Mongol Empire (617).

These are Afghan (Ghorid) type coins of Mohammed ibn Sam acknowledging his elder brother's suzerainty. For Mohammed ibn Sam's other issues vide infra (Sultans of Delhi).

On the death of Mohammed ibn Sam in 602 this province of the Delhi Sultanate became the domain of Taj al din Yildiz and remained so until his death in AH 611 (AD 1214). The region was then occupied by 'Ala al din Mohammed of Khwarezm and subsequently fell, together with the rest of Afghanistan, to Genghiz Khan in 617. With the fragmentation of the Mongol realm Ghazni became the appanage of the Jagatai, one of whose rulers, Kutlugh Khwaja, was to beseige Delhi in 697 - 8 (infra).

The Kurram valley of North-east Pakistan formed part of the Delhi Sultanate founded by Mohammed ibn Sam (569 - 602). On his death Nasir al din Qubacha and Taj al din Yildiz acquired the provinces of the north-west frontier region. Yildiz established his seat at Ghazni but for a while exerted some authority in Kurraman and Peshawar while Qubacha acquired Sind and then established his seat in Kurraman. Ghazni passed to 'Ala al din of Khwarezm on the death of Yildiz in 611 but Kurraman remained in the hands of Qubacha, despite a set-back at the hands of Iltutmish, Sultan of Delhi, until the region was conquered by the Mongol Genghiz Khan in 617. Genghiz Khan struck a few coins in Kurraman before losing the province to the last Khwarezmshah Jalal al din Mangbarni who ruled there from 619 till 621. Another campaign by Iltutmish brought Kurraman once again within the Delhi Sultanate (621) and Jalal al din fled to Azerbaijan. A few years later Kurraman again became an independant Sultanate when Sayf al din Hasan Qarlugh, appointed governor of Ghazni by Raziya, Sultana of Delhi (634 - 7) in 636, asserted his independance. Hasan Qarlugh was killed beseiging Multan in 646 and succeeded by his son Mohammed (647-58)

The Seljuqs of Rum

The Seljuq Sultanate of Rum (Asia Minor) was founded by Suleiman I in AH 470 (AD 1077) as one of the autonomous fragments into which the original 'Great Seljuq' realm split. The Rum Sultanate, focussed on the Anatolian centre of Konya, was substantially augmented by incorporation of the Danishmendid realm (Siwas etc.) in 570. The Rum Sultanate was the longest surviving relic of Seljuq expansion and only succumbed to the rise of the Ottoman Turks and the Mongols at the end of the 7 th. century AH (13 th. century AD).

Byzantine Folles countermarked in northern Mesopotamia during the 6 th. century AH

A relative shortage of copper coinage during this period was remedied by the use of Byzantine copper folles which were often countermarked by local Islamic Amirs. Such large denomination copper coinage proving popular a number of Amirates, such as Urtukids of Maridin, began striking their own copper dirhems. Most Islamic countermarks on Byzantine folles consist of a single word and can only be attributed in a general way to the issuing authority. The words "Atabeg", "Shams" and "Ilah" could be given a number of possible attributions but the name "Jamal al din Mahmud" identifies one issue as having been struck by an Inalid Amir of Diyarbakr (vide infra) and the name "Nejm" is likely to have been stamped for Nejm al din Alpi of Maridin.

Urtukids and Atabegs

The Seljuqs ruled their domains through the intermediary of Turkish military governors. As Seljuq authority weakened these military governors (Atabegs) acquired increasing authority and eventually independance; so giving rise to various dynasties of Urtukids and Atabegs who ruled most of Mesopotamia and adjacent regions in the wake of the Seljuqs. Urtuk, a Turkoman officer in the Seljuq army, was appointed Governor of Jerusalem, a position to which his two sons Sukman and Eel-Ghazi succeeded during the years 484 - 489 (AD 1091 - 6) until they were expelled by the Fatimid occupation of Jerusalem. Eel-Ghazi was later appointed Seljuq prefect of Bagdad (495) and Sukman became Governor of Hisn Keyfa (495) and also of Maridin (496/7). In 502 Eel-Ghazi became Governor of Maridin while Sukman retained Hisn Keyfa. The two lines of Urtukids were now established.

The Urtukids of Maridin — AH 502 - 811 / AD 1108 - 1408

This was the longest lived Amirate, powerful from the time of its creation until the rise of the Ayyubids. The founder Eel-Ghazi amplified his original charge of Maridin by the conquest of Aleppo from the Crusaders in 511 (1117) and was subsequently given Mayafarikin (515) by his Seljuq overlord Mohammed. Aleppo soon passed to another branch of the Urtukids (518) but Maridin and Mayafarikin remained with this branch of the Urtukids until the Ayyubid conquests of Saladin and Al 'Adil deprived them of Mayafarikin in 580. The weakened Urtukid principality of Maridin was later forced to admit the suzerainty of the Persian Mongol Hulagu and was finally absorbed by the Kara Koyunlu Turkomans in 811.

Urtukids of Hisn Keyfa and Amid 495 - 639

This principality was founded in 495 when Sukman was appointed Governor of Hisn Keyfa. From 496/7 until 502 he also governed Maridin until his brother Eel Ghazi was appointed to Maridin. The district of Amid was added to the principality by Saladin in 579 when his suzerainty was acknowledged. Later Saladin's nephew Al Kamil Mohammed suppressed the Urtukid principality of Hisn Keyfa and Amid in 629.

The Zangids

'Imad al din Zangi was son of a Turkish slave named Aksunkur who was Chamberlain to the Great Seljuq Malik Shah (465-485). Zangi himself was appointed Governor (Atabeg) of Iraq in 521 and extended his sway over Mosul, Sinjar, Jezira, Harran and Aleppo during the course of a year. When Zangi died in 541 (AD 1146) his domain was divided between two sons, Sayf al din Ghazi (Mosul and Mesopotamia) and Nur al din Mahmud (Syria).

The Zangids of Mosul **AH 521 - 660**

The Zangids of Mosul were the more important of the two lines that sprang from 'Imad al din Zangi who had conquered this region in 521 (1127). His descendants ruled there until 631 when their line was supplanted by Badr al din Lulu, a slave (vizir) who usurped the sovereignty and passed it on to his son Isma'il. In his turn Isma'il lost the realm to the Mongols in 660.

The Zangids of Aleppo AH 521 - 577

The Zangids (Atabegs) of Aleppo (Syria) were the lesser of the two branches founded by 'Imad al din Zangi in 521. Zangi's son Mahmud and his grandson Isma'il succeeded to this province. On Isma'il's death in 577 the domain was partitioned between the Zangids of Mosul and those of Sinjar. Then in 579 much of Syria, including Aleppo, was occupied by the Ayyubid Saladin.

The Zangids of Sinjar AH 566 - 617

The Zangid principality of Sinjar was founded by one of the three sons of Kutb al din Modud (544-565) of Mosul. The other two sons, Ghazi and Mas'aud, succeeded their father in Mosul but Zangi ibn Modud established himself at Sinjar in 566 and augmented his domain on the death of Isma'il, the Zangid of Aleppo in 577. The principality suffered from the rising power of the Ayyubids and eventually passed to them in 617.

The Zangids of Al Jezirah AH 576 - 648

The Al Jezirah principality was established by a son of Sayf al din Ghazi, the fourth Zangid of Mosul. Like its neighbours the Al Jezirah principality succumbed to Ayyubid expansion, being incorporated during AH 648.

The Burids : Atabegs of Damascus AH 497 - 549

This principality was founded by Tughtigin, a former official of the Syrian Seljuq Tutush and subsequently an Atabeg (Governor) for Tutush's son Duqaq whom he succeeded at Damascus in 497. This principality was incorporated by the Zangids of Aleppo.

The Bektiginids : Atabegs of Arbela AH 539 - 630

Zain al din 'Ali Kuchuk, son of Begtigin, was a Turkish officer of 'Imad al din Zangi, appointed viceroy of Mosul in 539 (1144). 'Ali was later given additional charge of Sinjar (544), Harran, Takrit and Irbil (Arbela). When 'Ali died (563) Irbil passed to his younger son Yusuf (563-68) while Harran became the charge of his elder son Kukburi who later acquired Irbil when Yusuf died in 586. By this time Saladin, the Ayyubid, was the chief power in the area. He left Kukburi in control of Irbil until his death in 630 but placed his own nephew 'Omar in charge of Harran.

The Begtimurids : Atabegs of Armenia AH 493 - 604

A dynasty of Shahs of Armenia, arising from Sukman Al Kutbi, former slave of a Seljuq governor, ruled the region focussed on Khalat from 493 until 579 when power passed into the hands of Sayf al din Begtimur, erstwhile slave of the previous ruler. Thereafter, Armenia was ruled by members of both families until subjugated by the Ayyubids in 604 (AD 1207).

The Ildegezids : Atabegs of Azerbaijan AH 531 - 622

Ildegiz, a Turkish slave, was granted the governorship of Azerbaijan by his master, Mas'aud the Seljuq of Iraq. The principality later succumbed to expansion of the Khwarezmian realm during the reign of 'Ala al din Khwarezmshah and was finally suppressed when the latter's son Jalal al din Mangbarni occupied Azerbaijan in 622.

The Bawandids of the South Caspian Coastlands

The relatively isolated southern coastlands and mountainous hinterland of the south Caspian region was conquered from the Ispahbads of Tabaristan by the Abbasids and remained subject to the Caliphate, administered by a succession of provincial governors. The Bawandid family, whose representatives had retained some authority in the mountains, re-asserted their territorial claims when Abbasid authority grew weak (as also did a family of 'Alids: 250-316) and governed Tabaristan until the advent of the Seljuqs, often under the suzerainty of more powerful neighbours such as the Ziyarids (with whom they inter-married). When the Great Seljuqs grew weak and their realm fragmented a second dynasty of Bawandids regained control of Tabaristan, initially acknowledging Seljuq suzerainty. They were suppressed by 'Ala al din Khwarezmshah but soon after the death of his Mongol conqueror Genghiz Khan a third and final dynasty of the Bawandid family governed Tabaristan, this time as Mongol vassals.

The Mamluke - Ottoman Period

The Mamlukes

The Mamlukes were slaves of the Ayyubids who dispossessed their masters during the 640's AH when Queen Shajar al Dur, widow of Al Salih Ayyub (637 - 647) declared her autonomy in 648, subject to her nominal puppet, the last Ayyubid of Egypt Al Ashraf Musa (648 - 650). Stable Mamluke government was maintained in Egypt and Syria by successive Bahri (of the River) and Burji (of the Fort) dynasties of Mamlukes until they were extinguished by the Ottomans in 922 (AD 1517); stability despite frequent dynastic crises.

The Turkish Muluk al Tuwaif

These minor dynasties ruled fragments of Turkey in the wake of the Byzantines and the Seljuqs until such time as they were incorporated by one of their number, the Othmanlis (Ottomans). The most important factor precipitating the birth of these states was subjugation of the Seljuqs by the Ilkhan Mongols of Persia. Ilkhan hold over its Turkish posessions was never firm and the void left by the demise of the Seljuqs left the way clear for minor local dynasties to assert their autonomy. Most principalities arose during the years around 690, though the Karaman had asserted their independance some decades earlier (c. 654-792 : 805-888). Minor dynasties included the Karasi of Mysia (c. 700-737), the Hamid of Pisidia (700-783), the Karmiyan of Phrygia (700-792 : 805-832), the Takka of Lycia (c. 700-792 : 805-832), the Saruhan (713-792 : 805-813) and the Aydin (700-792 : 805-829), both of Lydia, the Mentesha of Caria (700-792 : 805-829) the Isfendiarids of Paphlagonia (690-795 : 805-864) and the Eretnids of Erzinjan (736-782). Many of these minor principalities were suppressed by the Ottomans during the 790's but restored by Timur in 805 following his conquests of the previous year. Definitive suppression by the Ottomans was achieved during ensuing decades.

The Ottoman Turks (Othmanlis)

The Ottoman clan of Oghuz Turks migrated westwards from their homeland on the Eastern coastlands of the Caspian Sea at the time of the Mongol expansion and settled among the Seljuqs of Rum in Phrygia. 'Othman was born there in 656 (AD 1258) and later asserted the independance of his people in 699 during the period of Seljuq subjection to the Ilkhans. His son Urkhan occupied Bursa and Nicaea from the Byzantines and subjugated the neighbouring state of the Karasi (Mysia). Towards the end of his reign Urkhan established a foothold in Europe (Gallipoli). Murad continued this expansion, occupying the principality of Hamid in Pisidia and Byzantine possessions in Thrace, together with the Kingdom of Bulgaria and part of Serbia. During the 790's (1390's AD) Bayazid subdued all the remaining minor Anatolian principalities but his defeat at Ankara by Timur in 804 (AD 1402) led to the restoration of most of these principalities by Timur (805). The Ottoman realm was consolidated again by Mohammed (816-824 : 1413-21) and Murad II (824-848 : 1421-44) who re-asserted Ottoman supremacy over the minor Anatolian principalities and over former Ottoman conquests in Europe (Battle of Varna 848 : 1444). During the next few decades Ottoman power was further augmented by the demise of the Byzantine Empire when they captured Constantinople in 857 (1453) and by their occupation of Trebizond a few years later (867 : 1462). The Ottomans also established a foothold across the Black Sea, in the Crimea, domain of the Khans of Krim, where the Genoese now found their trading position (Colony of Caffa) untenable. Pursuing campaigns beyond Turkey to the south, the Ottomans extended their supremacy over the Mamluke domains of Syria and Egypt (922 : 1517) whence they pushed on to secure their foothold in the Arabian Penninsula (including Mecca) and the Yemen which had only recently been conquered by the Mamlukes. The Ottomans also acquired much of the North African coastline (Algiers 1519, Tunis 1568, Tripoli 1551) as far as a frontier with Morocco, though their sovereignty in these distant regions was long contested (Hafsids not suppressed until 982 : 1574 and Ziyanids until 964 : 1556). During the same period the Crusader principalities were expelled from Greece and most of the Aegean Islands and a more northerly campaign up the Danube gave the Ottomans control of Hungary. The reign of Suleiman I, the Great (the Magnificent: 926-974 : 1520-66) marked the apogee of the Ottoman Empire which now extended from Budapest to Mecca and from Mesopotamia to the borders of Morocco. These frontiers remained fairly stable for a century during which time the Island of Cyprus was acquired in 979 (1571) and Moldavia on the north coast of the Black Sea was occupied in 1077 (1666). Turkish military defeats in Europe during the 1680's and 1690's permitted Hungary and Transylvania to regain treir independance while the distant North African provinces of Algeria (1070 : 1659 : Deys) and Tunisia (1117 : 1705 : Beys) became semi-autonomous although remaining in nominal allegiance to Turkey until the 19 th. century. During the 18 th. century the rise of Russian power deprived Turkey of her possessions on the north coast of the Black Sea; the Russians acquired Ottoman possessions in the Crimea, extinguishing the Khanate of Krim in 1197 (1783). Turkish possessions in Europe were lost during the 19 th. century. Greece became independant in 1828, the lower Danube became Roumania in 1866 and Serbia acquired its independance during the following year (1867). Re-arrangments in the 1878 Treaty of Berlin included the creation of further independant principalities in Bulgaria and Montenegro: Turkish possessions in Europe were now virtually restricted to Thrace. Meanwhile Turkey was also deprived on her North African possessions as semi-autonomous Algiers (1830) and Tunis (1881) passed into French hands and Egypt, semi-autonomous under its Khedives since 1805 (1220), was occupied by the British (1883) who also acquired Cyprus (1878 Treaty of Berlin). Removal of Asiatic provinces after the First World War (the new states of Iraq, Syria, Transjordan and Palestine) left Turkey with frontiers comparable to those of the modern Republic (established 1922-4).

Turkish Silver denominations : -

To the silver unit of early Turkish coinage, the Akche, was added a larger coin, the Para. This was initially valued at four akches, but later devalued to three akches. The system was then amplified by the addition of two large denominations, the Zolota of 30 paras bearing inscriptional designs and weighing 19.3 grammes and the Kurus (Piastre) of 40 paras bearing a Toughra on one side and weighing 26 grammes. Slow devaluation occurred but the system remained fairly stable until the accession of Mahmud II in 1223 (AD 1808).

Debasement in Egypt tended to follow that in Turkey. This particular issue was used as prototype for the later coinage of Darfur Sultanate (vide infra).

For further details of the numismatic complexities associated with rapid inflation during the reign of Mahmud II see studies cited in references below. In Turkey the system was rationalised by the reform of 'Abd al Mejid's 6th. regnal year. Coinage of the N. African provinces evolved along individual lines as these regions moved politically away from Turkey.

Shortage of small change during the late Ottoman period was remedied in a number of places by re-validating obsolete Ottoman copper coins. Re-validation was signified by the application of countermarks by local municipal and ecclesiastical authorities. Two of the major groups of identified countermarks were applied at villages on the islands of Thasos and Lesbos (Mytilene). For further discussion see K. M. MacKenzie and S. Lachman, Countermarks of the Ottoman Empire 1880 - 1922 .

Post Ottoman Coin Series

Egypt

Egypt was administered on behalf of the Turkish Sultan by a succession of Khedives (title adopted by Isma'il Pasha in 1284 / 1867) from 1805 when Mohammed 'Ali Pasha expelled Napoleon until termination of nominal Turkish suzerainty in 1916. In practice the Khedives were virtually autonomous until they submitted to British Protectorate in 1882 (1299). Turkish coin forms were replaced by a reformed currency bearing inscriptional types in 1917 and after British Protectorate ended in 1922 Ahmad Fuad I (1917 - 36 : 1335 - 55) adopted the title king (1922) and placed his own bust on coins (from 1923).

Tunisia

Tunis was administered by its Beys under a form of Turkish suzerainty that was, to an increasing extent, nominal rather than real, until 1881 when the French established their Protectorate. The Turkish style currency (vide supra) was reformed in 1847 (1263) and after 1855 (1271) coins bore the Bey's name alongside that of his Turkish suzerain. From 1881 (1299) only the Bey's name appeared on coins and in 1891 (1308) French legends were added.

Sudan

The Sudan had been incorporated by Mohammed 'Ali Pasha (1805 - 1848) within the Khedival province of Egypt. The Sudan assumed independance under the leadership of the Mahdi in 1881, when the British were establishing their protectorate over Egypt. Sudanese independance was finally lost to the Anglo-Egyptian expedition of 1896 - 8.

Darfur

Sultan 'Ali Dinar created the Sultanate of Darfur in the Western Sudan at the time when the Anglo-Egyptian expedition was in the process of suppressing the Sudanese realm of the Khalifa 'Abdallah. The coins of Sultan 'Ali Dinar were inspired by the Egyptian twenty para (½ piastre) of AH 1223 (vide supra). Coins were struck at the mint of Al Fasher from 1908 to 1914 but the first prolific issue was struck in 1327 (AD 1909) and that date remained fossillised on all later coins.

Sultan 'Ali Dinar — **1314 - 1335 : 1896 - 1916**

Billon Piastre (1.9 gm)

1353 Al Fasher AH 1327 — الفاشر ١٣٢٧
Toughra: 'Ali Dinar' — علي دينار
(vide A.J. Arkell NC. XIX)

Members of the dynasty to which 'Ali Dinar belonged had controlled the Darfur region of the Sudan for some three centuries, since their line was established by Suleiman Solon in AH 1004.

The Sharifs of Morocco — from AH 951

The Sharifs were two families of Berbers claiming descent from Al Hasan, a grandson of the Prophet Mohammed. The Hasani Sharifs, also known as the Sa'dians, rose to prominance in Morocco during the 10 th. century AH (16 th. century AD) when the authority of the Wattasids grew weak. Mohammed I consolidated his position around Sous in southern Morocco. Further conquests enabled his son Mohammed II to proclaim himself sovereign in 951 (AD 1544), a declaration consolidated by expulsion of the Wattasids from Fez in 956 (AD 1549), a Sa'dian victory that marked the final suppression of the Wattasid dynasty. Within a few decades the Sa'dian realm reached its greatest extent under Ahmad I (986-1012) whose successes included expulsion of the Portuguese and the occupation of Timbuctu. Rivalry between Ahmad's sons led to a period of anarchy during which a new line of Sharifs belonging to the Filali family who had controlled the Tafilalt district of eastern Morocco since the 1040's, rose to power under the leadership of Al Rashid (1075-82) and succeeded in re-constituting the realm. Another period of anarchy during the 19 th. century AD, aggravated by defeats at the hands of the French and the Spanish, culminated in the establishment of French Protectorate in 1912 (AH 1330).

Southern Arabia and East Africa from the 12 th. century AD

The East African Sultanates of Kilwa and Zanzibar — circa AD 1200 - 1350

Trade between the Rhodesian (copper mines) region of Africa and Moslem countries was active from the 9 th. century AD and led to the foundation of several Moslem Sultanates along the East African coast. The Sultanate of Kilwa was based on the coastal site at Kilwa Kasiwani in Tanganyika, some 200 miles south of Zanzibar, and on the Island of Mafia about one hundred miles further north. The Kilwa Sultanate flourished during the century and a half from AD 1200 until 1350 and was visited by Ibn Battuta in 1331, during the reign of Al Hasan ibn Suleiman. The Sultanate of Zanzibar was powerful during the same period. Both Sultanates were later overshadowed by more northerly trading stations (eg. Mombasa) and by the coming of the Portuguese who established their first trading post at Mozambique in 1505 and another at Mombasa in 1590.

The East African Sultanates of Mogadishu and Harar — circa AD 1200 - 1886
The Kingdom of Ethiopia — from AD 1886

Mogadishu in Somalia and Kilwa in Tanzania were the chief Islamic cities on the East African coast from about AD 1200. The early coins of Mogadishu are sometimes found in Kilwa and vice versa. After Kilwa's decline around 1350 the more northerly Sultanate of Mogadishu remained powerful and some of its late coinage adopted the Toughra design from new northern neighbours, the Ottoman Turks. Inland from Mogadishu a new Sultanate arose at Harar in Eastern Ethiopia in 1520. During later years Mogadishu became a dependancy of the Sultans of Oman and Zanzibar during the reign of Sayyid Sa'id ibn Sultan (1220 - 1273 : 1806 - 1856) and not long afterwards Harar became part of the new Ethiopian kingdom in 1886.

The Arabian Penninsula : AD 1173 to 1872

The Yemen lost its independance to the Ayyubids when the region was conquered by Saladin in AH 569 (AD 1173) and it was ruled by its own succession of Ayyubid dynasts until AH 625 when independance returned in the form of the Rasulid Imams (AH 626 - 858) and their Tahirid (AH 850 - 923) successors. Then another conquest from the north brought Yemen within the Mamluke realm of Kansuh Al Ghori in 921/2. When the Ottoman Turk Selim I (918 - 926) defeated the Mamlukes in 923 (AD 1517) Turkish suzerainty was established over the Yemen. This lasted until 1043 (AD 1633) when the Imams of San'a replaced their Turkish masters. The establishment of these Imams at San'a marked a move in the focus of the Yemeni Imamate from Sa'da to San'a but the Imams of San'a were no newcomers to the scene, being members of the same family as the earlier Rassid Imams of Sa'da who had intermittently wielded power since the foundation of their line as an offshoot from the Abbasid Caliphate. In 1872 (AH 1289) the Turks again captured San'a and extended their suzerainty over southern Arabia.

The Yemen after AD 1872

The Yemen was occupied by the Ottoman Turks from 1872 until 1890 (AH 1308) when the Imam Hamid al din Yahya (1890 - 1894) regained some authority. It was not until 1911 that the Turkish Governor Izzat Pasha recognised the Imam Yahya ibn Mohammed Hamid al din al Mutawakkil (1904 - 1948 : 1322 - 1367) as ruler of the Yemen. During the period 1911 to 1918 when Yemen was still under semi-nominal Turkish suzerainty local copper coins were struck. At that time the currency of the region consisted of the following : "Gold: the Turkish Lira should be the standard gold coin of the country, but it is rare and becoming rarer. The English sovereign is readily accepted (= 10 Maria Theresa dollars or riyals). The French Napoleon is also in circulation. Silver: there are two opposition silver standards. a) The Maria Theresa dollar or riyal (= 12 piastres); b) The Turkish Mejidie dollar (= 17 piastres). The latter used to be the only legal tender in silver and the importation of the Maria Theresa dollar was prohibited for some time; but the prohibition was withdrawn in 1910. The Mejidie dollar will only be accepted by the Arabs of the towns and even there the Riyal is accepted more readily..... The merchants of Hodeidah make general use of Indian rupees as currency and base their exchange calculations on the value of 100 riyals in that currency" (Handbook of the Yemen 1917 p.38: vide F. Pridmore, 1963).

The Mutawakkilite Kingdom of the Yemen acquired full independance when the Turks withdrew in 1918/19. The striking of local silver coinage dates from that period. One of the new Yemeni 'Imadi Riyals was equivalent to one Maria Theresa thaler alongside which it was to circulate until at least 1926. But by 1937 the highest denomination in current circulation was the ¼ riyal. The next Imam, Ahmad ibn Yahya (1948-1962 : 1367-1382), re-introduced the Riyal as a coin, both in the form of local designs overstruck on Maria Theresa thalers and also in the form of Maria Theresa thalers validated by counter-stamping them with the die of the smallest current coin, the silver 1/16 th. riyal (a countermarking procedure also used in some of the Malay-Indonesian sultanates). The same ruler introduced the ½ riyal as a new denomination, the blanks for these coins being cut out from ubiquitous Maria Theresa thalers.

1444 San'a 1341

With the addition of the 1/160 riyal this is the complete range of denominations struck for common use by Imam Yahya. Beyond this there was a restricted issue of 'Imadi Riyals in 1344, apparently struck to replace Turkish large silver 20 piastre pieces, rather than to compete with Maria Theresa thalers. By 1937 (1356) the Riyal had passed out of circulation as a current denomination.

The Wahabis (Al Saud) of Nejd : AD 1746 - 1818 : AH 1159 - 1233

What originated as a Religious movement created by Mohammed ibn 'Abd al Wahhab was given political expression by his protector, the chief Mohammed ibn Saud (1159 - 1179 : 1746 - 1765). Nejd was occupied during the course of the century and campaigns were pursued in Hejaz and Iraq. Turkish reaction followed and Ibrahim Pasha, son of the Egyptian governor, occupied Nejd and Hejaz in 1233 (AD 1818).

The Ibn Saud of Nejd and Hejaz : latterly of Saudi Arabia : from AD 1902 (AH 1319)

After their defeat at the hands of the Ottomans in 1818 the Ibn Saud of Nejd remained relatively impotent. Nejd continued to owe allegiance to the Turks and was governed by members of the Rashidi family. 'Abd al 'Aziz of the Ibn Saud family, governor of Nejd from 1902 and a subject of the Rashidis, gave himself the title Sultan in 1905 and then proceeded to extend his sway across the Arabian penninsula, occupying Hasa in 1913 at the expense of his Turkish sovereign. In 1916 Turkish withdrawal left Hejaz under the control of Al Hussein ibn 'Ali (1916-24: 1334-42). In 1924 Ibn Saud was able to consolidate his realm and give it a frontage on to the Red Sea by occupying Hejaz from Al Hussein. In 1930 Ibn Saud gave his Kingdom of Nejd, Hejaz and Hasa a new name, calling it Saudi Arabia.

The Al Bu - Sa'id of Oman and Zanzibar : from AD 1741 (AH 1154)

In 1660 the Imam of Oman captured Mombasa from the Portuguese. Then, in 1741 (1154) Ahmad ibn Sa'id, erstwhile governor of Suhar in Oman, succeeded to the Arabian and East African possessions of the preceeding Ya'rubid dynasty. Muscat became the capital of the new Sayyid (Bu - Sa'id) sultanate which grew to include Bahrain, Bandar 'Abbas and Hormuz during the reign of Sayyid Sultan ibn Ahmad (1206-20 : 1792-1806). Threatened by the increasing power wielded by the Wahhabis of Nejd the Sayyids made an alliance with the British who, in exchange, gained the use of Muscat as a port: the East India Company treaty of 1798 (1212). Sayyid possessions on the East African coast included the traditional centres of Kilwa, Zanzibar and Pemba but during the reign of Sayyid Sa'id ibn Sultan (1806-56 : 1220-73) suzerainty was extended over Mogadishu and re-established at Mombasa; thus consolidating Sayyid control of the coastline. Sa'id 's death in 1856 (1273) was followed by division of the realm into the Sultanate of Muscat and Oman and the Sultanate of Zanzibar and Pemba. The Sultanate of Muscat and Oman retained its independance, but under strong British influence. The Sultanate of Zanzibar and Pemba (an adjacent island to the north) became a British Protectorate in 1890 (1307) and part of British East Africa in 1897.

AR *Riyal (28 gm)*

1469 Pemba پمبه
within clove shaped countermark
on Maria Theresa thaler

The clove became the symbol of Pemba - "the clove island" - when extensive cultivation of cloves was initiated there in 1872 following loss of the harvest on Zanzibar. Countermarked coins of this type are unlikely to have been issued after incorporation of the Zanzibar & Pemba protectorate within British East Africa in 1897. These countermarked issues are contemporary with those of Qaiti (dated 1889), Djibouti, Obock, Ras Bab al Mandab and Mozambique (from 1887).

Lesser Sheikhdoms : The British sphere in the Hadramout

The Hadramout, the southern coastal strip of Arabia, remained the domain of local Sheikhdoms, intermittently dominated by more powerful neighbours, until these were incorporated, one by one, by the British as States of the Aden Protectorate. The British occupied Aden itself in 1839 and the various Sheikhdoms of the Hadramout during the remainder of the 19 th. century. Mukalla, the port for Qaiti, struck coins under Sultan Al Nakib Salah during the 1850's and the parent state of Qaiti issued coins under Sultan Monassar ibn 'Abdallah in the 1880's. Tarim and Ghurfah, further inland, issued individual coin series that resembled one another and were struck in Birmingham. Lahej, further to the west, near Aden, also struck a few coins. The commercial importance of these various states was enhanced by the boost to Red Sea trade given by the opening of the Suez Canal in 1869.

1478 India rupee 1888 : large c/s

1479 India half rupee 1888 : large c/s

1480 India half rupee 1888 : small c/s

Coins, rupees and copper particularly, have been seen bearing imitations of the small counterstamp (vide supra comments on Nejd issues). Inspection of silver specimens shows that the false die for at least one group of imitations was cast and has much thicker character strokes than genuine dies. Inspection of coppers sometimes shows bright fresh metal where the counterfeit die has been recently stamped: a marked contrast to the normal tarnished surface of the rest of the coin. Attempts to obscure this anachronism include firing the coins so that the whole surface is oxidised or lacquering the surface.

Lesser Sheikhdoms : The French sphere at the mouth of the Red Sea

The importance of the Sheikhdoms around the mouth of the Red Sea was greatly enhanced by the opening of the Suez Canal in 1869. The French, who had begun acquiring territorial concessions in 1839, also consolidated their dominion over this region and eventually established their Protectorate in 1884 (AH 1301). French Somaliland, with its capital at Obock, embraced the strip of coastland on the African shore of the Red Sea mouth together with the opposing headland of Ras Bab al Mandab on the Arabian shore, an Arabian possession they were to retain until the First World War. In 1892 the capital of French Somaliland was moved from Obock to Djibouti and in 1896 French Somaliland was given Colonial status.

Obock ابخ circa AD 1884 - 1892

AR *Fractional Riyal*

1486 Indian Victoria rupee 1840

2 nd. and 3 rd. c/s: (fineness) 830 ٨٣٠

The Djibouti counterstamps authorised circulation at a nominal silver fineness of 83%.

AR *Fractional riyals*

1489 Indian William IV rupee: 1835

1490 Indian Victoria rupee: 1840

1491 Indian Victoria rupee: 1862
All with the same c/s

The French only occupied Djibouti in 1885, whereas they had acquired Obock in 1881.

Ras Bab al Mandab **circa 1890's**

Shaykh Sa'id الشيخ سعيد راس باب المندب

AR *Riyal (28 gm)*

1492 Counterstamped Maria Theresa thaler
c/s: Al Shaykh Sa'id fi Ras Bab al Mandab
الشيخ سعيد غ راس باب المندب

At the time of the First World War there was a fort named Sheikh Said on the headland of Ras Bab al Mandab, presumably eponymously named by the French after a previous local ruler called Sheikh Said. This inscription should probably be interpreted as referring to the French Protected Sheikh Said rather than to the fort later named after him.

AR *Fractional riyal*

1493 Indian Victoria rupee: 1840
same c/s الشيخ سعيد غ راس باب المندب

NB. Coins bearing countermarks of this French series do not appear to have been subjects for counterfeiters. This is probably because thé designs are more complex and detailed than those of the Nejd-Qaiti series (supra).

The Maria Theresa thaler in Mozambique

The Portuguese established a trading post at Mozambique in 1505 and then extended their sway northwards to Mombasa, which they settled in 1590. They were unable to subdue the more northerly power of Mogadishu and later lost Mombasa to the Sultans of Oman and Zanzibar. A European style coinage was struck in Mozambique but Indian rupees and Maria Theresa thalers also circulated there in the late 19 th. century: apparently marking the southern limit for the circulation of such rupees and thalers. According to a decree of 31 st. March 1887 such foreign currency was required to be counterstamped (initially with PM and later with the same initials crowned).

AR *Thaler* *1887 - 1895/1900*

The Mongol Period

The Mongols, pastoral nomads of the Central Asian steppes, erupted from their homeland around Karakorum in Russian Turkestan, under their Chief Khan (Khaqan) Genghiz during the years AD 1206 - 27 (AH 603 - 24). The epic began three decades earlier when Temujin, son of Yissugay, acceeded in 1175, at the age of 13 years, to the leadership of the 40,000 tents in a clan wandering the banks of the Onan river. Between 1175 and 1206 Temujin rose to become the acknowledged leader of tribes living north of the Gobi desert. At the Kuraltay (Assembly of all tribes) held in 1206 Temujin was given the augmented title 'Genghiz Khan' (Very mighty king). Then began his career of conquest beyond the lands of the Central Asian Nomads. The Uighurs were reduced in 1209 but attempts on China only gave him the Kingdoms of Liau-tung and of the Tanguts of Hsia. The Turkish Gurkans of Karakhitay (Eastern Turkestan), descendants of the Ilak Khans (supra), were subdued, so giving Genghiz Khan control over Kashgar, Khotan and Yarkand. Then, his defeat of 'Ala al din the Khwarezmshah in 1220 (617) gave the Mongols extensive new territories in Transoxiana, Afghanistan and Eastern Iran. At the same time other Mongol armies descended the Caucasus, between the Caspian and the Black Seas, and occupied the Lands of the Volga, together with Georgia and Azerbaijan (North-western Iran). When Genghiz Khan died in 624 (1227) the Mongol realm extended from the Black Sea to the border of China and embraced much of Russia, Persia, Afghanistan and Turkestan. In conformity with Mongol custom the conquests were distributed among Genghiz Khan's sons Juji, Jagatai, Ogotai and Tuluy. One of them, Ogotay, was nominated to be his successor as 'Great Khan' (Khaqan). During the decades that followed Genghiz Khan's death further eastern campaigns completed the conquest of China from its Sung Emperors during the reign of Khubilay Khan (655-693 : 1257-94); Korea having already been occupied (1241). In the west the campaigns of Batu and Juji gave the Mongols possession of Moscow and Novgorod and brought them to the frontiers of Poland and Hungary during the 630's (1230's).

Mongol Great Khans

From the time of Genghiz Khan until the accession of his grandson Khubilay in 655 (1257) the Great Khans wielded substantive suzerainty over the Mongol world. After this time de facto sovereignty was exercised by the various families of Genghiz Khan's descendants who ruled the numerous provinces into which the Mongol world became divided. Chief among these lines of provincial khans were (in numismatic terms) the Golden Horde, the Ilkhans, the Jagatai and the Yuan. The Khans of the Golden Horde, descendants of the line of Juji and subdivided into the Blue Horde of Western Kipchak and the White Horde of Eastern Kipchak, controlled the Russian steppes and were, for a while, acknowledged sovereigns of the Genoese merchant community at Caffa and of various Russian princes. The Ilkhans, descended from the line of Tuluy, ruled Persia and adjacent parts of Turkey and Mesopotamia while the Jagatai controlled Afghanistan and Transoxiana and the Yuan, also descended from Tuluy's line, were the Mongol Emperors of China.

The Yuan Dynasty

China was almost the only region in the Mongol world that did not also form part of the Islamic world. Islam was adopted by the majority of Mongol clans following their occupation of Islamic lands in Iran-Afghanistan-Turkestan but although the Mongols thereafter brought Islam to many parts of Russia those Mongols who settled in China tended to adopt Chinese practices. The Chinese style cash coinage (also paper money) of the Yuan Mongols, struck from the time of Khubilai Khan onwards, lies outside the scope of this volume but may be represented by the following group of issues.

Wu Tsung = Qayshan Guluk **AD 1307 - 1311**

AE *Cash (c. 3½ gm)*

1504 Chih Ta Tung Pao
(Currency of the Chih Ta period : AD 1308-11)
rev.: blank
casting of this issue was initiated in the 2nd. year of Chih Ta (Sjoth 1098: Ting Fu Pao p.141)

AE *Ten Cash (c. 17 - 27 gm)*

1505 Ta Yuan Tung Pao
rev.: Mongol legend
(Ting Fu Pao p.142)

1506 - 1508 Ta Yuan Tung Pao
rev.: blank
written in Mongol seal script
These coins were first cast in AD 1310 (3 rd. year of Chih Ta) and are among the commoner coins of the Yuan dynasty (Sjoth 1099: Ting Fu Pao p. 142).

Shun Ti = Toghan Temur **AD 1332 - 1370**

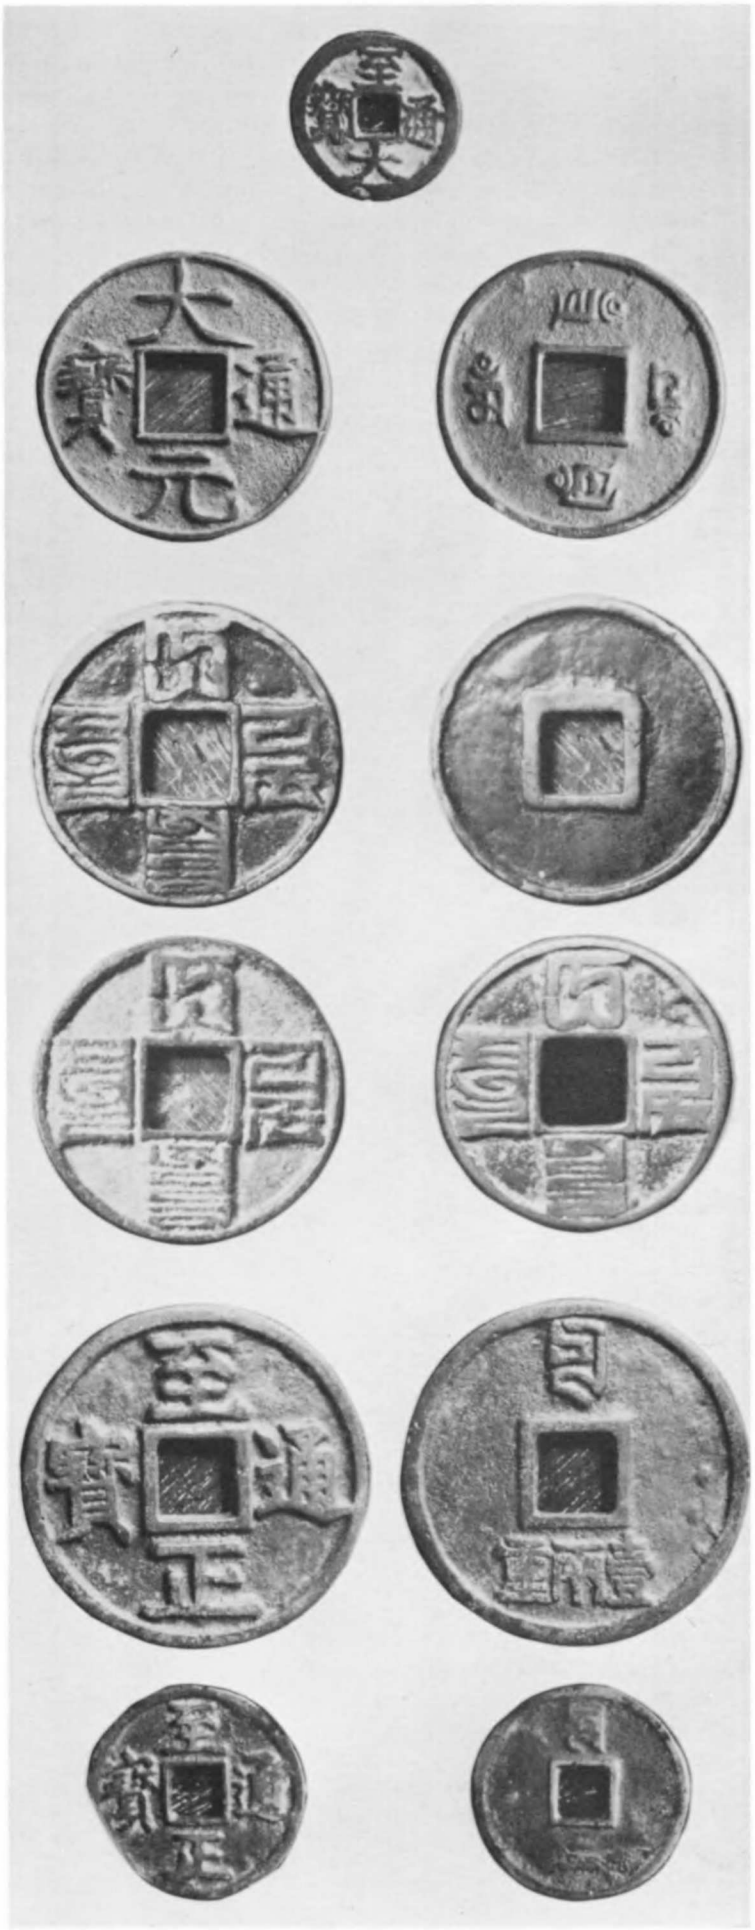
AE *Ten Cash (c. 17 - 27 gm)*

1509 Chih Cheng Tung Pao
rev.: (value) Ten in Mongol
weighing One Tael in Chinese
Casting was initiated in the 10 th. year of Chih Cheng (AD 1350) for use alongside the paper currency. (Sjoth 1112: Ting Fu Pao p. 147)

AE *Two Cash (c. 5 gm)*

1510 Chih Cheng Tung Pao
rev.: (Value) Two in Mongol and Chinese
A number of other values in this series were also cast and a rare related issue bears a reverse inscription in Arabic characters. (Sjoth 1109: Ting Fu Pao p. 146)

The problem of coin authenticity is more acute in the case of Chinese issues than it is with most other coin series. This is partly because all Chinese cash, both genuine and forged, are manufactured by casting and partly because forgeries have been cast for the edification of many generations of Chinese and latterly also of Occidental coin collectors. The coins shown here all appear to be genuine but reservations could be held in respect of the two large specimens bearing Mongol reverse inscriptions (nos. 1505 and 1509).



The Khans of the Golden Horde

Batu, son of Juji and a grandson of Genghiz Khan, played an important role in the European conquests achieved during the Khaqanate of Ogotay. The appanage of Juji's family, bequethed to them by Genghiz Khan, was Karakhitay in Turkestan but by such campaigns as those of Batu this appanage was expanded westwards across the south Russian steppes to the borders of Europe. Thus the Khanate of the Golden Horde (Juji's appanage) embraced most of Southern Russia. Within this Khanate Batu and his family ruled the dominant Blue Horde of Western Kipchak. Their lands were the western provinces centred on the Don - Volga country between the Urals and the Dniepr as far as a southern frontier provided by the Black Sea and the Caspian Sea. These lands were ruled from a capital on the Volga that was variously referred to as Serai or as Gulistan (the Rose Garden) or Ordu (the Camp). A new capital built higher up the Volga by Jani Beg had comparable synonyms : New Serai, New Gulistan, New Ordu, Great Ordu. Royal succession in Western Kipchak was orderly until the death of Jani Beg in 758 (1357) after which followed two decades of virtual anarchy when numerous members of rival families belonging to the house of Juji acquired transient control. This situation was terminated in 780 (1378) by Toktamish Khan, leader of the White Horde, when he extended his control over the Blue Horde and thus united the Golden Horde.

The Golden Horde after its unification by Toktamish Khan in AH 780

The White Horde of Eastern Kipchak to which Toktamish Khan belonged was the appanage of Batu's elder brother Orda; the original inheritance of their father Juji. The land belonging to this branch of the Golden Horde was Karakhitay, the region in Turkestan lying above the River Jaxartes. The family of Orda succeeded one another as Khans of the White Horde in an orderly manner until the reign of Urus Khan (762-777). Then Timur Gurkan (771 - 807), founder of the Timurid dynasty, interfered from his homeland south of the river Jaxartes and placed a rival member of Orda's family, Ghiyath al din Toktamish Khan, upon the throne of Eastern Kipchak. Toktamish, having secured his eastern throne in 778, marched upon Western Kipchak and conquered the Blue Horde in 780, thus uniting both branches of the Golden Horde under his own leadership. The Golden Horde now retrieved transient glory that was marked by the sack of Moscow in 784 (1382) and by coins issued in the name of Toktamish Khan by various Russian princes and by the Genoese trading community of Caffa (Crimea) who now acknowledged his suzerainty. But the glory was short-lived. Toktamish Khan quarrelled with Timur and was defeated by him in 793 (1391) and again in 797 (1395). This permitted numerous rival aspirants from the opposing royal houses of Urus Khan and Toktamish Khan to seek the throne of Kipchak and introduced a new period of anarchy. In the west Russian principalities were quick to acquire their independance and the Crimea passed to its own autonomous dynasty, the Khans of Krim. A century later the remnants of the Golden Horde were absorbed by these now powerful Russian and Crimean principalities.

There were three Khans of the Golden Horde during AH 810: Shadi Beg died in that year and was succeeded by Pulad. Timur was also ruling and, like the other two, belonged to the family of Ordu.

The Khans of Krim (the Crimea)

Ulugh Mohammed, a general of Toktamish Khan of the Golden Horde, carved out for himself a principality in the Crimea at a time when regal authority was weak following Toktamish Khan's two defeats at the hands of Timur in 793 and 797. Hajji Giray, a son of Ulugh Mohammed, consolidated the Crimean Khanate during his reign of nearly five decades (c. 823 - 871 : 1420 - 1466). During this time Hajji Giray was also the aknowledged suzerain of the Genoese merchants at Caffa. The Krim Khanate persisted until absorbed by Russia in 1197 (AD 1783) though it had been subject to strong Turkish influence since the 9 th. century AH (15 th. centuryAD). A scarce coinage of small base silver fractional dirhems was struck until the more prolific terminal coinage.

	Jehan Timur		--	(0.8)	1.6	--	--	
	Suleiman		--	(0.8)	1.6	2.4	4.8	
	Nushirwan		--	0.8	1.6	--	--	
Injuids	Abu Ishak	1 st.	0.9	(1.8)	3.6	--	--	
		2 nd.	--	(1.6)	3.2	--	--	

(The 0.8 gram standard was adopted by the Jalairids, the Urtukids of Maridin and the Muzafferids. It was slightly modified by the Sarbedarids. The standard declined to 0.7 gm. under the Jalairids and Muzaffarids and was passed on to the Shirwan Shahs and to Timur)

Urtukids of	Shams al din Salih		(0.8)	1.6	--	--
Maridin	Majd al din 'Iza al Z.	--	(0.7)	1.4	--	--
Jalairids	Shaykh Hasan Buzurg	--	(0.8)	1.6	2.4	--
	Oweys	--	0.7	--	2.1	--
	Hoseyn	--	(0.7)	1.4	--	--
	Anonymous	--	0.7	--	2.1	--
Muzaffarid	Shah Shuja	--	(0.8)	--	2.4	--
	Zain al Abidin	--	(0.7)	--	2.1	--
Shirwan Shah	Anonymous post Jalairid		(0.7)	--	2.1	--
Sarbedarid	Anonymous	--	(0.7-8)	--	2.6	4.5
Timurid	Timur	--	(0.7-8)	1.5	3.0	6.0

(After the reign of Timur his son Shah Rukh introduced the Timurid standard with a silver unit "Shah Rukhi tankah" of 5.1 gm)

This table only includes coin denominations represented in this catalogue.
The theoretical weight of the silver unit, the dirhem, is cited in all cases though coins of some rulers are only known as double or triple dirhems. Where coins of one dirhem weight are not represented here this weight is cited in brackets.

The Ilkhans : Mongols of Persia

During the reign of the Great Khan Mangu (646 - 655) Persia was placed under the control of Hulagu, son of Tuluy, who was a brother of both Mangu and Khubilai Khan. Hulagu was appointed Ilkhan (provincial Khan) in 654 in order that he might consolidate the Persian provinces recently conquered from 'Ala al din Khwarezmshah. Hulagu subdued Persia and extended Mongol rule as far as Bagdad where he executed the last Caliph, Al Musta'sim (640 - 656). Further progress in the west was prevented by the power of the Mamlukes. The Urtukid of Maridin, Kara Arslan, retained his domain as a vassal of Hulagu and the King of Trebizond sought his favour. Hulagu continued to cite the name of the Great Khan on his coins until the death of Mangu in 655 and thereafter only cited the existance of a Khaqan without actually giving his name (his brother Khubilai). During the reign of Abu Sa'id (716 - 736) the growing power of provincial governors began to undermine the authority of central government in the Ilkhan realm. The Injuid governor Abu Ishak assumed independance in south-western Iran following a period during which he acknowledged Abu Sa'id's authority and was followed by Shaykh Hasan Buzurg, the Jalairid governor of Iraq, who declared independance when Abu Sa'id died in 736. Most subsequent Ilkhan rulers were puppets of powerful provincial families, even the much married Queen Sati Beg (Chupan, then Arpa Khan, then Suleiman), a sister of Abu Sa'id.

Anonymous Georgian dirhems of Hulagu and Abaga

The mint at Tiflis in Georgia, having struck dirhems for the Great Khans Turakina and Mangu (supra), then issued anonymous dirhems for the first Ilkhans Hulagu and Abaga. From the last years of Abaga's reign (679-80) until the time of Ghazan Mahmud a series of Christian dirhems was struck bearing a Christian formula of Faith instead of the Kalima. Some of these are catalogued below with Georgian coinage. Ghazan Mahmud (from c. 701) and his successors thereafter struck standard Ilkhanid dirhems at Tiflis mint (vide infra).

The Kutlugh Khans of Kirman AH 619 - 703

This Amirate was established by Burak Hajib during the years when Mongol suzerainty over Iran was being consolidated by Genghiz Khan. He and his successors were vassals of the Mongols (Great Khans: later Ilkhans) who superseded them in 703.

The Injuids of South-western Iran 720's - 754

The Injuid governors of south-western Iran assumed independance during the reign of the Ilkhan Abu Sa'id. They carved out a realm centred initially on Shiraz and later on Isfahan under the leadership of Mohammed Shah Inchu and his son Abu Ishaq. The earliest coins of this dynasty, struck during the 720's AH, bore Abu Ishaq's name alongside that of his acknowledged sovereign Abu Sa'id but after the death of Abu Sa'id in 736 (and perhaps a year or two earlier) Abu Ishaq assumed complete independance and struck coins bearing his own name alone. The Injuid realm was suppressed in 754 by the rising power of the Muzaffarids.

The Jalairids AH 736 - 814

The Jalairid and Chupanid families were the most powerful nobility in the Ilkhanid realm at the time of Abu Sa'id. When Abu Sa'id died in 736 (AD 1336) Shaykh Hasan Buzurg Jalayr made Iraq an independant Jalairid state with its capital at Bagdad. He still intervened in Ilkhanid politics and placed a succession of three puppets on the Ilkhanid throne. His successor Shaykh Oweys brought much of northern Mesopotamia and North-western Iran (Azerbaijan) within the Jalairid realm. Further expansion was blocked by the rise of the Muzaffarids (746-795) on the Iranian plateau and the creation of the Turcoman (Kara-Koyunlu: 780-874) realm in Armenia. Sultân Ahmad Jalair was later forced to take refuge with the Mamlukes when his realm was invaded by Timur in 796 (he had suffered earlier eastern losses to Timur in 787-90). Ahmad recovered his Jalairid possession when Timur returned to Samarkand in 807. Most northern Jalairid provinces were sôon lost to the Kara Koyunlu whose continued expansion gave them Bagdad in 814. Last remnants of the Jalairids were not finally suppressed until the 830's.

These issues belong to the Iran-Turkish borderlands; perhaps struck by the Jalairids, possibly by the Shirwan Shahs, by the Amirs of Bitlis or by other minor dynasties.

The Muzaffarids AH 746 - 795

Al Muzaffar was appointed by the Ilkhan Ghazan Mahmud to govern a small district near Isfahan and was succeeded by his son Mohammed in 713. The Ilkhan sovereign Abu Sa'id later gave Mohammed control of Yezd (719) and he subsequently obtained the governorship of Kirman (741) by marrying the daughter of the last Qutlugh Khan, Qutb al din Shah Jahan. Mohammed's authority increased as the Ilkhans grew weaker and he officially assumed independance in 746. After prolonged combat against the Injuid Abu Ishaq Shiraz was conquered in 754 and south-western Iran finally pacified (notably Isfahan) in 758 when he executed Abu Ishaq. Mohammed extended the Muzaffarid realm as far north as Tabriz (transiently) before he was deposed and blinded by his son Shah Shuja in 759. After various internal dynastic disputes the Muzaffarid realm was incorporated into Timur's Empire.

The Shirwan Shahs of the Caucasus

The Caucasus, the region situated between the Black Sea and the Caspian Sea, was ruled by numerous dynasties of local Amirs from the Abbasid period until this region was occupied by the Mongols. During the post - Mongol period the fortunes of the Shirwan Shahs tended to vary inversely with those of their neighbours, the Christian Kings of Georgia. Copper coinage of the Northern provinces (both Shirwan Shah and Georgian) was struck on irregularly cast blanks while copper coinage of both dynasties issued at their more southerly mints was struck on regular circular blanks. Shirwan Shah silver coinage of the early post - Mongol period gained its inspiration from that of its southern neighbours, the Jalairids.

The Kara Koyunlu : Turcomans of the Black Sheep — AH 780 - 874

The clan of Turcomans settled around Lake Van in north-eastern Turkey were known by the emblem on their standard as the 'Black Sheep'. Under the leadership of their chief Kara Mohammed they progressively extended their sway over adjacent regions of Armenia and Azerbaijan at the expense of the Jalairids. Successful conflict with Hosayn Jalayr in AH 779/780 led to Jalairid recognition of the recent Turcoman conquests. The Kara Koyunlu dated the official commencement of their independance from this time, AH 780. Kara Yusuf, the second ruler of the Kara Koyunlu, was exiled by Timur during his western campaigns of AH 802 - 807. Subsequent conflict with the Jalairids was resolved by conquest: Kara Yusuf took northern Mesopotamia and then occupied Bagdad in 814. Later in the century the realm of the Kara Koyunlu was brought low by the rising power of their kinsmen, the Ak Koyunlu. In 874 (AD 1469) Uzun Hasan Ak Koyunlu extended his dominion over all Turcoman possessions; uniting the Black Sheep with his own clan of the White Sheep.

The Ak Koyunlu : Turcomans of the White Sheep — AH 780 - 908

The Ak Koyunlu Turcomans, the 'White Sheep' in contrast to their kinsmen whose standard was a Black Sheep, also dated their independance from the treaty of AH 780 with Hosayn Jalayr. But the White Sheep remained relatively un-important until Uzun Hasan extended his sway over the Black Sheep in 874. A generation after this the Turcoman realm was extinguished by Isma'il, founder of the Sefavid dynasty, at the Battle of Shurur in 907 (AD 1502). Murad Ak Koyunlu, restored by Isma'il in 907, relinquished power following Isma'il 's coronation in 908.

Earlier tankahs countermarked for Uzun Hasan

It is probably significant that all coins used for countermarking were struck to the new Timurid standard of 5.1 grammes. One reason for such countermarking may have been to validate for local usage, at the value of one "Shah Rukhi Tankah" , a spectrum of the available coinage struck to this newly adopted standard: a new unitary monetary standard that replaced the monetary 'anarchy' of the post-Ilkhanid period.

The Jagatai of Transoxiana — AH 624 - 800

When the Mongol Empire of Genghiz Khan was divided between his four sons at the time of his death in 624 the appanage of Transoxiana passed to Jagatai. Jagatai's Khanate of Transoxiana also included eastern Afghanistan (Balkh, Badakhshan and Ghazna) and provinces such as Kashgar in Eastern Turkestan. The Jagatai Khans continued to rule this appanage until the time of Timur (771 - 807) but their rule degenerated into weakness and anarchy from the 730's. This was partly due to fierce internal conflicts between pagans who predominated in the east and moslems who predominated in the western provinces of the Jagatai realm. While the Jagatai were still powerful one of their number, Kutlugh Khwaja, governor of Ghazna, campaigned on the plains of north-western India and even laid seige to Delhi (697-8). Eventually the Jagatai succumbed to the rising power of an erstwhile Transoxine governor, Timur. He took possession of the Jagatai realm in 771 (far eastern provinces excepted) but continued to acknowledge nominal Jagatai sovereignty until 800.

The Late Saffarids : Kings of Nimruz — AH 618 - c. 890

Early members of the Saffarid family ruled domains centred on their south-west Afghan homeland, sometimes independantly as during the post-Abbasid and the post-Ghaznavid periods, and sometimes as vassals of more powerful neighbours. The group of Saffarid rulers considered here were vassals of the Mongols until the 8 th. century AH when decadence of their Ilkhan and Jagatai neighbours allowed the Kings of Nimruz to re-assert their independance. Their line was finally suppressed by Timur.

The Kerts of Herat — AH 643 - 791

The Kerts of Ghor and Herat were descendants of the Ghorid dynasty that had once given rise to Mohammed ibn Sam and the Delhi Sultanate but had then been suppressed by 'Ala al din Khwarezmshah. As the government of the Jagatai Mongols, in whose appanage this region lay, grew weak the Kerts were able to re-establish their independance. Their lands were conquered by Timur.

Most of the districts in western Afghanistan that had acknowledged Ilkhan suzerainty defected soon after Abu Sa'id 's death in 736 and became the domain of Sarbedarid rebels who, under the leadership of 'Abd al Razzak, rose against their Ilkhan governor in 737. The Sarbedarids later lost the Damaghan region to another upstart, the Amir Wali, during the 760's and were later suppressed by Timur in 783. The Amir Wali was allowed to retain his lands until suppressed, along with Timur's other remaining Iranian-Afghan vassals, in 795.

Timur (born 736 : 1335) was a distant descendant of Genghiz Khan who rose to the position of vizir to the Jagatai Khan Suyurghatmish. By 771 (1369) he had usurped effective power though he continued to admit the sovereignty of the Jagatai Khans Suyurghatmish (770 - 790) amd Mahmud (790 - 800) until 800. During the years 782-3 Timur established his own supremacy over former Jagatai possessions in Afghanistan and during the course of the next few years he established himself in south-western Persia at the expense of the Muzaffarids (789 & 795) and in north-western Persia (787-90) and Mesopotamia (796) at the expense of the Jalairids. Between these two sets of western campaigns Timur led an expedition against Toktamish Khan of the Golden Horde whom he defeated in 793 (1391) and again in 797. After raiding north-western India, as far as Kashmir and Delhi, in 800-801 Timur turned his attention westwards to Anatolia where he defeated the Ottoman sultan Bayazid I at Ankara in 805 (1402). When Timur died in 807 his Empire, extending nominally from Anatolia to Kashmir, reduced its frontiers as a number of former vassals re-asserted their claims to the outlying provinces. Timur's successor Shah Rukh (807 - 850) was acknowledged throughout Afghanistan, Transoxiana and Persia but he was the only sultan to rule a substantial Timurid realm. Internal rivalries permitted many members of the Timurid house to establish themselves as semi-autonomous dynasts in various provinces, so heralding the fragmentation of the realm. The early successors of Shah Rukh had their soverignty respected in Transoxiana and Khorasan until the time of Abu Sa'id (855 - 872) but thereafter the legal sultan was only respected in Transoxiana. The anarchy of the late Timurid period enabled the Shaybanids to establish themselves in Transoxiana and the Sefavids in Persia. South-eastern Afghanistan remained with Baber's successors as part of the Moghul Empire.

The Post - Timurid dynasties of Central Asia

The Shaybanids of Transoxiana — AH 906 - 1007

The anarchy of the later Timurid period gave way to a new order when Mohammed Shaybani, a descendant of Shayban son of Genghiz Khan's son Juji, moved down from the northern steppes and occupied Transoxiana (cap. Samarkand & Bokhara) in 906 (AD 1500). From Transoxiana the Shaybanids extended their mantle over northern Afghanistan (Balkh province, including Badakhshan). But the south-eastern part of Afghanistan (Kabul & Kandahar) remained within the Moghul Empire and western Afghanistan (Herat) fell to the Sefavids of Persia. Along the banks of the lower Oxus a new and independant principality arose as the Khanate of Khiva (Khwarezm: 921-1289 - 1515-1872), founded by another branch of the family of Shayban; it retained its autonomy until absorbed by Russia in the 19 th. century. The Shaybanid khanate remained fairly stable throughout the 16 th. century, though there were minor fluctuations in the site of the Sefavid - Shaybanid frontier and internal weaknesses that permitted some governors of Balkh, Bokhara and Samarkand to exert their independance on several occasions.

The Janids of Astrakhan AH 1007 - 1200

The Janids were lineal successors to the Shaybanids, their line arising from a marriage between Jan ibn Yar Mohammed, the exiled Khan of Astrakhan, and a daughter of Iskandar Shaybani. Baki Mohammed, the issue of this marriage acceeded to the Shaybanid domains in 1007 (1599). For the next century the Janid realm covered much the same territory as its Shaybanid predecessor; the provinces of Bokhara, Samarkand, Ferghana, Balkh and Badakhshan. During later years Ferghana became the independant Khanate of Khokand in 1112 (AD 1700) and shortly after this northern Afghanistan was acquired by the Durranis whose Afghan realm was founded in 1160 (AD 1747). Eventually the increasingly powerful Mangit vizirs deposed the last Janid khan in 1200 (AD 1785) and assumed control of Bokharia.

The Mangit vizirs of the Janids acquired real power in the realm of Bokharia during the late 18 th. century and finally deposed their Janid sovereign in 1200 (AD 1785). Their succession was to some extent legitimised by marriage between the new Mangit Khan Mir Ma'sum Shah and the daughter of the last Janid Khan Abu al Ghazi. The Mangits became tributary to Russia in 1284 (AD 1868) and their line was suppressed in 1920 (AH 1338).

Khokand, the eastern province of the Janid Khanate of Bokhara, assumed independance under the leadership of Shah Rukh about the year 1112 (AD 1700). Later Khans took advantage of Bokharan weakness during the period of the Janid - Mangit succession to expand westwards and acquire Tashkent. During the 19 th. century the Khans of Khokand frequently supported uprisings against the Chinese who had recently conquered Eastern Turkestan. Khokand was annexed by Russia in 1876 (AH 1293).

The Atalik Ghazi of Kashgar AD 1864 - 1877

During the reign of the Ch'ing Emperor Ch'ien Lung (AD 1736 - 1796) the Chinese conquered Eastern Turkestan (Dzungaria: AD 1758). There were numerous local uprisings against the Chinese, often supported from Khokand. The major revolt, which endured for several years, was that of Ghazi Rashid and Ya'qub Beg (AD 1864 - 1877). Ghazi Rashid Khan established himself at Kuchar in 1864 (AH 1280) and retained control until his death in 1867. He issued cash type coins bearing his name written in Arabic script. Ya'qub Beg, having campaigned in Eastern Turkestan since the time of Ghazi Rashid, succeeded in establishing himself as master of the Tarim basin with a capital at the more southerly centre of Kashgar. Ya'qub Beg became the focus for Islamic aspirations in Eastern Turkestan and was recognised by the Ottoman Caliph 'Abd al 'Aziz in 1289 (AD 1873). He also recieved embassies from both the Russians and the British who each wished to maintain this thorn in the flesh of China. Ya'qub Beg was eventually defeated by the Chinese in 1877 (AH 1294) and killed.

Iran and Afghanistan under the Sefavids and their successors

The Sefavids — AH 907 - 1148

Iran, fragmented since the days of Abu Sa'id the Ilkhan and Shah Rukh the Timurid, found new unity in the person if Isma'il Sefavi ibn Haydar. The family name Sefavi noted their descent from the saintly Shaykh Sefi al din who, in turn, was claimed as a descendant of Hosayn, grandson of the Prophet Mohammed. Although Haydar fought with Uzun Hasan Ak Koyunlu it was not until the Turcoman state fell into decline that Haydar's son Isma'il was able to defeat and supplant them. This he did at the Battle of Shurur in 907, so definitively establishing the Sefavid state. Isma'il was officially crowned the following year (908) and from his capital at Tabriz he set out to suppress the various Timurid principalities that contested the land with one another. Isma'il united under his sceptre a realm that stretched from Herat to the Persian Gulf, a realm bordering that of the Ottomans in the west and those of the Sheybanids and the Moghuls in Afghanistan. Persistant conflicts along the Ottoman - Sefavid border led to numerous changes of suzerainty over districts in Armenia and Georgia but there were no other major territorial alterations in the west apart from Sefavid loss of Bagdad which returned to the Ottomans in 1048 (AD 1638). There were some minor fluctuations of the Sefavid - Shaybanid frontier but the south Afghan frontier between the Sefavids and their Moghul allies remained stable.

Sefavid authority was seriously weakened by the Afghan revolt (1135 - 1142). This was led by one Mahmud who succeeded in establishing himself at Herat, Meshad and Isfahan during 1135. Nadir the Efsharid took advantage of the ensuing anarchy to seize power in 1148 (AD 1736). He consolidated his control over Persia and then proceeded to invade the Moghul Empire, capturing Kandahar, Kabul, Lahore and Delhi (1151 : 1738). After this campaign he was able to maintain a frontier at the river Indus for several years. The assassination of Nadir Shah in 1160 (AD 1747) was followed by the declaration of Afghan independance by Ahmad Shah Durrani and by a period of strife in Persia where Shah Rukh Efshari (1161 - 1210) fought Kerim Khan Zand (1161 - 1193) who, for a while, took the pose of restoring the Sefavid dynasty in the person of Isma'il III Sefavi (1163 - 1169) to whom Kerim Khan acted as regent. The Efshari retained Khorasan while the Zand acquired most of Persia, apart from Astarabad (Mazandaran) where Mohammed Hasan Khan, chief of the Kajar tribesmen, was in effective control until 1172. When Kerim Khan Zand died in 1193 Aka Mohammed Kajar, son of Mohammed Hasan Khan, assumed independance, though it was not until 1209 that he was to succeed in eliminating the last Zand resistance. Members of the Kajar dynasty established by Aka Mohammed retained control of Iran until AD 1925 when they were succeeded by Reza Shah of the reigning Pahlavi dynasty.

Nasir al din Shah ibn Mohammed	1264	1848
Muzaffer al din Shah	1313	1896
Mohammed 'Ali Shah	1324	1907
Sultan Ahmad	1327	1909
replaced by the Pahlavis	1344	1925

The Pahlavis	**from SH 1304 : AD 1925**	
Reza Shah	SH 1304	AD 1925
Mohammed Reza Shah	1320	1941

The year AD 1925 was the 1343 rd. after Mohammed's flight of AD 622 when calculated according to a 'Lunar' year of 354 (var) days (ie. AH 1343) but the same date was the 1304 th. year of the Hijra when calculated according to a 'Solar' year of 365 (var) days. The Persians changed from the 'Lunar' Hijra to the 'Solar' Hijra in AD 1925 (= AH 1343 = SH 1304).

The evolution of Sefavid and later Persian silver denominations

Persian coin denominatons were based on the Gold Toman. This weighed 400 Misghals (1 misghal = 4.608 grammes = 24 nokhods) at the time of Isma'il I but had fallen to 10 Misghals by the Kajar period. Coin denominations are cited here according to H Farahbakhsh (1975). Despite evolutionary changes note continued preference for silver denominations weighing around 5 & 10 g.

The Kajars AH 1193 - 1344

The Kajar dynasty was founded when Mohammed Hasan Khan declared his independance from Kerim Khan in 1163, but he was defeated in 1172 and later killed. Mohammed Hasan's son Aka Mohammed assumed independance in 1193, the year from which the Kajar dynasty is susually dated. He was officially enthroned in 1210 then assassinated in 1211.

The Khans of the Caucasus AH 1160 - 1235

Towards the end of the reign of Kerim Khan Zand and during the ensuing troubled period until the consolidation of Kajar suzerainty a number of districts in the Caucasus left the Persian realm and became independant Khanates. The most important of these were the four Khanates of Ganja, Qarabagh, Shamakhi and Sheki. They were absorbed by Russia in the early 19 th. century.

Khans of Ganja

Shah Wardi	1160	1747
Mohammed Hasan	1174	1760
Inter-regnum: Ibrahim Khalil of Qarabagh	1195	1780

The Durranis and the Barakzais of Afghanistan

Western Afghanistan (Herat) was part of the Sefavid Empire created by Isma'il I (907-930) and apart from short spells under Shaybanid control this region was to remain part of Iran until conquered by the Durranis of Afghanistan. Northern Afghanistan (Balkh & Badakhshan) remained under the Shaybanids and their Janid successors (apart from short periods of independance) until also conquered by the Durranis. Meanwhile south-eastern Afghanistan (Kabul & Kandahar) had been occupied by Baber, the Timurid of Ferghana (from AH 899) when he marched southwards in 911. From this foothold Baber had later established the Moghul Empire in India (AH 930's). Kabul and Kandahar remained within the Moghul Empire until Nadir Shah Efshari of Iran (1148-60) embarked on the eastern campaign that left him master of southern Afghanistan and Pakistan in 1151 (AD 1738). When Nadir Shah was assassinated in 1160 (1747) Afghan independance was established by Ahmad Shah Durrani (1160-87: 1747-73). Ahmad Shah consolidated Durrani control over eastern Efsharid provinces (Kandahar, Kabul, NW. Pakistan). He occupied the remainder of Afghanistan - Herat from the Persians, Northern Afghanistan from the Janids - and also extended his eastern provinces by occupying the Punjab and Kashmir. Growing power of the Sikhs gave them control of the Punjab and then Kashmir while the Talpur Mirs acquired independance in Sind. Conflict between Emirs belonging to the Durrani tribe and their traditional vizirs who belonged to the Barakzai tribe led to the Barakzais overthrowing the Durranis in 1242 (AD 1826). The Barakzais have since retained control of Afghanistan despite conflicts with the Persians over Herat, internal dissensions and two British occupations (1839-42 & 1878-80).

The Durranis

Ahmad Shah	1160	1747
Timur Shah ibn Ahmad Shah	1187	1773

Afghan succession states

At the beginning of the 19 th. century the Afghans lost Kashmir and the Punjab to the Sikhs. The remainder of western Pakistan to the south of Multan (conquered by the Sikhs in 1818) assumed independance under the Mirs of Sind and the Khans of Baluchistan. With the decline of the Sikhs the state of Bahawalpur in western Pakistan rose to dominate that region while Patiala and the adjacent states of Maler Kotla and Nabha rose to prominance in the Punjab.

The Talpur Mirs of Sind

Upper Sind was conquered from the Durranis of Afghanistan in 1824 by the Mirs of Sind.

Ladakh

The Emirate of Ladakh, situated between Kashmir and Tibet, acknowledged the suzerainty of the major powers who administered Kashmir. Their allegiance thus passed from the Afghans to the Sikhs and then to their local successors, the Dogra Rajas. Ladakh was also known as Baltistan (Little Tibet) and the mint name on most coins should probably be read as a contraction of Baltistan.

The Sikhs

The Sikh movement began as an Islamic - Vaishnavite sect based on the preaching of Nanak at the beginning of the 16 th. century AD. The Sikhs later assumed their own political identity in the Amritsar region (AD 1606) when their leader, the Guru Arjoun, played a minor role in the rebellion of Khusru against his father, the Moghul Emperor Jahangir. The Sikhs, angered by the execution of Arjoun, began their transformation from a peacable Religious community into an anti-Moghul warrior fraternity. During the early years of the 18 th. century this warrior people was involved in the Moghul war of succession on behalf of Shah 'Alam Bahadur under its leaders Govind Singh (10 th. Guru) and Bandah (died 1715). The establishment of an independant Sikh state, the Sikh League known as Khalsa, was the achievement of Ranjit Singh who built on the foundations of local resistance against successive Afghan invasions, such as those of Ahmad Shah Durrani during the years 1748 to 1767. Ranjit Singh was appointed Governor of Lahore in AD 1799 and also recieved, this time from the British, the fief of the Punjab. He was accredited equal standing with the English in the Treaty of Amritsar (1809) and augmented his domains by the seizure of Multan (1818), the rest of the Punjab and also Kashmir (1819). Ranjit Singh modernised the army with the help of the Italian Ventura and the Frenchman Claude-Auguste Court, who both also published contributions to the study of early Indian Numismatics. The anarchy that followed Ranjit Singh's death in 1839 was ended when the Sikhs accepted British suzerainty in 1846 at the Treaty of Lahore. Three years later, in 1849, the British annexed the Punjab. Meanwhile Kashmir and Jammu retained local autonomy under the Dogra Rajas.

Sikh coins were issued anonymously and bear a prominant leaf symbol.

Larins

Larins provided a trading currency that was used along the maritime trade route which extended from the ports of the Persian Gulf around the west coast of India as far as Ceylon and the Maldive islands. Larins that circulated in the Ceylon - Maldives region were bent into a "fish-hook" shape while those from western India and the Persian Gulf were straight. "Fish-hook" larins include both those that were actually made in the Ceylon - Maldive region and those which, having arrived in that area by way of trade, were later bent in conformity with local custom. Larins weigh close to 4.9 grammes and were made of good quality silver but the silver content of west Indian larins from Bijapur was slightly lower than that of larins made in the Persian Gulf and Ceylon so the Bijapur larins were tarriffed at a lower rate by contemporary traders. These aspects of the larin coinage were described by Mandelslo (1659), among others, and have more recently been discussed by Codrington (1924) in greater detail. Although many larins can be attributed their small "flans" mean that legends are usually incomplete so that numerous specimens cannot be preciesely indetified. The larin coinage was in widespread use from about 1500 to 1700 AD. A characteristic group of later larins, debased and light-weight, were made in the 18 th. century at Hofuf in the Ottoman province of Hasa (Arabia) on the west coast of the Persian Gulf.

The Kings of Hormuz

The dynasty gained independance from the Salgharids of Fars (676: 1278) and later founded New Hormuz on an island c, 700 (1301). At its apogee around AD 1500 the dependancies of Hormuz included Bahrain and Muscat. Portuguese suzerainty was acknowledged from 1507 but after conquest by a combined English-Persian force in 1622 (1031) Hormuz declined and its trade passed to Bandar 'Abbas

legends imitating those on Persian (Sefavid) larins.
Epigraphy ranges from fair to crude.
All are from the same Ceylon hoard as other larins specified above.

East and West during the Islamic Period

A) Trade between Sweden and Afghanistan during the Viking - Samanid period.

There was extensive trade between these two peoples, the Vikings and the Samanids, during the 10 th. century AD via the river systems of Western Russia. The traders of Khwarezm, a principality lying south of the Aral Sea and a Samanid vassal state during the period under discussion, had long established trading connections stretching as far as the river Volga. In the 10 th. century AD the middle reaches of the river Volga were the domain of the Volga Bulghurs. During their period of expansion the eastern Vikings of Sweden (Varangians) traded along the west Russian rivers, establishing numerous trading posts and coming into contact with the Khwarezmians on the Volga. The nett result was a massive flow of Samanid silver dirhems to Sweden where they have been found in many large hoards. Some Samanid silver did not travel so far and has been found in Russia and Poland. On the other hand other currencies found in Viking silver hoards include those of the Central Provinces of the Caliphate (Mesopotamia etc.), of Byzantium and of Germany. The Khwarezmians and the Volga Bulghurs each struck their own Samanid style dirhems and local Turkish tribes of the same region created barbarous imitations of such coins. But to the west of the Volga basin Islamic dirhems appear to have provided a form of bullion rather than coinage. The Samanid - Viking trade route came to an end around AD 1000. At that time the Samanid realm fell to the Ghaznavids and the Ilak Khans and there was also a metamorphosis of Viking trade as erstwhile trading settlements evolved into autonomous principalities such as Kiev and Novgorod.

Imitation Samanid dirhem

2332 Meaningless pseudo-arabic legends imitating those on Samanid dirhems. Probably struck by Turkish tribes of the Aral-Caspian-Volga region.

Cut fragment of an Abbasid dirhem: AH 163

B) Hungary

Trade between Islam and Eastern Europe initiated during the Viking - Samanid period did not entirely cease at the end of the 10 th. century AD though it was largely in abeyance until the Mongol period. The campaigns of Genghiz Khan (died AD 1227) and his successors, although remembered mainly as a military threat to the principalities of Eastern Europe, provided a stimulus to trade and were associated with emission of a new series of imitation Islamic dirhems; this time billon and copper specimens struck by Hungarian kings. At the same period Hungarian links with Byzantium were also symbolised by the emission of a series of Byzantine style copper coins (only these latter are represented here). Hungary was again subjected to invasion from the east during the 16 th. century AD when the Ottoman Sultan Suleiman I (1520-66) extended his Balkhan provinces to include Hungary. This Ottoman domination lasted until the 1680's when Hungary and Transylvania regained their independance.

C) Bulgaria

The Bulgarian principality was founded by Assen I (AD 1186 - 1196) who brought his country to independance from the Byzantines who had occupied the region in 1019. Bulgaria was later conquered by the Ottoman Sultan Murad I (AD 1360 - 1389) and remained part of that Empire until 1878 (Treaty of Berlin) when a new Bulgarian state was created.

This series of Byzantine style issues was formerly attributed to Assen I (1186-96) and contemporaries.

D) Serbia

Serbia, subjected to the Bulghars in the early 10 th. century AD and then to the Byzantines from 949, assumed independance in AD 1151 but its coinage did not commence until the time of Wladislaw I (1234-40). Serbia was also occupied by the Ottomans during the campaigns of Murad I (AD 1360-89) but they only retained eastern Serbia and it was not until 1476 that the west was taken. Serbia remained within the Ottoman Empire until the creation of a new Serbian state in 1867. The coinage of the independant Medieval Serbian Kingdom showed less resemblance to Byzantine prototypes than that of Bulgaria but manifested strong Venitian influence.

F) Early Coinage of the Russian Principalities

The coinage of the Principality of Kiev, Byzantine in form, lasted from the 9 th. century until Western Russia was conquered by the Mongols led by their Khaqan Genghiz Khan (died AD 1227). The classical medieval Russian coinage of silver dengas commenced during the 14 th. century as the various Russian principalities successively acquired their independance from the Mongol Khans of the Golden Horde. A number of these early silver dengas bear bilingual inscriptions. The coinage of several principalities commenced during the reign of Toktamish Khan (AH 778 - 796 : AD 1376 - 1393) or in the anarchy that followed his defeats by Timur. Such issues often bear Toktamish Khan's inscriptions on one side and the legend of the principality on the other side. As time went on the Arabic inscriptions, which still appeared intermittently until the 15 th. century, became decorative and traditional rather than factual. The coinage of the Russian principalities lasted until, during the course of the 15 th. century, they had all lost their independance to the growing supremacy of Moscow.

G) The Genoese trading colony at Caffa in the Crimea

This colony was administered by a Consul General assisted by an emissary from the ruling Khan who ensured that the annual tribute was paid. The colony of Caffa, formerly the classical city of Theodosia on the Cimmerian Bosphorus, was founded by the Genoese under suzerainty of the Golden Horde about AD 1289. When Timur crushed Toktamish Khan during the 1390's AD the power of the Golden Horde waned and the new Khanate of Krim emerged. In the interval between the final defeat of Toktamish Khan in 1393 and the foundation of the Krim Khanate by Hajji Giray I in 1420 the real power in the Crimea was Ulugh Mohammed, father of Hajji Giray, who remained nominally subject to successive Khans of the Golden Horde. During later decades Ottoman Turks and Krim Khans joined combat in the Crimea, a series of conflicts that ended with the sack of Caffa by the Turks in 1475 and the final end of the colony two years later. Many of the Genoese consuls general of Caffa who administered the colony from 1289 until 1477 have been listed by Schlumberger.

H) Aspects of Late Byzantine coinage.

The coinage of the Byzantine Empire has been treated in many works. In the present context Byzantine coinage has relevance in that as the Byzantine Empire waned and its peripheral provinces attained independance the coinage of these new Kingdoms was often profoundly influenced by their existing coinage, that of the Byzantine Empire. This relationship is manifest in the coinage of Bulgaria and in the coinage of Trebizond. Issues of Byzantine inspiration are also noted in Sicily, in Hungary and among the Danishmendids, the Urtukids and the Crusaders. Byzantine coinage itself was not beyond the scope of outside influence. When the Byzantine Empire was restored under the Paleologi (Michael VIII - 1261-82: Andronicus II - 1282-1318) after the Latin interlude the new coinage was deeply influenced by that of Venice.

1) Before the Paleologan restoration of AD 1261
Also before the reform of Alexius I (AD 1081 - 1118)

The gold solidus metamorphosed into a spread flan Stamenon Nomisma under Basil II (976-1025) and then became scyphate from about 1040, after which it was progressively debased. Alexius I (1081-1118) stabilised a reformed scyphate gold Hyperpyron and subordinate electrum & billon Aspron Trachy. Copper denominations remained thicker and flat. The monetary reform included abolition of the silver miliaresion.

2) After the Paleologan restoration of AD 1261

The transient consolidation of the Byzantine Empire achieved by Michael VIII Paleologus (1261-82) did not include currency reform. But from the reign of his son AndronicusII(1282-1328) the scyphate gold hyperpyron and its subsidiary denominations fell into disuse and were replaced by a new Venetian style silver miliaresion and associated flat copper issues.

J) The Kingdom of Trebizond

The Kingdom of Trebizond was founded by Alexius I (AD 1204 - 1222) at the time when Constantinople fell to the Latin Emperors. The territory of Trebizond embraced much of Northern Turkey along the coastlands of the Black Sea. Most of their silver coins bear a figure of the royal patron, Saint Eugene, on one side and show the king on the other side. The king and St. Eugene stand on earlier coins whereas later issues show them on horseback, a design derived from coins of their southern neighbours, the Seljuks. The coinage of Trebizond was imitated by an eastern neighbour, Georgia. Trebizond prospered commercially from the fall of Bagdad to the Mongol Hulagu in AD 1258 (AH 656) and thereafter maintained good relationships with the Mongols. The realm eventually fell to the Ottoman Turks in 1462, less than a decade after the fall of Constantinople.

K) The Kingdom of Georgia

The Christian Kingdom of the Bagratids of Georgia rose to power in the south-western part of that country during the 10 th. century AD. Their supremacy in the land was confirmed when David conquered Tiflis in AD 1122. Bagratid coins were mostly struck in copper and bore either Arabic or Georgian inscriptions; many having bilingual legends in both scripts. Georgia was conquered by the Mongols during the 1230's AD (vide coins of Turakina and Mangu struck at Tiflis: supra) but the Bagratids remained as vassal kings and for a while both Mongol and Bagratid coins were struck side by side. During the reigns of Hulagu and his successors only Mongol coins were struck in Georgia. Some issues of Abaga, Ahmad, Arghun and Ghazan Mahmud bore Christian inscriptions in deference to the local population but later issues were purely Islamic in character, indistinguishable in general type from standard Ilkhan coinage.

L) The island of Rhodes

Rhodes remained part of the Byzantine Empire until conquered by the Crusaders in AD 1309. A local Byzantine coinage of small copper issues bearing the double 'B' signature of the Paleologi was struck at Rhodes and silver dirhems from neighbouring Islamic states were countermarked with the same double 'B' symbol for use on Rhodes (vide Engel & Serrure III, p. 1414).

Local Paleologan coinage of Rhodes **AD 1280 - 1309**

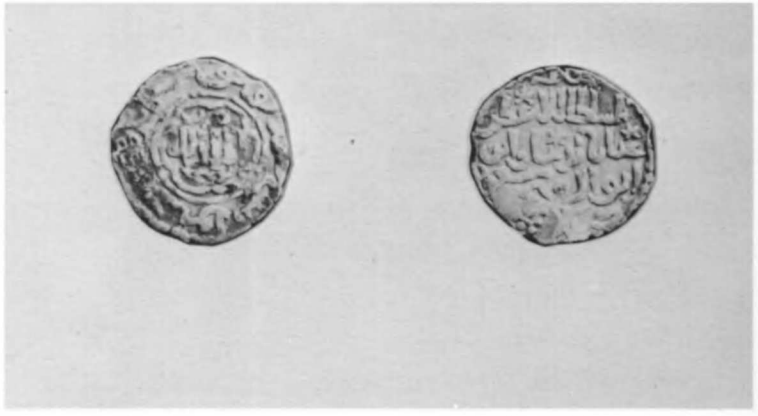
On: Seljuk Kay Khursu III (666-682)
Siwas AH 678 (AD 1279)



M) The Rupenid Kingdom in Cilician Armenia

The Rupenids founded a Christian kingdom embracing the south-east Turkish coastlands. The founder, Leo I (AD 1196 - 1219), was officially crowned on January 6 th. 1198 by authority of the Pope and of the Holy Roman Emperor Henry VI. Armenian coinage was initiated at this time. Coin designs manifest western influence, particularly that of Venice, but the inscriptions are in Armenian. The Rupenids maintained close relations with their neighbours, the Seljuqs of Rum whose suzerainty was sometimes recognised. Later the realm became closely linked with the Crusaders and finally fell, with family feuding, in 1374 (AH 776).

N) The Crusaders : early series (c. 12 th. century)

Edessa

Edessa was occupied by the Crusaders in AD 1097. Its earliest coinage consisted of anonymous Byzantine style folles struck by Baldwin I (1097-1100) and Baldwin II (1100-1118).

AE *Follis (c. 4 gm)*

2408 Anonymous, circa AD 1097 - 1110
Bust of Christ / Cross standing upon open wreath

2409 sim. but ruder style
The reverse type is characteristic; such specimens are normally, but not universally attributed to the Crusaders of Edessa.

Antioch

The Crusaders also occupied Antioch during the First Crusade and were to retain control for 1½ centuries. Early coinage was inspired by Byzantine prototypes but European deniers provided models for later coinage.

Bohemond I **AD 1098 - 1111**

with BISANTE below
(vide Schlumberger p. 208)

The Ottoman Turks defeated the Venitians and Cyprus became part of the Ottoman Empire (1570).

O) Islamic style Crusader Coinage.

The requirements of trade with neighbouring Islamic states led to introduction of a Crusader coinage of Gold Dinars (Bezants) and silver Dirhems within a few years of the first establishment of Crusader States during the 1090's AD. Most early Gold and Silver issues were merely imitations of current Islamic coinage without Christian or Crusader symbols, though some early Bezants bore the initials of issuing Crusader princes. In later years Christian dissapproval of producing dirhems bearing Islamic inscriptions led to transient emission of Christian dirhems but these coins, with their Cross and Christian legends (though written in Arabic script), proved unacceptable to the Moslems and they soon became obsolete.

Crusader Dinars

Pseudo - Fatimid issues without Crusader symbols

T(ancred: regent 1104-1112) of Antioch

Crusader Dirhems

Pseudo - Aleppo series حلب **until c. AH 630 (AD 1232)**

Posthumous issues with the name and designs of Al Zahir Ghazi (582-613), citing his suzerain Al 'Adil (592-615) and the Caliph Al Nasir (575-622) were struck bearing the mint name Aleppo during most years from AH 614 until 630, a date long after all three persons cited on the coins were dead. In the meantime the real Aleppo mint continued striking coins in the name of the true ruler. The name of Al 'Aziz appears on genuine Aleppo dirhems of AH 614 (Artuk 766) and 617 (Artuk 767). The pseudo-Aleppo dirhems bear standard Islamic inscriptions and are devoid of Christian or Crusader symbols. They were probably struck at Acre (vide Bates 1974).

AR Dirhem (c. 3 gm)

الملک الظاهر غازی ابن یوسف ابن ایوب

2449 Aleppo 616

2450 Aleppo 619

2451 Aleppo 620

2452 Aleppo 622

Pseudo - Damascus Series دمشق **c. AH 640-7 and 650-1**

These dirhems are based on the Damascus coinage of Al-Salih Isma'il (at Damascus 635 & 637-643) and cite the Caliph Al Mustansir who died in 640 (AD 1242). Pseudo-Damascus dirhems usually bear the fictitious date 641 (which is posthumous in respect of the Caliph) and often have the non-sectarian marginal legend 'in the name of God, the Compassionate, the Merciful' which never appears on real Ayyubid coins. Some coins bear an overtly Christian margin.

AR *Dirhem (c. 3 gm)*

2453 Damascus 641 دمشق
Obv.: Caliph Al Mustansir (died 640)
Rev.: Al Salih Isma'il
الملک الصالح عماد الدنیا و الدین اسمعیل بن ابی بکر

AR *Dirhem (c. 3 gm)*

2454 Legends of Al 'Adil (592-615: 1196-1218)
stylised script; probably a Crusader copy.

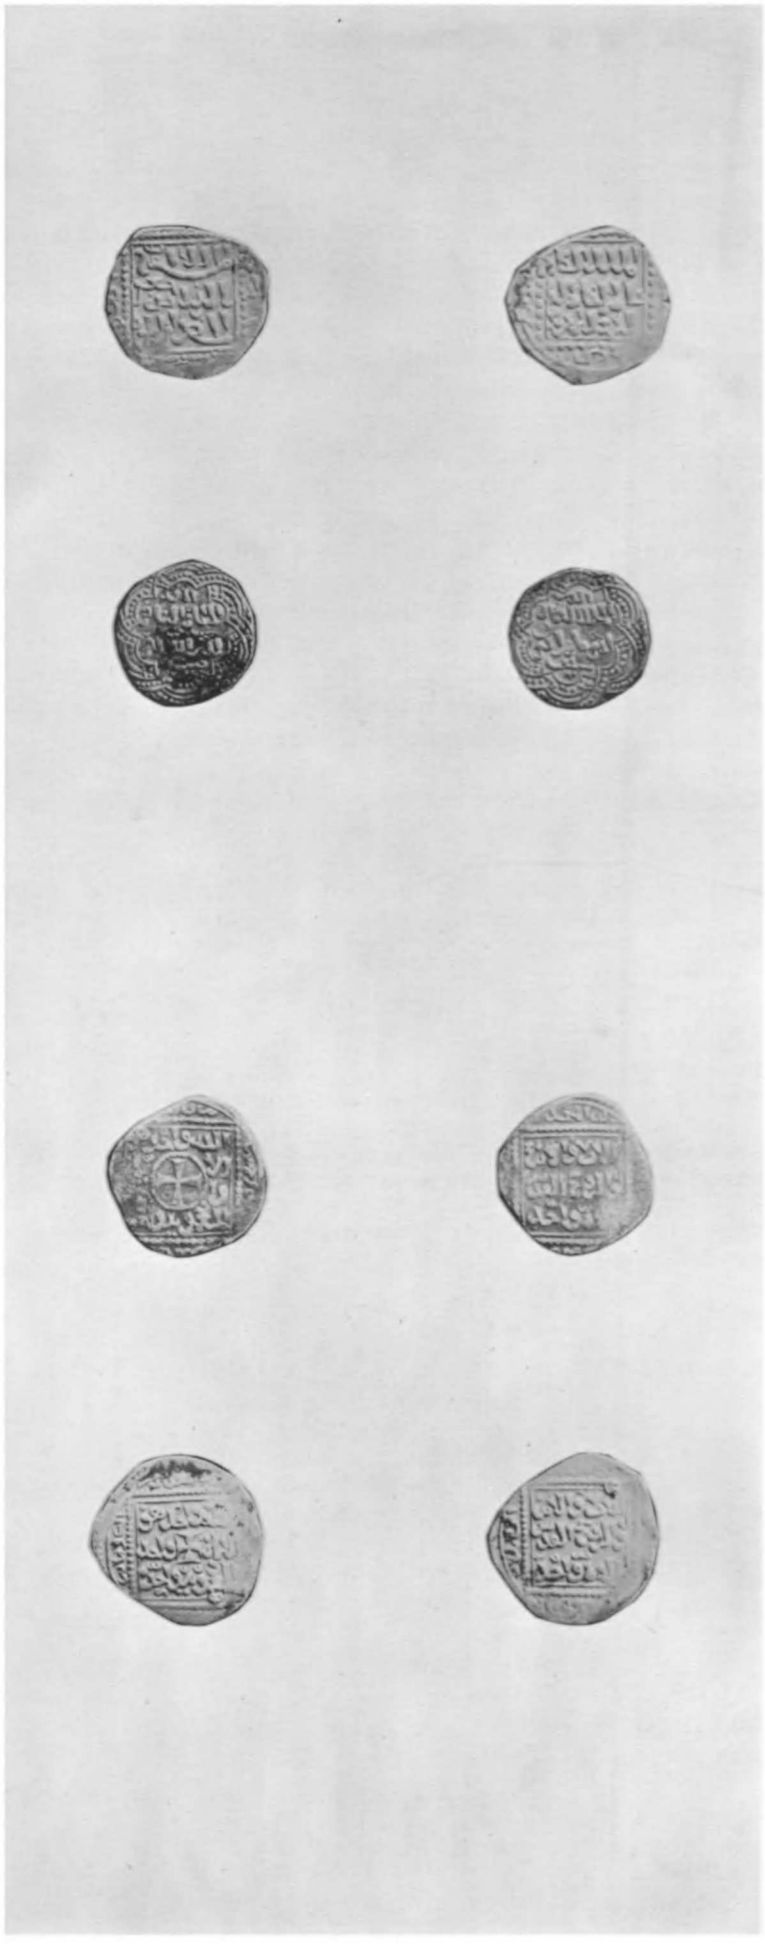
Christian Dirhems **AD 1251 (AH 649)**

AR *Dirhem (2.6 - 3 gm)*

2455 Acre 1251
Obv.: Cross in circle
الله و احد هو لا یمات و احد المعمودیه و احد
'One single God, one single Faith, one single Baptism'
mint and date around
ضرب بعاکا سنه الق و مایتین احد و خمسین
Rev.: الاب و الابن و الروح القدس الاه و احد
'The Father and the Son and the Holy Spirit, One God'
around: لله المجد الی ابد الابدین امین امین امین
'Glory to God, from century through centuries, Amen, Amen, Amen.'
(vide Artuk I, 695: Engel & Serrure II, 915)

2456 Acre 1251
sim. but no circle around central Cross on obv.
(vide Artuk I, 696: Schlumberger p. 141)

Striking of these Christian dirhems appears to have been a response to the Papal interdict of AD 1250 (AH 647) on the striking of coins bearing the names of Islamic rulers and/or Islamic professions of Faith.



Moslem India

The Sultans of Delhi

A) The Ghorids and the Slave Kings — AH 589 - 689

The Delhi Sultanate was created by the conquests of Mohammed ibn Sam of Ghor. Mohammed ibn Sam captured Ghazni in 569 with his elder brother Ghiyath al din Mahmud ibn Sam. Then they annexed Herat in 571 and, turning eastwards, took Sind the same year. During the course of the next eighteen years Mohammed overcame the various princes of north-western India, taking Lahore, the last outpost of the Ghaznavids, in 582 and defeating the Hindu Rajputs led by Prithvi Raja of Delhi in 588 (AD 1192). During the next two years the remainder of northern India fell piecemeal; lastly Kanauj and Bengal in 590 (AD 1194). Mohammed ibn Sam continued to acknowledge the suzerainty of his brother Ghiyath al din Mahmud until the latter's death in 599 (AD 1202) when he assumed supremacy over a realm that now stretched from Bengal to Herat. Mohammed was assassinated in 602 (AD 1206). His nephew Mahmud ibn Mohammed (602 - 607) acceeded but only wielded power in the Ghor region. Kutb al din Aybak, an erstwhile slave of Mohammed and now the governor of Delhi, proclaimed himself ruler of Hindustan. Another general, Taj al din Yildiz, assumed sovereignty in Ghazni while the Governor of Sind and Kurraman, Nasir al din Qubacha, assumed autonomy in that province. Delhi passed from Aybak to his son Aram Shah in 607 (AD 1210) but he was soon deposed and strong government restored by Iltutmish (607 - 633), another former slave who was now married to a daughter of Aybak. He proclaimed himself Sultan of Delhi later in 607. Iltutmish restored the authority of the Delhi Sultanate in Bengal (Governor Ghiyath al din 'Iwaz: 608-24) and in the province of Kurraman and Sind (conquered from Jalal al din Mangbarni Khwarezmshah in 622) so maintaining the authority of Delhi from the north-west frontier to the mouth of the Ganges and southwards to the Vindhyas. He was acknowledged by the Caliph Al Mustansir (623 - 640). Iltutmish was succeeded by a succession of his various sons (Firoz, Bahram, Mahmud I), a daughter (Queen Raziya) and a grandson (Mas'aud). The sceptre then passed into the family of Balban, a former slave who had married one of Iltutmish' s daughters. Balban (664 - 686) succeeded in maintaining the integrity of the realm, but at the cost of giving a substantial degree of autonomy to various members of his family who received governorships in such provinces as Bengal (Bughra, Firoz, Bahadur et al.). Balban's grandson Kaykubad (686 - 689) succeeded his grandfather to the Delhi Sultanate but after his reign this "Slave dynasty" gave way to the Khaljis following the few months of nominal reign by Kaikubad's three year old son Kayumars.

The Ghorids

Mu'izz al din Mohammed ibn Sam	569	1173
conquered Delhi in 589 (1193)		
Mahmud ibn Mohammed	602	1206
in Ghor only until	609	1212
for other Ghorid dynasts of Afghanistan vide supra.		

Usurpers

Taj al din Yildiz : Ghazni	602 - 611	1206-14
Nasir al din Qubacha : Kurraman & Sind	602 - 617	1206-20

Ghazni was occupied by 'Ala al din Khwarezmshah (611) and never returned to the Delhi Sultanate. The province of Kurraman & Sind was conquered by Genghiz Khan (617), then fell to Jalal al din Mangbarni Khwarezmshah from whom Iltutmish recovered the province for Delhi in 622.

The Slave Kings

Qutb al din Aybak	602	1206
Aram Shah ibn Aybak	607	1210
Shams al din Iltutmish, son-in-law of Aybak	607	1211
Rukn al din Firoz Shah I ibn Iltutmish	633	1236
Jalatu al din Raziya ibn Iltutmish	634	1236
Mu'izz al din Bahram Shah ibn Iltutmish	637	1240
'Ala al din Mas'aud Shah ibn Firoz	639	1242
Nasir al din Mahmud Shah ibn Iltutmish	644	1246
Ghiyath al din Balban, son-in-law of Iltutmish	664	1266
Mu'izz al din Kaykubad ibn Bughra Khan ibn Balban	686	1287
Shams al din Kayumars ibn Kaykubad	689	1290

The Ghorids

Mohammed bin Sam — **589 - 602**

Mohammed's tenure of Delhi dates from 589, though he acceded in Afghanistan during 569. In an Indian context he is normally called "bin Sam" rather than "ibn Sam". His coins bearing the mint name Ghazni and/or struck jointly with his brother Mahmud have been catalogued above (vide Ghorids).

AV Stater (4.25 gm)

2457 - Probably struck at Delhi

2458 Obv.: Lakshmi seated facing
Rev.: Srimad Hmir Mahamad Sam

The Usurpers

Taj al din Yildiz of Ghazni 602 - 611
Nasir al din Qubacha of Kurraman & Sind 602 - 617
Their coins have been catalogued above after those of the Ghorids

The Slave Kings

Shams al din Iltutmish **607 - 633**
شمس الدين ايلتتمش

Iltutmish established the coinage of the Delhi Sultanate in its definitive form, combining Moslem conventions with local Indian traditions. His basic currency units were the Silver Tankah (Tola) of 96 rattis (11.2 grammes) and its 48 th. part, the Billon Jital containing 2 rattis of silver and admixed copper to a final weight of about 3.5 grammes.

B) The Khaljis — AH 689 - 720

The elderly Jalal al din Firoz II took power in place of the three year old Kayumars and was later murdered by his favourite nephew 'Ala al din Mohammed. By deposing Ibrahim, son of Firoz, a few months later Mohammed took power. Delhi flourished during 'Ala al din Mohammed's twenty year reign (695 - 715). He re-occupied Gujarat in 697 (AD 1297) and achieved further successes against the remaining Rajputs. Mohammed also carved out a new province in the Deccan (Deogiri and Warangal) through the offices of his able general Malik Kafur. When 'Ala al din Mohammed died in 715 the powerful Malik Kafur placed Mohammed's three year old youngest son 'Omar (715 - 716) on the throne. However, Mohammed's elder son Mubarak (716 - 720) succeeded in taking the throne by deposing his young brother and assassinating Malik Kafur. Mubarak was, in his turn, assassinated by a court official named Khusru (720). Ghiyath al din Tughluq (720 - 725) soon defeated and supplanted Khusru, establishing his own family, the Tughluqs, on the throne of the Delhi Sultanate.

C) The Tughluqs AH 720 - 817

Ghiyath al din Tughluq took the throne of Delhi in 720 and initiated a new period of firm rule. But during the reign of his son Mohammed ibn Tughluq (725 - 752) a series of revolts began in outlying provinces. In order to control the Deccan Mohammed tried to move the capital of the Sultanate southwards from Delhi to Deogir (renamed Daulatabad) but despite this the most southerly province, Madura (where Mohammed had issued a few coins), became independant in 735. Bengal in the east, where Mohammed had struck the last coins issued by a Delhi Sultan, assumed independance in 739 (AD 1338). Then the Deccan itself revolted and became the Bahmani Sultanate (748: 1347). Mohammed ibn Tughluq's reign saw the last issues of silver Tankahs and a collapse of the ensuing "Forced Currency" by 733. In 741 Mohammed, wishing to affirm his own legitimacy, began placing the name of the Caliph Al Mustakfi on his coins, but learning in 744 that Al Mustakfi was long dead (died 740) and receiving official confirmation of his legitimacy in the same year (744) from the reigning Caliph Al Hakim, the latter's name was thenceforth placed on coins. When Mohammed died campaigning in Sind during 752 the army elected Mohammed's cousin Firoz as Sultan. Firoz returned to Delhi where the locally appointed Sultan, Mahmud ibn Mohammed, resigned. Firoz retained the throne until 790, losing Khandesh (772) in the meantime. During the course of his reign Firoz reduced the strength of the army and this contributed to a new wave of secession during the reigns of his less competent successors. Juanpur became an independant Sultanate in 796 (AD 1394), Gujarat in 799 (AD 1396) and Malwa in 804 (AD 1401). The weakness of the army also aggravated the devastation wrought by Timur when he invaded north-western India in 801-2 (AD 1398-9), campaigning as far as Delhi. The Timurid menace was relieved by his death in 807 but it had reduced the Delhi Sultanate to a state of anarchy.

D) The Sayyids and the Lodis — AH 817 - 930

The anarchy produced by the weakness of later Tughluqid Sultans, the loss of so many provinces as they became independant Sultanates and the inroads of Timur, left the Delhi Sultanate a weak and impoverished shadow of its former self throughout the century of the Sayyids and the Lodis, a century that ended with another invasion from Afghanistan, that of Baber in 930 (AD 1526).

E) The Suris (Afghans) AH 945 - 962

Political intrigue in the impoverished Delhi Sultanate was brought to a sudden end in 930 (AD 1526) by Baber's conquest. Baber, a grandson of the Timurid Sultan Abu Sa'id, who was himself a great-grandson of Timur, had succeeded his father 'Omar Shaykh as governor of the province of Ferghana in 899. Later Baber had marched south and conquered Kabul in 911 (1505). From that base he marched on north-western India in 932 (1526) and occupied the Delhi Sultanate which he continued to rule until his death in 937 (1530). Humayun, son of Baber, sought to retain his father's conquests but was foiled by the military successes of Sher Shah who had recently made himself master of Bihar on the east coast of India. Sher Shah expelled Humayun from Bengal in 946 (1539), a conquest the Moghul had earlier achieved in 944. Sher Shah then defeated Humayun at Kanauj in 947 and proceeded to expel him from Pakistan also. Sher Shah thus re-constituted a Delhi Sultanate that stretched from the north-west frontier region of Pakistan as far as the mouth of the river Ganges, the first time for two centuries that Bengal had been ruled by the Delhi Sultan. Sher Shah reformed the currency, abandoning billon and re-introducing a basic silver unit with subsidiary copper. His new silver unit was the Rupee of 11.6 grammes. The copper unit was the Dam (paissa) weighing approximately 21 grammes and worth 1/40 th. of a rupee; both these units slightly heavier than those struck during Akbar's reign. Sher Shah was succeeded by his son Islam Shah in 952. He maintained the integrity of the realm but it began to fragment during the succeeding reign of his cousin Mohammed 'Adil (960-4: 1552-6); a period when another cousin, Ibrahim II (962) and an uncle, Sikandar III (962) raised the banners of transient revolt. Such disunity permitted Humayun the Moghul to descend again from Afghanistan and recover possession of the Delhi Sultanate. Humayun re-entered Delhi in 962 (1555) and died there the following year. His son Akbar completed the re-conquest by defeating Mohammed 'Adil in 964 (1556).

The Governors, Rebels and Sultans of Bengal

Much of Bengal was conquered and made part of the Delhi Sultanate by the general Mohammed Bakhtiyar Khalji (governor 599-602) during the 590's on behalf of his sovereign Mohammed bin Sam. The remainder of the province was subjugated during the course of the following few years and continued to be administered by governors appointed from Delhi until the time of Balban. A provincial coinage was struck which differed in some respects from the standard Delhi issues: horseman designs being favoured by Mohammed bin Sam (599 - 602) and Iltutmish (607 - 633) while broad flans and a local style and fabric distinguished the later Bengal tankahs of Nasir al din Mahmud (644 - 664) and Balban (664 - 686). After Balban had seized the throne of Delhi he appointed his son Nasir al din Bughra Khan to govern Bengal (681 - 691). Family ties gave Bughra Khan greater autonomy than previous governors and he was able to act as a virtually independant sovereign after his own son Kaiqubad (686 - 689) had been placed on the throne of Delhi. From 686 until 739 Bengal was administered by effectively independant governors belonging to the House of Balban. Bughra Khan (681 - 691) was succeeded by two other sons of Balban, Kay Kawus (691 - 700) and Firoz (702 - 718), and then by four of Balban's grandchildren: one of these, Ghiyath al din Bahadur (710 - 723; 725 - 731) inherited East Bengal from his father Firoz in 710 and added West Bengal from Firoz' other son Bughra Shah (718 - 719) in 719. After Bahadur's retirement in 723 he was re-called to act as regent for Bahram Shah (725 - 739) from 725 until 731. Lakhnauti was separately governed by Nasir al din (723 - 726) and than Kadr Khan (726 - 740) and Satgaon was also seprate (A'zam al Mulk: 724 - 740). Fragmentation of the Bengal administration during the later years of the House of Balban was cured when Mubarak Shah (East Bengal: 739 - 750) and 'Ali Shah (West Bengal: 740 - 746) declared the independance of their states. Then, under the strong arm of 'Ali's usccessor Shams al din Ilyas (West Bengal 740 - 753: all Bengal 753 - 759) Bengal was finally united as an independant Kingdom in 753 (AD 1353) with Firozabad (Panduah) as its capital in place of the earlier capital Lakhnauti. During the next two centuries, until 944, Bengal remained an independant kingdom ruled successively by members of the House of Ilyas and that of Hosayn Shah, apart from two short periods when the rival families of Raja Kans and of the Habshis gained power. In 944 Bengal was conquered by the Moghul king Humayun and the long series of Bengal silver Tankahs came to an end.

Note the relatively consistent and legible script of the reverses on coins from all mints; even the two coins illustrated last (2738-39). On the other hand the obverses of coins struck at Sonargaon tend to be engraved in superior manner to those from Firozabad and the obverses of the last two coins are frankly barbarous. These correlations are most obvious during the middle years of Ilyas' reign (during his early years he had not yet captured Sonargaon and on some of the late Firozabad coins, year 758 particularly, the style of engraving was modified). So far as one can

2731 Firozabad (7)55

2732 Firozabad 755

2733 Firozabad 756

judge there was a tendancy for production of coin within this realm to be controlled from a central mint; the method of control being that the central mint enjoyed a monopoly in the production of reverse dies. These reverse dies were duplicated by hubbing and distributed to the other mints in the realm. Obverse dies, on the other hand, were manufactured locally: hence the marked contrast between well designed reverses and crudely engraved obverses shown by a number of the coins illustrated here. See also the discussion of Samanid Multiple dirhems (supra).

Bengal under the Suris and their succ̣essors **AH 960 - 984**

Bengal, incorporated as a province of the Moghul Empire by Humayun in 944 (AD 1537), became part of the resurgent Sultanate of Sher Shah Suri in 946 when Sher Shah expanded his foothold in Bihar by occupying Bengal from Humayun. Sher Shah restored the Delhi Sultanate which he and his son Islam Shah ruled until the latter's death in 960. Bengal did not accept the nomination of Mohammed 'Adil to the Delhi Sultanate in 960 but became an independant kingdom under the sceptre of Mohammed Sur Ghazi, another member of the Suri family. Bengal remained under the suzerainty of its own Sultans until incorporated within the Moghul Empire by Akbar in 984 (AD 1576). Akbar's suzerainty had already been acknowledged by Sulayman Khan Kararani and his successors. As at Delhi the coinage of the Suris was based on a new series of broad flan silver rupees struck to the new standard of 11.66 grammes.

The Suris

Sher Shah Suri of Delhi and Bengal	946	1539

Madura, the homeland of the Pandyas, was brought within the Delhi Sultanate through the campaigns pursued by Mohammed ibn Tughluq during the reign of his father Tughluq I (720 - 725: 1320 - 1324). To the north of Madura the Deccan had recently been occupied by Malik Kafur, general of the Delhi sultan 'Ala al din Mohammed, shortly after AH 700. Madura's only coinage as part of the Delhi Sultanate was struck by Mohammed ibn Tughluq (725 - 752) as part of his attempt to move the centre of gravity of the Sultanate further southwards, but despite such manoevres Mohammed was unable to prevent Madura from breaking away to form an independant Sultanate in AH 734. The Madura Sultanate endured until 779 (AD 1377) when it was incorporated into the Hindu Kingdom of Vijayanagar.

The Bahmanis of Kulbarga (the Deccan) AH 748 - 933

Not long after the Sultans of Madura had declared independance from the Delhi Sultanate their northern neighbours in the Deccan followed suit and created the Bahmani Sultanate in 748 (AD 1347), during the last years of Mohammed ibn Tughluq. Mohammed had recognised the danger of secession and tried to avert this by moving the capital of the Delhi Sultanate southwards to Deogiri (Daulatabad), but without success. The Bahmani Sultanate founded by an official of the Delhi administration 'Ala al din Hasan Gangu Bahmani (748 - 759) embraced the Deccan from the river Kistna northwards to the River Narbada and across the land from coast to coast. At times his successors received tribute from the Hindu Kingdom of Vijayanagar in the far south. Eventually this powerful realm fragmented as outlying provinces assumed independance from AH 890 onwards: Berar in 890, Bijapur in 895, Ahmadnagar in 896, Bidar in 897 and Golconda in 919. The parent Bahmani dynasty was finally extinguished in 933.

Khwaja Jahan, vizir to the Delhi Sultan Mahmud Shah II Tughluq (795 - 815), founded his own Sultanate centred on Juanpur; a state that was to prosper at the expense of Delhi and Malwa and to control much of Bihar, Oudh and Kanauj. Juanpur was re-united to Delhi by the conquests of Bahlol Shah Lodi in 881, but local resistance did not end until the death of Hussain in 905.

The Sultans of Gujarat AH 799 - 980

Gujarat, away in the west, was one of the last provinces occupied by the Delhi Sultans, a conquest of 'Ala al din Mohammed (695 - 715). Gujarat, like Juanpur and Malwa, its eastern neighbours, assumed independance from Delhi during the Sultanate of Mahmud Shah II Tughluq (795 - 815). Zafar Khan, son of a Rajput and governor of Gujarat since 794, assumed independance in 799. Prosperity was based on possession of the coastline as far as Surat The later Sultans carried on maritime trade with the Portuguese. Ahmad Shah I founded Ahmadabad. His grandson Mohammed occupied Junagadh and Champanir, re-naming the latter Mohammadabad; he also reformed the currency. Bahadur Shah, one of the later rulers, even occupied Malwa for a while. In the end weakening of central authority in favour of the nobility left Gujarat ready for Moghul occupation by Akbar in 980.

Uncertain states of the Gujarat region

Fath al din Jalal Shah fl. 841

AE Fals (c. 4½ gm)

2947 - Obv.: فتح الدنيا و الدين ٨٢١
2948 Rev.: جلال شاه سلطاني

Jalal Shah may have been related to the Jams of Sind who controlled parts of southern Pakistan during the period from the 730's to the 930's and intermarried with the Sultans of Gujarat, their neighbours. (cfr. S. Digby 1972).

The Sultans of Malwa AH 804 - 937

Malwa only became part of the Delhi Sultanate during the reign of Balban (664 - 686). The region recovered its independance when its governor Dilawar revolted against Mahmud Shah II Tughluq of Delhi in 804. Three generations of the House of Dilawar then ruled Malwa until un-seated by Mahmud Khalji, the vizir. Malwa continued to flourish under the Khaljis. The region was later temporarily annexed by Bahadur Shah of Gujarat (937 - 943) and subsequently incorporated by the Moghul Akbar in 968.

Deccan States of the Post - Bahmani Period

During the period from 890 to 918 the Bahmani kingdom of the Deccan was dismembered as successive provinces broke away and formed independant Sultanates. The last relic of Bahmani sovereignty was extinguished in 933.

The Faruqi Sultans of Khandesh **801 - 1009**

This dynasty may be noted here though it is not strictly one of the post-Bahmani states. Malik Raja Faruqi governed Khandesh in the lower Tapti valley, between Gujarat, Malwa and the Bahmanis, on behalf of the Delhi Sultans until he declared independance during the late 790's. His capital was at Burhanpur near Asigarh. The dominance of Gujarat and pressure from other neighbours led to progressive weakness from about 900 until the Moghul conquest.

Kashmir was never a part of the Delhi Sultanate. This Himalayan state was ruled by its own line of Hindu Rajas until Udayana Deva was deposed by his chief minister, a Moslem from Surat named Shah Mirza, in 735 (AD 1334). Coinage does not appear to have been issued in any continuous manner by the Moslem Sultans who ruled the country until the Moghul conquest in 995.

2997 (Kashmir), year 994 ! محمد باد شاه جلال الدين

2998 unc. date and without 'knot'
محمد (باد شاه) جلال الدين اكبر ضرب كاشمير في تارخ شهور...

The Moghul Empire was founded by the conquests of Baber, a son of the semi-autonomous Timurid governor of Ferghana, where he was born in 887 (AD 1482). Baber was a son of 'Omar Shaykh whose father, the Timurid sovereign Abu Sa'id (855 - 872), was himself a grandson of Timur. Baber succeeded his father in Ferghana on the latter's death in 899 but was ousted by an Uzbeg invasion and moved south to Badakhshan which he occupied in 909 (AD 1503). From Badakhshan Baber extended his sway over Kabul (911) and Kandahar (913: 1507). In 932 (AD 1525) Baber traversed the north-west frontier and occupied Lahore. The following year Ibrahim Lodi of Delhi was defeated at Panipat, leaving Baber free to occupy Delhi and Agra. Conquests beyond the confines of the Delhi Sultanate were precluded by Baber's death in 937 (AD 1530). His son Humayun was unable to retain the Sultanate in the face of the rising power of Sher Shah Suri who, from a foothold in Bihar, had occupied Bengal (946: 1539), a province that had only recently been pacified by Humayun (944). From this eastern foothold Sher Shah rapidly recovered the remaining territories of the Delhi Sultanate from Humayun. But some years later the period of disunity in the Sultanate following the death of Islam Shah in 960 left the path open for Humayun's return. Humayun was able to bring the Delhi Sultanate within the Moghul realm again in 962 but he died the next year (963: 1556). Akbar, son of Humayun, acceeded at the age of 14 years in 963 and rapidly consolidated his position with another victory at Panipat which left him undisputed master of a Sultanate that extended from Kabul to the frontier of Bengal. During the course of the next two decades Akbar conquered virtually all the kingdoms that had earlier broken away from the Delhi Sultanate: Malwa (968: 1560), Gujarat (980: 1572), Bengal (984: 1577), Ahmadnagar (1004: 1595) and Khandesh (1008: 1599). Only Bijapur (1097: 1686) and Golconda (1098: 1687), the other two offshoots of the Bahmanis, remained for later Moghuls to conquer. In the north Akbar annexed Kashmir in 995 (1587), a Moslem Sultanate that had never admitted the suzerainty of Delhi, though it had recently been occupied for a few years by Humayun (948 - 960). Incorporation of the Deccan within the Moghul Empire was the achievement of Aurungzeb (1069-1119: 1659-1707). He organised the administration of the Deccan while acting as governor to his father Shah Jahan and extended Moghul conquests during his own reign. Aurungzeb's realm, the Moghul Empire at its apogee, extended from Kabul to Mazulipatam - Madras and from Calcutta to Bijapur. But even at this period Aurungzeb's hold on the southern Deccan was incomplete outside the main centres of population and much of the countryside was held by the Marathas. From the time of Aurungzeb's death in 1707 the Moghul Empire weakened under a succession of impotent rulers and effective control by the central government was lost to increasingly powerful local influences: the Marathas, the Jats, the Sikhs and others. This situation was not helped by the Persian invasion of Nadir Shah in 1738 (1151) and by his Afghan successors, the Durranis, during succeeding years. By the 1770's little remained of the Moghul Empire though the theoretical suzerainty of its Sultan was maintained as a polite fiction in many states that were effectively independant and his suzerainty was also acknowledged in the increasingly extensive domains of the East India Company. The fiction only ended with the suppression of the Indian mutiny in 1857.

3331 Kanyabat (Cambay) 114x, yr. 10 کنیابت

3332 Kora 1135, yr. 5 کورا

Mohammed's Moghul realm was invaded by Nadir Shah of Persia in 1738. The Persians progressed as far as Delhi but only retained control of Northern Pakistan and the Punjab. These provinces, together with Sind and Kashmir, soon became the eastern region of Ahmad Shah Durrani's new Afghan realm. He had usurped the east Persian provinces on the death of Nadir Shah. Ahmad Shah Durrani's further pretensions of eastern conquest were checked by Mohammed at the battle of Sarhind in 1748 but the Afghans remained in control of Sind, the Punjab and Kashmir. Meanwhile the Marathas, expanding from the Deccan, consolidated their occupation of Malwa during the 1730's and were able to

blockade Delhi in 1736. By 1750 the Marathas dominated all lands below the River Jumna and extended their authority (in some cases transiently) over the towns of Agra, Etawa and Allahabad which lay near this river. Gujarat remained for a while under a Moghul governor. During this period of unrest Rajputana acquired effective independance as local states

which still gave titular acknowledgment to the Moghul sovereign: Jaisalmir (west), Mewar Udaipur (south), Jodhpur (south), Jaipur (north) and Bhartpur (north) were the major states at this period. In 1761 the Marathas expanding northwards and the Afghans expanding southwards met in battle at Panipat near Delhi. The Moghul Emperor was now of little political account. Weakened after their defeat of 1761 the Marathas consolidated their control over Malwa but did not pursue their endeavours further north.

Indian Moghul - succession States

I/ The Maratha States

The Maratha chief Sivaji assumed independance in 1657 during the last days of the Moghul Emperor Shah Jahan and was not subdued by Shah Jahan's successor, the most powerful of the Moghuls, Aurungzeb Alamgir (1658 - 1707). Sivaji established himself at Satara in western Central India between Bijapur and Bombay. During the ensuing century the Marathas occupied the remaining coastlands of western Central India, establishing Confederate States throughout the valley of the River Narbada (Baroda, Indore, Gwalior) and eastwards down the valley of the Mahanadi river (Bhonsla Rajas) as far as the east coast. In this way the Maratha States of Central India came to separate the Moghuls of the Ganges valley from the Nizams who now controlled the Deccan. The Maratha Sultan retained his seat at Satara but real power was now exercised by his Chief Minister, the Peshwa, who resided at Poona. During the course of the 18 th. century the various states of the Maratha Confederacy developed effective autonomy which they retained until British conquests dissected the Confederacy piece by piece during the period 1775 to 1818.

Although the Marathas were Hindus, and often fanatically so, their coinage, with the exception of that struck in the southern provinces of Satara and Tanjore, was essentially Moghul in inspiration. From the 18 th. century onwards the Marathas issued "Moghul" rupees bearing standard Moghul inscriptions. These are often only distinguishable from true Moghul issues by a knowledge that the particular mint concerned was under Maratha control at the time, ot by a specifically Maratha form of symbol placed in the coin field, or again by bearing the fossilised inscription of a deceased Moghul Emperor. As time went on the coins of the various Maratha states tended, like that struck in other local states, to diverge further and further away from Moghul prototypes. In many instances the perpetuation of Moghul coin legends only ended with the Indian Mutiny (1857).

The Maratha coin series represented here are : -

a) The Major Maratha coin series of Western Central India : -
   Coinage of the Maratha sovereign (Satara), of the Peshwa (Poona) and of other mints (Nipani, Kalyan)
b) The Nawabs of Surat, Broach and Ahmadabad
c) The Marathas in Eastern Central India : -
   The Bhonsla Rajas of Nagpur and Cuttack
d) The Marathas in Penninsular India : -
   The Marathas of Tanjore
e) Transient Maratha conquests north of the river Jumna (AD 1740's - 1761) : -
   Anwala, Etawa, Kalpi, Patna
f) Maratha Confederate coinage of Malwa and adjacent regions before establishment of local Maratha states: c. 1730's - 1790's
   Ravishnagar-Saugor
g) Maratha states and their neighbours in Malwa and adjacent regions: c. 1780's - 1947

1. West Malwa and environs : -	The Gaikwars of Baroda
	The Holkars of Indore
2. Lesser states near Indore : -	Banswara, Dhar, Jaora, Ratlam
3. East Malwa and environs : -	The Sindhias of Gwalior
	The Begums of Bhopal
4. Lesser states incorporated by Gwalior : -	Bajranggarh, Narwar, Saugor
5. Lesser states near Gwalior : -	Bijawar, Chhatarpur, Datia, Orchha

The Gaikwar of Baroda acknowledged British suzerainty in 1801 and was followed by the Peshwa in 1802, the Bhonsla Raja of Nagpur in 1803 and the Sindhia of Gwalior in 1804. The rising of 1817 that comprised the last Maratha war was led by the Holkar of Indore and ended in destruction of the armies of the Holkar, the Peshwa and the Bhonsla Raja with acknowledgement of British supremacy by all Maratha states. The neighbouring states of Bhopal (1817), Orchha (1812), Rewah (1813), Jaora (1818) and Dhar (1819) also accepted British supremacy.

Maratha Sovereigns	
Sivaji I: took title Maharaja in -	1674

The Marathas of Tanjore

Tanjore, in Penninsular India, was the southerly frontier of Maratha influence. Sivaji and his brother Venkaji captured Tanjore from the Nayakas in 1674. Increasing power of the Nizams, of the Nawabs of Arcot and latterly also of the Mysore kings restricted the prosperity of the Tanjore Marathas but their line persisted until the 19th. century.

Venkaji (Ekoji): brother of Sivaji of Satara	1674

3494 AH 1211, yr. 4x and yr. 41

II/ Kutch and Kathiawar

These two penninsulas situated between the mouths of the Indus and the Narbada rivers had never been effectively subdued by the Moghuls following the conquest of Gujarat in 1572 (AH 980). Kutch, the more westerly part of this region, dates the foundation of its Kingdom from the 15 th. century AD but Ǹawanagar and Porbander in Kathiawar were founded in the debris of the Gujarat Sultanate during the 16 th. century.

The States in Kathiawar and Kutch represented here are : -

Western Penninsula	Kutch	(founded 15 th, century AD)
Eastern Penninsula	Nawanagar	(founded 16 th, century AD)
	Porbander	(founded 16 th. century AD)
	Junagadh	(founded 18 th. century AD)
North	Radhanpur	(founded 1723: rulers elevated to rank of Nawab during 1750's)

Nawanagar

III/ The States of Rajputana

The region of western India known as Rajputana was bounded in the east by the Delhi region which remained under the control of the Moghul Emperor, in the south-east by the Maratha states of Malwa and in the south by the states on the Kutch and Kathiawar penninsulas. To the west of Rajputana the Mirs of Sind assumed independance from the Afghans while to the north the domination of the Afghans gave way to that of the Sikhs. If one were to select two dates that summarise the evolution towards practical independance in the Rajput states these would be AD 1738 (AH 1151) and 1761 (AH 1175). In 1738 north-west India was invaded by Nadir Shah of Persia and Delhi sacked. In 1761 the Afghans, expanding from the north, and the Marathas, expanding from the south, met in the vicinity of Delhi at the battle of Panipat: the Moghul Emperor being little more than a pawn situated between these two major powers. As the Moghul Emperor declined to the position of an impotent titular head of his realm so local dignitaries began carving out their own states in Rajputana, usually retaining nominal allegiance to the Moghul sovereign. One of the first states in this region to assume independance was Jaisalmir in western Rajputana which became autonomous during the late 1740's under Ackey Singh (1722-62). The Jaisalmir mint was opened in 1756 and recieved sanction from the Emperor during the following decade. By the early 1750's numerous states were exercising their autonomy in Rajputana, dominated by Jaipur and Bhartpur in the north-east and by Jodhpur and Mewar Udaipur in the south-east. British Protectorate was established in 1818, following the last Maratha war.

Rulers of the Five Major states

Jaipur	
Sawai Jai Singh	1699
Jaipur city founded as capital in 1728	
Isvari Singh	1743
Madho Singh	1760
Prithi Singh	1778
Pratap Singh	1778
Jagat Singh	1803
Mohan Singh	1818
British Protectorate from 1818	
Jai Singh	1819
Ram Singh	1835
Madho Singh	1880
Man Singh II	1922 - 1949

The Jats of Bhartpur	
Badan Singh	1723
Suraj Mal	1756
two mints opened in late 1750's	
Jawahir Singh	1763
Ratan Singh	1768
Keshri Singh	1769
Ranjit Singh	1777
Randhir Singh	1805
British Protectorate from 1818	
Baldeo Singh	1823
Durjan Sal	1825
Balwant Singh	1826
Jaswant Singh	1852 - 1893

Jodhpur	
Abhay Singh	1724
entitled Maharajah from 1728	
Ram Singh	1749
Bakht Singh	1749
Vijaya Singh	1752
mint opened 1761	
Bhim Singh	1793
Man Singh	1803
British Protectorate from 1818	
Takht Singh	1843
Jaswant Singh	1873
Sardar Singh	1895
Sumar Singh	1911
Umaid Singh	1918
Hanwant Singh	1947 only

Mewar Udaipur	
Amar Singh II	1699
mint opened 1707/12	
Sangram Singh II	1711
Jagat Singh II	1734
Pratap Singh II	1752
Raj Singh II	1754
Ari Singh III	1761
Hamir Singh II	1773
Bhim Singh II	1778
British Protectorate from 1818	
Jawan Singh	1828
Sirdar Singh	1838
Swarup Singh	1842
Shambhu Singh	1861
Sajjan Singh	1874
Fatteh Singh	1884
Bhupal Singh	1930 - 1948

Jaisalmir	
Akhey Singh	1722
Mul Raj	1762
Gaj Singh	1819
Ranjit Singh	1846
Benial Singh	1864

Coins tend to be anonymous issues with Moghul legends until the time of the Indian Mutiny (1857/8) without the local Raja's name or symbols but bearing emblems of the issuing state. After 1858 many issues bear the name of Queen Victoria, often accompanied by that of the local Raja.

The weight of the rupee was maintained at about 11.3 gm. in most of the major states (eg. Jaipur, Jodhpur) but fell to around 10.9 gm (as low as 10.7 gm. in Bundi) in several of the lesser states. An analogous situation existed among the Maratha states of Malwa where, it may be remarked, differences sometimes existed between the weights of rupees struck at different mints within the same state: for instance the rupee of 11.2 gm struck at Ujjain in Gwalior versus the rupee of 10.9 gm conventional at several other mints in Gwalior.

A) The Five Major States of Rajputana

1. West	Jaisalmir
2. North-east	Jaipur, Bhartpur
3. South-east	Jodhpur, Mewar Udaipur

B) The Lesser States of Rajputana

4. West	Bikanir
5. North-east	Kuchawan, Tonk, Alwar, Kishangarh Religious centres of Islamabad-Mathura and Muminabad-Bindraban Bundi, Kotah, Jhalawar
6. South-east	Shahpura, Partabgarh, Rewah

The Five Major States of Rajputana

Jaisalmir (west)

The mint was opened in 1756 (AH 1170). Coins imitated the yr. 22 Delhi (Shahjahanabad) issues of Mohammed Shah and were issued until the time of the Indian Mutiny (1857). Subsequent issues bore Queen Victoria's name and the Jaisalmir mint name was also introduced.

Akhay Singh	1722 - 1762
Mul Raj	1762 - 1819
Gaj Singh	1819 - 1846
Ranjit Singh	1846 - 1864
Benial Singh	1864 -
Anonymous	**1756 - 1857**

AR Rupee (11.1 falling to 10.5 gm)

3533 - AH 1153, yr. 22 of Mohammed Shah

AR Heavy rupee (13 gm) : Machine struck

3597 S. 1994 (= AD 1937)
Fifty year commemorative issue.

Kuchawan (north-east)

Vassals of the Jodhpur Rajas, the territory of Kuchawan was located in north-east Jodhpur, adjoining that of Jaipur. Coins were first struck at Ajmer in AD 1788 (AH 1703: yr. 31 of Shah 'Alam) when that region was transiently subject to Jodhpur. The fossilised design was retained after removal of the mint to Kuchawan.

Alwar (north-east)

The State of Alwar was consolidated during the early 1770's while Marathas, Bhartpur Jats and Jaipur Rajas were feuding. Alwar City was taken from the Jats of Bhartpur in 1776, but meanwhile the Alwar mint had been opened at Rajgarh in 1772. It functioned until 1876 after which Alwar's coins were struck at Calcutta.

The Religious centres of Islamabad-Mathura & Muminabad-Bindraban

These two adjacent towns south of Delhi were situated on the border between the domains of the Moghul at Delhi, the Jat Raja at Bhartpur (west) and the Nawab of Awadh (east). These towns were centres of Religious pilgrimage, Mathura having been a Religious focus for over two millenia. Coins of these autonomous Religious centres show recognition of all three powerful neighbours: the Moghul, the Jat & the Nawab.

Kotah (East)

Adjacent to Bundi. The Rajput clan that ruled Bundi, Kotah and Jhalawar was decended from the Chauhuan Rajputs who controlled this region before the Moslem conquest. Members of this Rajput clan continued to govern under the suzerainty of successive Moslem Sultans and in AD 1578 their domain was split between the senior branch of the clan under the leadership of Rao Ratan which retained Bundi and a lesser branch of the clan led by Madho Singh, a son of Rao Ratan, which thenceforth governed Kotah. Somewhat later, in 1837, the Jhalawar line was founded as an offshoot from Kotah.

Locally struck rupees of uncertain attribution

Nineteenth century writings (eg. Webb 1893) refer both to contemporary forgeries of State rupees and also to various states having, according to the State records, commenced issuing their own rupees at dates well prior to any extant specimens. Thus the State of Mewar is said to have been authorised to issue its own coins from the time of Jahangir though the earliest recorded coins bear legends of Shah 'Alam Bahadur. It is therefore not surprising that one encounters rupees that do not conform to the pattern of any state. The two specimens shown here are probably 19th. century un-official productions of a local shroff.

IV/ Awadh in the Ganges valley

Awadh (Oudh), centred on Banares and Lucknow in in the middle Ganges valley, was governed by Nawabs of Persian descent from 1720. They lost the Banares region to the East India Company in 1775 (year 17 of Shah 'Alam) and moved their capital (and their mint) to Lucknow which was thenceforth called 'Mohammadabad Banares'. By this time the Nawabs of Awadh were virtually independant of their Moghul sovereign Shah 'Alam II but it was not until 1819 (AH 1234) that the Nawab Ghaziu al din Haidar declared himself King. Awadh was annexed by the British in 1856/8 following the Indian mutiny.

The Chand Rajas of Garhwal

The principality of Garhwal lay in the Himalayan foothills between Nepal and the Punjab. It was intermittently subject to more powerful neighbours. Garhwal was nominally subject to the Moghuls until AD 1803 when it was occupied by the Nepalese. In 1815 the British annexed Garhwal.

VI/ The Nizams of the Deccan (The Nizams of Hyderabad)

Asaf Jah, appointed vizir to the Moghul Emperor Mohammed (AD 1719 - 1748) in 1722, returned in 1724 to his former governorship in the Deccan and then declared himself independant, so founding the state of Nizam, or Hyderabad. The year AD 1748 saw the deaths of the Moghul Emperor Mohammed Shah, of the Nizam Asaf Jah and of his neighbour Shahou, chief of the Marathas (real Maratha power was now in the hands of the Peshwa Balaji Rao). Coins of the Nizams were struck in the name of the Moghul Emperor until AH 1278 (AD 1861) when a coin legend was introduced citing the founder of the kingdom, Asaf Jah.

The Nawabs of the Carnatic (Nawabs of Arcot)

Zulfiqar 'Ali Khan was appointed Nawab of the Carnatic, with his seat at Arcot, by the Moghul Emperor Aurungzeb in 1690. From the time when their northern neighbours, the Nizams of the Deccan, declared independance (1724) the Nawabs of Arcot were also effectively independant though the name of the Moghul Emperor was still (sometimes) retained on their coins until the time of Shah 'Alam II (AH 1214). At the height of their power these Nawabs authorised the French and British trading establishments in their domains, but later they were forced to accept British suzerainty though they retained their seat at Arcot until 1825.

Some European Colonial coins struck in the Moghul style and fabric.

By and large the European style coinage of the Colonial powers was struck for circulation within their own trading enclaves while their native style coinage was struck for purposes of commerce with the mainland of India. This native style coinage appears in two main forms, the Hindu and the Moghul. The Hindu issues struck in Penninsular India were modelled on those of the defunct Vijayanagar Kingdom and of its successors and did not require sanction from the Moghul Emperor for their emission. On the other hand, Moghul style coinage that could be used for trade in the Deccan and Northern India did require authorisation from the Moghul Emperor and it was not until the 18th. century that such permission was obtained by the British and then the French.

A) Portugal

Portuguese coinage in India was European in general form, though often crude in execution, and provided for currency needs within the colony and between colonies, rather than supplying any requirement for trade with the Moghul Empire. The Portuguese opened a mint at Goa very soon after conquest in 1510 and this remained active until relatively recently. Coins struck in gold, silver and copper bore European designs. Following some early issues the gold (3 gm) and silver St. Thomé, named after the effigy of this Saint, were introduced in 1549-50 and the copper Bazaruco in 1545. The silver Patagon of 17 gm. and its half; the silver Double Tanga of 4.4 gm. and the Tanga formed the basic silver denominations from the late 16th. century. During the 17th. century the silver Xerafim of 11.7 gm. (later falling to 10.8 gm), bearing Portuguese shield/cross designs, was introduced for tarriffing against Moghul rupees within the colony. Then in 1726 the Xerafim was devalued and superceded by the Rupia of 11.8 gm. bearing the sovereign's bust. Up the west Indian coast the Portuguese also struck coins at Bassein, Damao and Diu. A mint was opened at Bassein, 30 miles north of Bombay about 1611 (closed 1697) but most of its coins were struck jointly with either Damao (D-B on coins: 1697-1750) or Chaul (B-C on coins: 1646-54). The Marathas took Bassein and Chaul in 1740. Damao itself struck a few coins during the years following 1611 and during the years 1697 to 1750 for the joint coinage with Bassein (D-B). The Damao mint was also open during the 19th. century. Diu, on the Gulf of Cambay, was acquired by the Portuguese in 1535 but did not commence striking its own coins until 1684/5. Silver Xerafims of 11.7 gm. (declining to 10.5) bearing shield/cross designs and worth 300 reis were struck until 1725 when the Xerafim was devalued and replaced by a silver Rupia, also bearing shield/cross designs, weighing 11.5 gm and valued at two xerafims.

B) France

The French created their first "India Company" in 1642, but after initial success and subsequent failure a new "East India Company" was organised in 1664. In 1720 this amalgamated with their West India Company to become the "Perpetual Company of the Indies". Early coinage was struck in South India, modelled basically on the gold coinage of the recently deceased Penninsular Hindu Kingdom of Vijayanagar. Metrologically related coins bearing such French designs as the Lis circulated within the French enclaves. In 1736 the French acquired permission from the Moghul Emperor to strike rupees of Moghul type. These were issued from Pondicherry and bore the Arcot mint name with an added crescent symbol and the legends of the ruling Moghul Emperor. They were issued from 1736 until 1839, except for the period of English occupation between 1793 and 1816. An analogous series of French rupees was struck at Mazulipatam (trident symbol). Silver coins were also struck at Pondicherry for use in the settlement of Mahé; these resembled the normal Pondicherry coinage except for the fanams which named the French Company (Frans Kumpany/Bhucheri + date). From 1739 the French issued rupees with a Jasmin flower symbol from the mint of Murshidabad in Bengal and from 1749 a further series of rupees was struck at Surat.

C) Netherlands

The Dutch, with settlemtents in South India and Ceylon, struck no Moghul style coinage. Most Dutch issues were either European or Hindu in concept though some issues, such as the Pulicat coppers, bore reverse legends written in Arabic script and some rupees struck in Ceylon bore legends in Persian. The Dutch also countermarked a variety of current silver coins, notably Persian Abbasis and Portuguese Tangas, with the Company monogram - VOC (Vereenigde Oostindische Compagnie) - for use in their settlements.

D) Denmark

The Danes also struck no Moghul style coinage. Most of the coins issued in their south Indian colony of Tranquebar were small silver (1670-1818), copper (1667-1845) and lead (1640-1699) pieces bearing European designs, usually with a regal monogram on one side and often bearing the Danish East India Company monogram on the other side. A few gold pagodas were issued bearing the Danish royal monogram on one side and a Hindu type, either a deity or the initial of Haider 'Ali (Mysore), on the other face.

E) England

The English began trading in India in 1591 and a Royal Charter was given to the East India Company in 1600. Silver Portcullis testoons equivalent to 8 Spanish reales, and fractions thereof, were struck in England for the Company in 1600, but they proved un-acceptable in the east and were withdrawn. The East India Company acquired Madras in 1639. Bombay, which replaced an earlier trading post at Surat on the mainland, was acquired from the Portuguese in 1661 and Fort William, by Calcutta, became theirs in 1690. European style coins for use within these various colonies were struck at Bombay and Madras from the time of Charles II and Hindu style gold pagodas, which did not require Moghul sanction, were issued for more widespread trade in the Penninsula. Issues of Moghul style rupees for trade in the Deccan and northern India were sanctioned by the Moghul Emperor Farrukhsiyar (1713 - 1719). From that time until the reign of Shah 'Alam the East India Company struck Moghul rupees at Bombay (Mumbai). During earlier years the Company had imitated the Moghul coinage of Surat but there was nothing on their coins to distinguish them from the official Moghul productions. Only the late Surat productions of the Company can be defined by their fossilised "Year 46 of Shah 'Alam" design and, latterly, by an additional (fossilised) European date, 1825. The East India Company had also struck rupees at Madras (Chinapatam) during the last years of Aurungzeb and the early years of Shah 'Alam Bahadur, usually bearing the Company's star symbol. Continuous emmission of Company rupees in the south commenced during the reign of Ahmad Shah Bahadur (1748-52) and took the form of an "Arcot" coinage bearing the Company's lotus symbol. Company conquests during the 1770's brought new mints into operation in Bengal; Banares which was acquired from the Nawab of Awadh in 1775 (AH 1190, year 17 of Shah 'Alam) and Murshidabad which was conquered from the French in 1777 (AH 1192, year 19 of Shah 'Alam). East India Company emissions from these two mints retained the date of acquisition as part of the traditional coin design: year 17 and the Nawab's Fish symbol on the Banares coins and year 19 combined with the French Flower symbol on the Murshidabad coinage.

Portugal

Diu

One of their northern entrepots on the Gulf of Cambay and also on the threshold of the Moghul Empire. Creation of a local rupee sized denomination was a consequence of influx of Moghul coins into the colony. This was the closest approach to Moghul style coinage by the Portuguese.

Traditional design and date used until the introduction of machine struck coins in 1807.

e) Moghul style machine struck rupees

Machine striking of rupees was initiated in the four chief series during the period 1792 to 1807.

Surat

3785 - Surat: traditional yr. 46 of Shah 'Alam design
3786 standard date 1215 (= AD 1800)

Murshidabad

3787 - Murshidabad: traditional yr. 19 of Shah 'Alam
3788

Struck with oblique milling 1792-1818 at Calcutta, Dacca, Murshidabad & Patna: with vertical milling 1819-30 at Calcutta and with plain edge + rim 1830-33 at Calcutta.

Farrukhabad

Ceded by the Nawab of Awadh to the East India Co. in AH 1217, yr. 45 of Shah 'Alam (AD 1802). For previous Moghul issues until yr. 39 vide supra.

3789 - Farrukhabad: traditional yr. 45 of Shah 'Alam
3791

Struck with oblique milling 1806-19 at Farrukhabad and Calcutta, with vertical milling 1820-31 additionally at Saugor and with plain edge + rim 1831-35 at Calcutta.

Madras

3792 "Arcot": traditional 1172, yr. 6 of 'Alamgir II
Symbol: Lotus indicating Madras mint

Struck with open lotus and oblique milling 1807, with indented cord milling 1812-17 and with closed lotus 1817-35

3793 - "Arcot" same design
3794 Symbol: Rose indicating Calcutta mint

Struck with rose symbol only 1823-25 and with rose + crescent 1830-35.

A uniform East India Company coinage for use throughout India, bearing European designs, was introduced in 1835.

States in the far North and the far South of India that were never subject to the Moghuls but used Arabic script on some coins

A) North

The Ahom Kingdom of Assam

Most Assamese coins struck in this Hindu Kingdom bear Devanagari inscriptions (from AD 1611) but a few, mainly early, issues (AD 1539 - 1751) are inscribed in Ahom and some coins (18 th. century) bear Persian legends based on Moghul prototypes. During the late 18 th. century the western province of Rangpur, which should be distinguished from another Rangpur where some Moghul inspired coins were struck, became an independant Kingdom for a few decades until it was absorbed by the East India Company and incorporated into their province of Bengal. The rest of the Ahom kingdom was subjected to Burma from 1816 until 1824 and then occupied by the British in 1825. Only two mint names appear on the coinage, Rangpur and Gargaon. These were adjacent towns in central Assam, each in its turn the capital of the Ahom kingdom.

B) South

During the 17 th. century and the first half of the 18 th. century the political vacuum in Penninsular India left by the demise of Vijayanagar was filled by numerous families of Nayakas and other local principalities. The Moghuls, Aurungzeb (1659-1707) especially, took advantage to extend their domains southwards to Northern Mysore and Arcot. But from the mid. 18 th. century power became progressively vested in four major realms: in the centre the Kingdom of Mysore which became powerful under Haidar 'Ali (1761-1782), in the west the Rajas of Travancore, in the east the Nawabs of Arcot and to the north the Nizams of the Deccan. These four powers restricted the Marathas, who had extended their domains southwards to Tanjore where they were to retain an isolated foothold until the 19 th. century. The four major powers also progressively suppressed the remaining Nayakas and most other local Rajas. The growth of Moghul domains had brought Islam southwards to Arcot and Mysore during the decades around AD 1700. The influence of Islam has already been noted in the coinage struck by the Nawabs of Arcot and by the Marathas of Tanjore. When Mysore grew powerful under Haidar 'Ali, who took northern Mysore (Bellary captured 1779) from the Nizams, this ruler adopted Islam. But Haidar 'Ali and his son Tipu Sultan were the only Islamic rulers of Mysore. Hinduism then returned to Mysore in the person of Krishna Raja Wodeyar (1799 - 1868).

The Maldive Islands

The early coinage of silver larins (vide supra) gave way to flat silver, then billon and lastly copper coins whose denomination was also called 'Larin'. The common unit, which weighs about 9½ grammes was probably a double larin. The Maldive Islands accepted British Protectorate in 1887 and were subsequently administered alongside Ceylon.

Islam in South - east Asia

Much of Malaysia and Indonesia was dominated by the Hindu Sailendra Kingdom of Srivijaya during the 10 th. century AD. Srivijaya, with its capital at Palembang in south-eastern Sumatra, had risen to prominance as a maritime trading kingdom in the 7 th century and during the ensuing two centuries had extended its sway over the islands of Sumatra and Bangka and had reduced most of the Malay Peninsula to the rank of vassal states. Pahang, so named for its tin mines,was then the most important of these Malay states.Only the Kingdom of Java retained sufficient power to oppose and to campaign against Srivijaya, but this east Javanese kingdom of Dharavamsa was crushed about AD 1006. The rise of another maritime power, that of the Cholas in Peninsular India led to conflict that culminated in a crushing Srivijayan defeat in AD 1025. Srivijaya then entered a period of slow decline to the benefit of Kediri (Eastern Java) and of Srivijaya's erstwhile vassals. During the 13 th. century Ligor (Tambralinga) in Malaya was an independant kingdom. The period of the Mongol dynasty in China (1278 - 1367) saw an expansion of Chinese maritime commerce which reacted adversely on the local commerce of the Indonesian island states. About this time Northern Malaya, including Ligor, came under the sway of the new Thai Kingdom of Sukothai. Then Java, Sumatra, Southern Malaya and coastal Borneo fell under the commercial dominance of the new East Javan Kingdom of Majopahit (c. 1293 - 1520) and a number of local states in these regions began to pay tribute.

Islam entered South-east Asia by way of trade when proselytising gave rise to Islamic enclaves. The first Moslem Sultanate was founded at Samudra, near Atchih in northern Sumatra, during the 1290's AD. The tombstone of Samudra's first Islamic sultan, Malik Al Saleh, is dated to AD 1297 and was imported from Gujarat in western India. In the Malay Peninsula Islam was not widely accepted until the 15 th. century when Malacca was moulded into a powerful commercial state by Paramesvara, alias Megat Iskander Shah (c. 1403 - 1424), the first Moslem sultan in the Malay Peninsula. Malacca, now independant both of Siam (Ayuthian Kingdom) and of Java (Majopahit) and also benefitting from Chinese support, dominated trade through the Straits that lie between Malaya and Sumatra. By 1450 Kedah, Trengganu, Pahang, Johore, Kanpar, Bangkalis and the Coriman Islands were all subject to Malacca. During the late 15 th. century most of these vassal states acquired Moslem Sultans from Malacca and more distant states dominated by Malacca's commercial influence also accepted Islam, including Brunei in northern Borneo where an Islamic Sultanate was established about AD 1500. These various young Sultanates became autonomous in 1511 when the political situation was profoundly modified by the Portuguese conquest of Malacca. Another consequence of the Portuguese conquest was an exodus of traders from Malacca, across the Straits, to Atchih (N. Sumatra), raising this Sultanate to an important commercial position.

Further to the east the fall of the Kingdom of Majopahit (1520) was followed by a shift of dominance from eastern to western Java with the establishment of Kingdoms at Cheribon and Bantam during the 1550's. But these new Kingdoms were soon eclipsed by the rise of Mataram in southern Java at the end of the 16th. century. Mataram grew powerful under Sultan Agung (1613 - 1645) whose realm embraced most of Java and the Banjarmasin region of southern Borneo, though he was not able to overcome either Bantam or the island of Bali. The Dutch, established at Batavia on Java's north-west coast from 1619, progressively extended their dominion over the island until Mataram was reduced to a shadow of its former self by the early 1700's.

In the west there was rivaly between the two dominant Sultanates of Johore (Mainland) and Atchih (Sumatra) during much of the 16 th. century, lesser roles being played by Perak and Pahang, while somewhat more important roles were played by the Portuguese and the Dutch. At its apogee under Iskandar Shah (1607 - 36) Atchih occupied Pahang (1618), Kedah (1619) and Perak (1620) but its fleet was crushed by the combined fleets of Malacca (Portugal), Johore and Patani in 1629. Thereafter Atchih declined and dominance passed, for a while, to Johore which flourished under Abd Al Jalil (1623 - 1677). In the meantime commercial dominance passed to the Dutch and later to the British.

Pre - Islamic Coinage of Malaya - Indonesia

Namo currency of Srivijaya **circa AD 900 - 1250**

These small coins are found from southern Thailand, through Malaya to Sumatra. Their fabric is characteristically dumpy, often bean shaped, as befits precursors of the Thai bullet money that was later to be issued further north. Most Namo issues bear the Nagari character 'Na' on one side.

AR *Unit (c. 2.3 gm: silver sometimes debased)*

3878 obv. : Na
rev. : cleft

3879 sim. but rev. : sun

3880 sim. but rev. : flower

AR *Half Unit (1.0 gm)*

3885 Obv.: 'Na' in different, & probably earlier. script form
Rev.: cleft

Emblem currency of Majopahit **circa AD 1293 - 1520**

A group of silver, rarely gold, coins bearing a characteristic emblem (perhaps representing a flower) within a rectangular punch on one side and a poorly struck Nagari character, usually 'Ma' on the other side. Most coins of this class resemble those illustrated below but smaller gold coins and larger silver coins were also issued. These coins are found in Java, Sumatra, Malaya and the Phillipines.

AR *Unit (c. 2.3 gm)*

3886 - 3888 obv. : floral pattern within rectangular incuse

3897 Beled Kedah 1154 (AD 1741)

سلطان محمد جيو خليفه الرحمن
بلد قده دار الامان سنه ١١٥٤

The Malay Peninsula after circa AD 1750

The great increase in tin mining, especially during the 19th century, led both to an increased output of tin coinage and also to an influx of Chinese miners and traders and to growth of Chinese commerce. The result was a dual production of tin coinage. The Sultans tended to issue circular tin pitjis bearing circular holes in the centre while the Chinese mining companies, under license from the Sultan, struck various forms of tin coinage (Jokoh) that often bore Chinese inscriptions.

Northern States

The states of Patalung and Singgora were often under Siamese suzerainty

Patalung

Tin Bia (1/400 th. dollar : c. 8½ gm)

3898 - 3900 obv. : in Siamese : Pata-Lung พัทลุง

3960 Beled Palembang 1(2)19 - (1804)
Uniface, octagonal مصروف ع بلد فلمبع
(Millies XIX, 194)

Island of Bangka

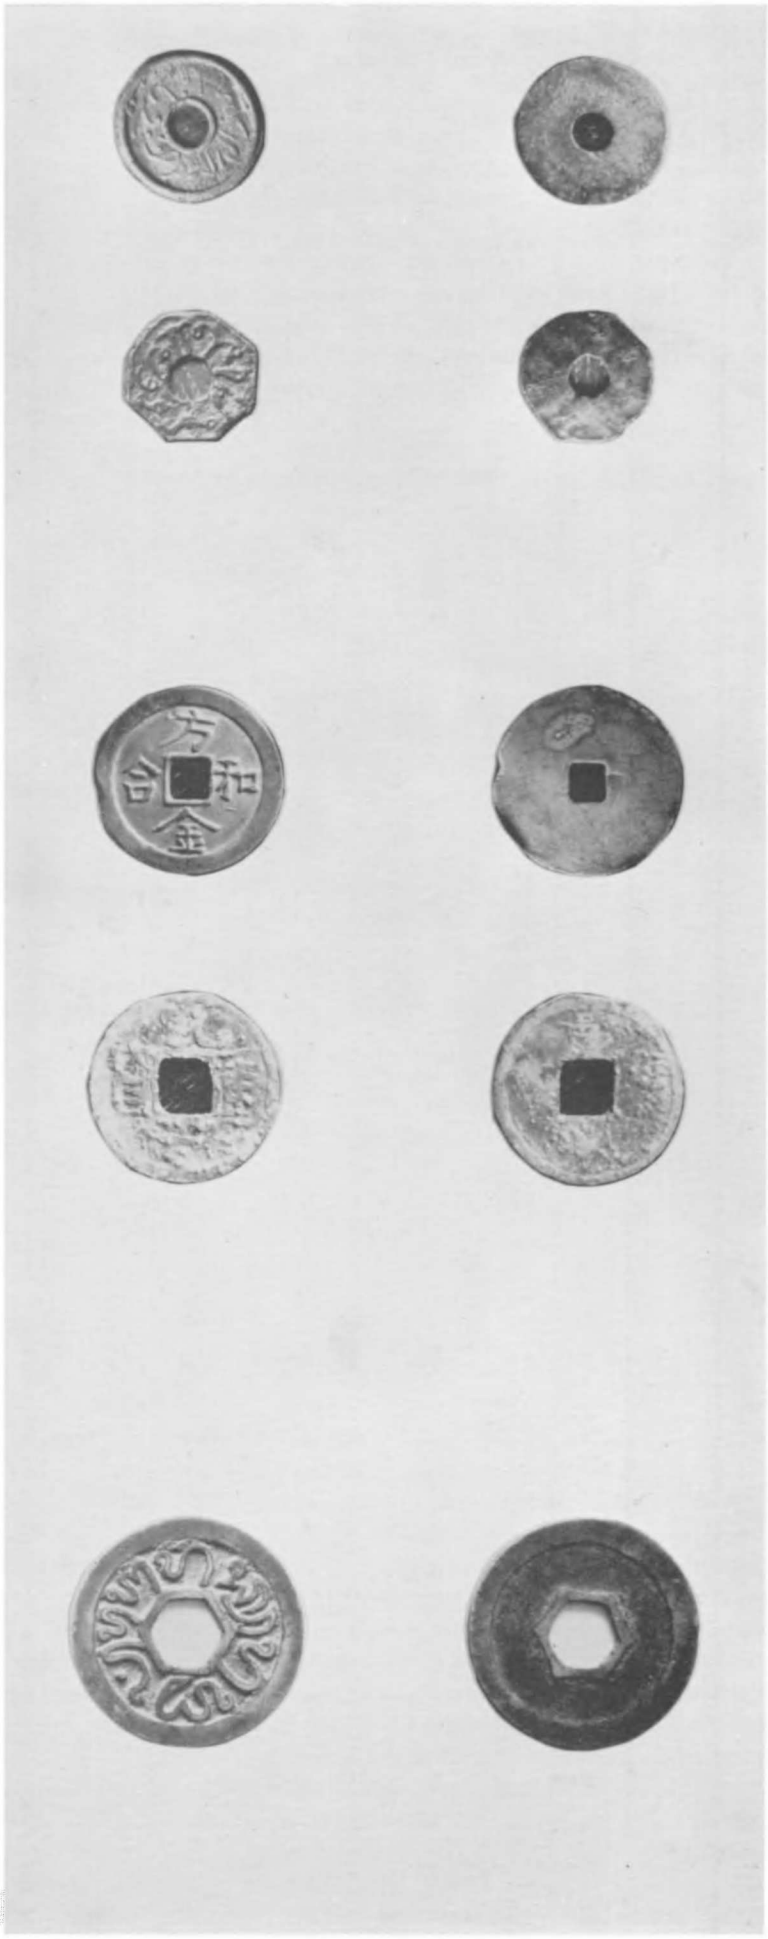
Bangka lies off the north-east coast of Sumatra. Its tin mines were exploited from about AD 1710, largely by the Chinese.

Tin *Pitji*

3961 Fohak 方金和合
"Round precious (currency of) Ho Hap"
A Chinese mining community on Bangka

For other coins of Fohak see Millies XX, 212 & 214: XXI, 223

3962 Uncertain name
x x T'ung Pao
"The Universal Currency of ....."
This postscript, copied from Chinese coinage, was used by a number of the mining communities on Bangka but does not appear to have been used in either Malaya or Borneo, the other regions where tin coinage of this kind was issued.



Java

Bantam **c. 1526 - 1687**

The issue catalogued below was struck between the expansion of the Bantam Sultanate during the 1550's and the domination of Mataran from c. 1620. Later coins of Bantam bear Arabic legends, initially with the same regal title, Pangeran Ratou.

Pangeran Ratou **c. 1550 - 1596**

Copper cash (c. 5½ gm)
3963 obv. : Pangeran Ratou in Javanese script
rev. : blank
(Millies XIV, 112). Three Sultans of Bantam bore this title :-
Pangeran Sebakinking (Maulana Hasan al din) c. 1550 - 70
Pangeran Paseran (Maulana Yusup) 1570 - 80
Pangeran Sedangrana (Maulana Muhamjad) 1580 - 96

Mataram **1582 - 1755**

The characteristic pictorial coinage of Java was probably struck in the Kingdom of Mataram. Inclusion of the Kalima on some issues dates them after the early 16 th. century.

Copper (126 gm but most smaller)

3964 obv. : Warrior and two dragons

rev. : Kalima in stylised Arabic

لا اله الا الله محمد رسول الله

(Millies XII, 96 also bears a Kalima in stylised Arabic script)

Islamic style coinage struck in Malaya & Indonesia by the European colonising powers

The four main European trading nations involved were the Portuguese, the Spanish, the Dutch and the English. During the early years of the East Indies trade (16 th. century AD) the Spanish and the Portuguese vied for dominance. The Portuguese established an eastern base at Malacca in 1511 at a time when the Spanish were consolidating their position in the Philippines and thus it occurred that during much of the 16 th. century the Spanish dominated maritime trade in the eastern islands while the Portuguese enjoyed the hegemony of maritime trade in the western basin. By the turn of the century the Portuguese had extended their maritime dominance over most of Indonesia, virtually restricting the Spanish to the Philippines; but Portuguese prosperity was short-lived due to the coming of the Dutch whose East India Company was established in 1602. The Dutch base at Batavia on the Island of Java was occupied in 1619 and the rest of western Java settled during the remainder of the 17 th. century. During the same period the Dutch ousted their European rivals from maritime trade with the neighbouring islands and extended their sway as far east as the Moluccas. But from the late 18 th. century the Dutch had to contend with the English whose aspirations became more practical after they had acquired the island of Penang (Prince of Wales Island) off the Malayan coast in 1786. English dominance in the Malay Penninsula was considerably enhanced by the foundation of Singapore in 1819 though, some while prior to this, they had establsihed themselves at enclaves on the Island of Sumatra and, for a short while, even took Java from the Dutch. Rivalry between English and Dutch was ended by Treaty in 1824 with the Dutch retaining control of the Indonesian Islands and the English retaining the Malay Penninsula.

Coins struck by the Portuguese and the Spanish were basically European in character and, indeed, Spanish coinage actually struck in the east was restricted to the modern period. The Portuguese issues struck at Malacca during their period of occupation from 1511 till 1641 when Malacca was taken by the Dutch, show close affinities with their Indian emissions. The coins consisted primarily of silver tangas and subsidiary tin denominations (Rhodas). The Dutch East India Company, which controlled their eastern possessions from 1602 until dissolved in 1799, commenced striking European style issues at Batavia in 1644. These coins bear the Company's "VOC" (Vereenigde Oostindische Compagnie) monogram but were only struck for a few years. Coinage was not resumed until the late 1740's, this time in the form of native style issues bearing lagends in Malay-Arabic script - the Java rupee and other denominations. Much of the currency used in the course of Dutch maritime trade still consisted of coin struck in the Low Countries for this purpose and exported to the east: some of these specimens were countermarked in Java. The English commenced striking coins at Penang, which was initially administered from Bengal, upon their occupation in 1786: the designs normally combining the East India Company arms on one side with a Malay-Arabic inscription on the other side. Analogous issues were struck for the settlements in Sumatra (1781-88: 1795-1824) and the English also continued to issue the "Java rupee" during their occupation of that island from 1811 till 1816: the last Islamic style coinage of the European powers in Indonesia.

Portugal : Malacca (1511 - 1641)

AR *Tanga (2.33 gm in Ceylon: 3.08 gm in Malacca)*

3965 Undated (c. 1620's - 1631)
Crowned Portuguese coat of arms: beside .....
Rev.: TA monogram (Tanga): below .....

Tangas of this type were struck at Malacca until 1634 and at Goa (for Ceylon) from about 1630 until c. 1645. This issue was probably struck at Goa (G - A obv.) for Ceylon (D - S : De Seilao - rev.). The Malacca tangas show A - M (Asia Malacca) and D - M (De Malacca) instead. The un-dated coins were struck before 1632.

Borneo

Brunei بروني

The Moslem Sultanate of Brunei was founded within a few years of AD 1510 by Alak Batator who was thenceforth known as Sultan Mohammed. He had come from Malacca after marrying into the Royal Family of Johore. Once settled in Brunei Mohammed threw off the former suzerainty of Majopahit (Java). The Brunei Sultanate was at its apogee during the later 16th. century when its domains extended as far as Luzon in the Philippines. Early issues of tin pitjis bore the anonymous inscription 'Malik Al 'Adil' like many struck in Malaya. Those issued from about 1750 onwards (infra) bear somewhat more individual designs. Higher denominations were provided, for the most part, by Spanish Reales, also Dutch and later British (Trade Dollars) silver. Bezoars were highly prized items sometimes used in currency (Mandelslo) and small rectangular iron bars were also current (Millies). Chinese cash found in Brunei, like those found in Java and other parts of Indonesia, were probably used almost exclusively within the Chinese mercantile communities.

Undated coinage without Sultan's name **circa 1750 - 1850**

Tin *(5 - 6 gm)*

3974 - Seated camel with decoration around
3976 Sultan Al 'Adil Malik Al Zahir سلطان العادل ملک الظاهر (Singh 3-7). Varieties of design but note outline engraving typical of these issues (also used in Tennassarim & Macassar)

(Millies XXV, 263-5var.)
Comparable imitations of Dutch doits were issued in the Sultanate of Banjarmasin (SW. Borneo)

Celebes

Sultanate of Macassar (Mangkasara : Gowa)

The Sultan of Macassar, a well established commercial power in the south-west of the Island, was converted to Islam in AD 1603. While prospering through trade with Mataram in Java a series of Gold Mas and base metal coins were struck throughout the 17th. century. Gervaise (1701) said 'The Piquin is a piece of copper money, large flat and round, like one of our pieces of fifteen sous. There are engraved upon it three or four small circles, and some birds, very scurvily drawn: and besides, these piquins have a hole in the middle, that they may be threaded together for the more easie carriage. The Macassarians give the Hollanders a hundred of 'em for one of their Pataques or Reales; and the Hollanders give four Reales for a Beulentino; which is a piece of gold coyn, round and flat, about the bigness of a Piquin, and is the most ancient money in the country'.

Sultan Hasan al din ibn Al Sa'id **floruit AD 1667**

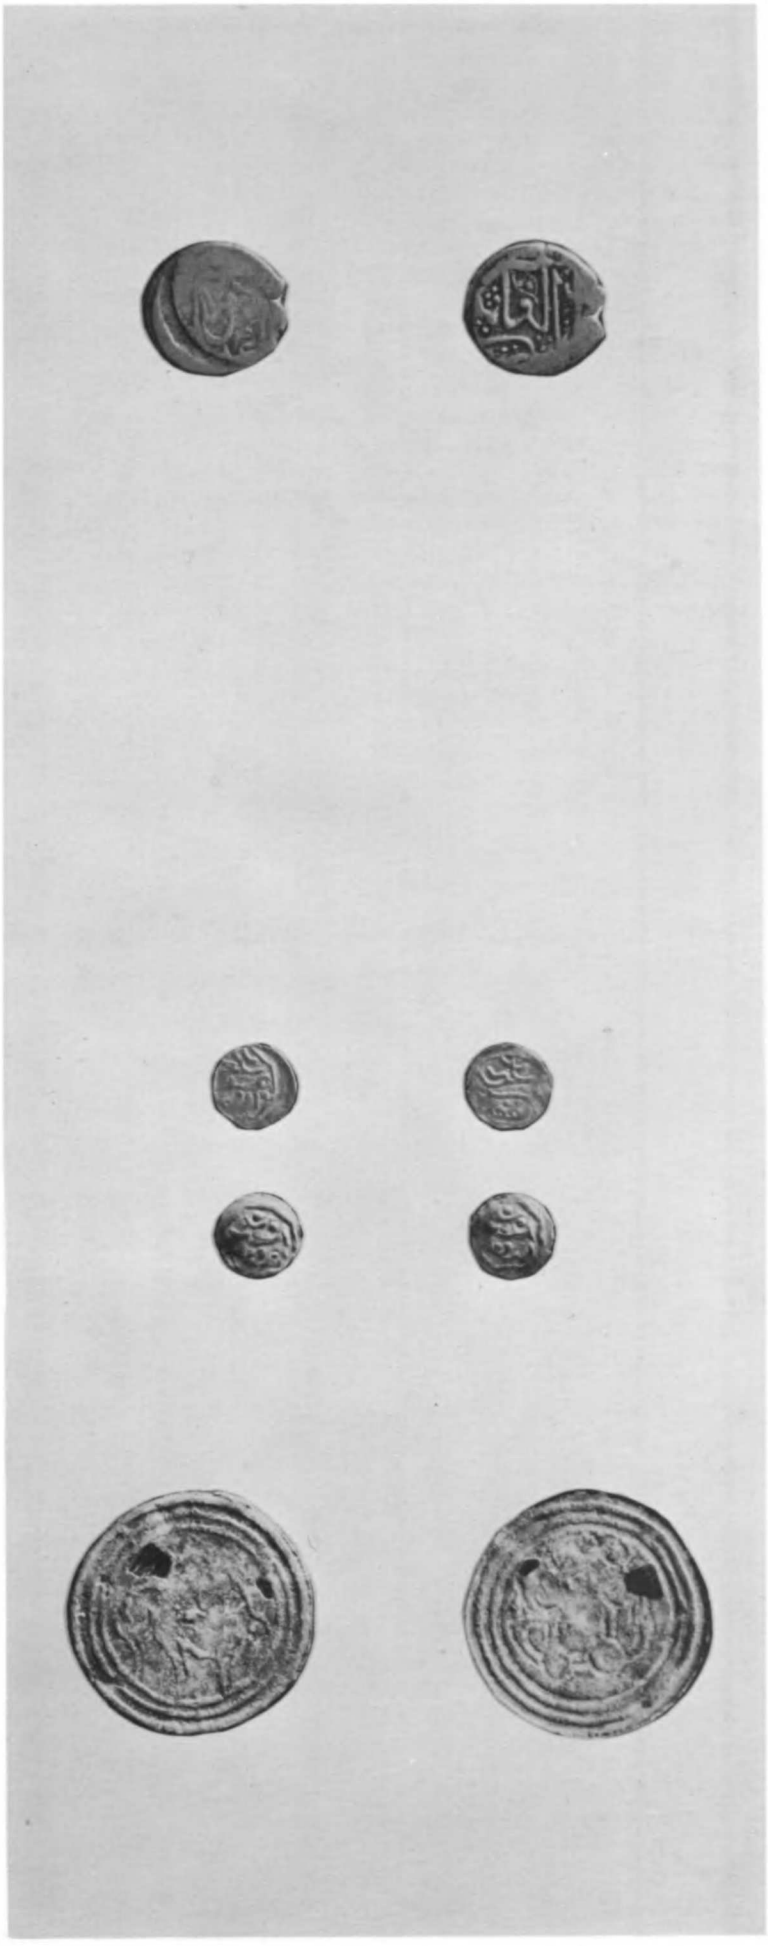
AV Coupang (¼ Mas: 0.6 gm)

3983 - obv. : Sultan Hasan al din سلطان حسن الدين
3984 rev. : ibn Al Sa'id Pangeran بن السعيد فقيرت
(Millies XXVI, 284-5 var.)

Anonymous **circa 1650 - 1750**

Tin (6 gm)

3985 Stylised bird standing facing
rev. : geometric pattern of lines and circles
Note outline manner of engraving as on Brunei tin coins. The description of this coin is close to that provided by Gervaise. If the evolution of small denomination coinage in Macassar resembled that in Java then the copper coins described by Gervaise might be expected to have been replaced by comparable tin issues during the 18th. century.



Iron currency of the north-east Indonesian Sultanates

Small rectangular iron bars were used as currency in Brunei and other parts of Borneo and the metal was both mined and valued in other east Indonesian islands. The iron specimens considered here are irregularly rectangular to sperical in shape and bear Arabic inscriptions. One group was sent to the west from Singapore and the other group from Hong Kong, the former was said to have been found in Borneo. Their legends resemble those found on certain Indonesian Kris used for currency purposes; their shape could be conceived as a development from the 'bean' shaped coins of Srivijaya, analogous to the evolution of the 'bullet' coinage, used in more westerly regions.

Large iron denomination (circa 40 gm)

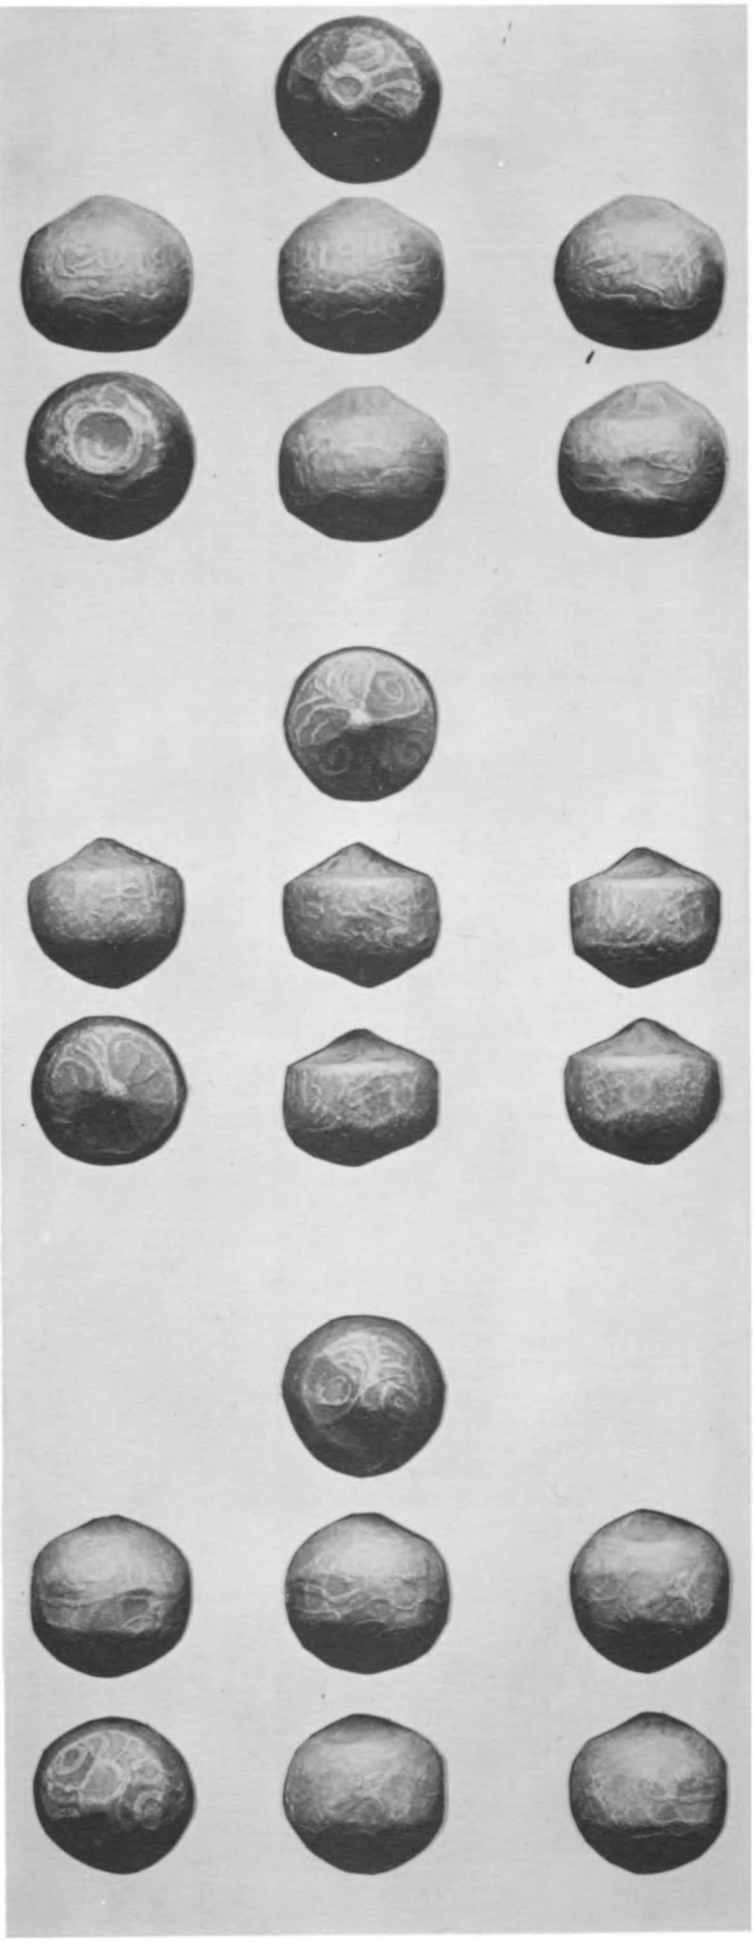
Spinning top shape with pointed ends and a cylindrical waist. The facetted apices bear ornamental spirals. The waist has an inscription in Arabic characters. The designs are etched, not engraved, struck or cast. This may contribute to their crude and variable form. The design was apparently painted on with an acid resistant resin and the piece then immersed in acid to etch away the background.

Legend commencing with a criss-cross symbol

3986 ※ رواه البخاري عن رسله

3987 ※ رواه ابن حاجاج

3988 ※ رواه عن ابن عباس



Seven views of all the large specimens are given : -

Appendix Two

The sources of coins catalogued in this book

All the coins catalogued here are privately owned. They are in the possession of collectors and dealers, as follows : -

Dr. Henri Arroyo
42, 43, 164, 182 - 184, 251, 268, 269, 303, 320, 327, 337, 348 - 364, 368 - 378, 380 - 383, 385, 386, 392, 394, 399 - 405, 407 - 410, 412 - 416, 418, 419, 422, 424 - 455, 458, 461 - 473, 475 - 507, 527 - 531, 535, 536, 538, 539, 541 - 543, 553, 561, 566, 568, 570, 572 - 575, 618, 738, 739, 780, 787, 790, 817, 819, 830, 835, 960, 1063, 1130, 1145, 1153, 1154, 1157, 1164, 1167, 1173, 1177 - 1179, 1181, 1184, 1189, 1191, 1193, 1194, 1229, 1252 - 1254, 1257, 1259 - 1261, 1264 - 1268, 1275, 1276, 1281 - 1287, 1292, 1295 - 1297, 1301, 1303, 1354 - 1356, 1358 - 1366, 1369, 1371, 1372, 1378 - 1383, 1385, 1387, 1389 - 1391, 1393, 1394, 1396, 1415 - 1419, 1424, 1425, 1430 - 1432, 1434 - 1437, 1482, 1483, 1496, 1730, 1731, 1794, 1795, 1853 - 1855, 1866, 1890, 1896, 1945, 1972, 1973, 1992, 2003, 2442 - 2444, 3852, 3853, 3856 - 3860, 3890, 3973.

Messrs. A.H. Baldwin and Sons
3889, 3898, 3899, 3901 - 3905, 3910, 3911, 3913, 3915, 3929 - 3931, 3933, 3944 - 3946, 3966.

Professor Chatt
1422, 1423, 1426 - 1429

Mr. Jan Lingen
773a, 2204a, 2258a, 2258b, 2262a, 2474, 2572, 2573a, 2589, 2590, 2704a, 2862, 2905, 2949, 2951, 2957, 2960, 2960a, 2960b, 2966, 3166, 3209, 3226a, 3236a, 3248a, 3289, 3290a, 3303a, 3317, 3320a, 3321a, 3361, 3369a, 3538a, 3538b, 3557, 3632, 3637, 3381a.

Mr. Kenneth MacKenzie
1320 - 1323, 1325, 1327, 1329, 1330

A Private collection
582

Mr. Nicholas Rhodes
585, 859, 860, 900, 908, 916, 955, 959, 961, 991, 1006, 1008, 1011 - 1014, 1016 - 1021, 1169, 1197, 1199, 1200, 1202 - 1210, 1215, 1219, 1221, 1223, 1236, 1237, 1242, 1500, 1515, 1560, 1562, 1786, 1838, 1989 - 1991, 1995, 1996, 2000, 2002, 2010, 2011, 2015 - 2018, 2021, 2024, 2383 - 2386, 3001, 3009, 3169, 3170, 3177, 3179, 3234, 3800, 3802, 3805, 3807, 3809, 3810.

Mr. Peter Seaby (B.A. Seaby Ltd)
2, 15, 29, 32, 40, 41, 53, 66 - 68, 76, 154, 157, 198, 203, 208, 214, 216, 220, 222 - 225, 233, 240, 242, 243, 245, 301, 311 - 314, 346, 347, 366, 367, 551, 552, 559, 560, 562, 571, 586, 587, 592, 593, 599, 600, 605, 607, 610 - 612, 621, 626, 627, 666, 675, 687 - 689, 706, 741, 757, 759, 772, 773, 807, 808, 816, 875, 876, 883, 892, 904, 910, 911, 922, 923, 958, 1132, 1161, 1163, 1176, 1180, 1182, 1186 - 1188, 1213, 1214, 1263, 1271, 1278, 1298, 1300, 1302, 1315, 1395, 1577, 1578, 1586, 1757, 1774, 1783, 1784, 2038 - 2042, 2079, 2080, 2082, 2118, 2120, 2132 - 2136, 2203, 2203a, 2207, 2218, 2374, 2387, 2397, 2398, 2445 - 2447, 2457, 3006, 3010, 3921, 3949, 3950, 3977 - 3979.

Mr. Hebert
1324, 1326, 1328, 1331

Mr. Robert Senior
23, 27, 31, 101, 102, 292, 540, 556, 567, 619, 662, 762, 912, 917, 932 - 936, 941, 1420, 1551, 1647, 1706, 1758, 1856, 1857, 1889, 2013, 2014, 2130, 2169, 2219, 2258, 2472, 2474, 2535, 2573, 2670, 2693, 2703, 2704, 2866, 2867, 2946, 2957a, 2999, 3000, 3003, 3007, 3011 - 3013, 3167, 3168, 3171, 3178, 3180, 3181, 3233, 3406, 3408, 3409, 3429, 3457, 3458, 3466, 3469, 3481, 3567a, 3572, 3594, 3638, 3651, 3761, 3762, 3826, 3886.

Messrs. Spink and Sons Ltd.
260 - 264, 266, 267, 771

Mr. C. M. Webdale
1852, 1858, 2332

Mr. Kenneth Wiggins

Author
The coins not listed above

Appendix Three

Coin Values

It is a truism to say that the value of a coin is the amount someone is prepared to pay in order to acquire it. Nevertheless this statement emphasises the two factors that, on the one hand, an increasing demand for a reducing supply of particular coins tends to raise their value while, on the other hand, the whims of fashion may reduce the desirability and value of a coin series that was formerly in demand. The assessment of coin value is thus a statement of desirability in a particular market at a given time and between informed persons. By and large the valuations given here reflect the prices of coins circulating within the London market during mid - 1977, but attention has also been paid to the prices being asked by Middle Eastern and Indian dealers selling their wares in the west and to the prices being asked by dealers and fetched at auctions in the United States and in Western Europe. On the basis of such evidence it is possible to provide a reasonable valuation for the majority of coins, particularly the commoner issues. Thus, if one wishes to obtain a selection of Ilkhan silver dirhems struck by Abu Sa'id in un-identified lots at about £ 3, or with full identifications at about £ 6, there are a number of sources from which these can currently be obtained; similarly un-identified Omayyad - Abbasid dirhems at £ 5 or the same coins with identification at about £ 9; likewise Moghul and Native States rupees at £ 3 - 50 to £ 5 and earlier silver tankahs of the Delhi Sultans at £ 4 to £ 7 - 50. In the case of some rarer coin series, particularly those relating to the market for Ancient Coinage, Medieval European Coinage or Byzantine Coinage, the assessment of valuation is sometimes more difficult. Thus, coins struck at the Genoese trading colony of Caffa, in the Crimea, have interest in the fields of both European and Islamic coinage, and they are also rare.

In addition to such general factors affecting the prices that tend to be realised among particular coin series there are also more specific points relating to the value of an individual coin. Some such points may be noted : -

Condition: the state of preservation of a coin is normally listed as one of the most important factors affecting its value. This remains generally true of Islamic coinage but it should be remembered that most Islamic coins were hand-struck and thus their designs were often not perfectly impressed upon the coin flans: this was particularly true of some Indian and Central Asian issues. In the case of relevant Indian series the dies were often substantially larger than the coin flans while in the case of some Central Asian series there was often a habit of striking the dies slightly obliquely. When the force of striking is transmitted to the die at a slight angle, instead of straight downwards, one may find that one segment of the coin bears a good impression while the opposite segment of the blank barely received any imprint from the dies.

Mint and date: a high proportion of Islamic coins bear the mint and date of issue, often sited towards the periphery of the design. Loss of mint or date from a coin struck slightly off-centre substantially reduces the intrinsic information provided by the specimen and may greatly reduce the value of a coin in otherwise good condition, particularly if the issue is fairly common.

Rulers: the name of the issuing ruler is rarely lost from a coin through poor striking. On the other hand some coins bear additional names, either of local dynasts (eg. Abu Ishaq on coins of the Ilkhan Abu Sa'id), or of distant suzerains (eg. Mangu on Ilkhan coins of Hulagu). In general, the more information of this nature provided by the coin, the greater its desirability.

Denomination: It has been said that doubling the size of a coin quadruples its value. This is a generalisation that appears to have some truth in the numismatic field considered here.

Availability: Most collectors like to be able to read about their coins and also to be able to collect a series to which they can add further specimens. Thus coin series that are fairly well known with readily available literature and the coins themselves not too rare tend to be more commercially desirable than some of the rarer and lesser known coin series. This is particularly so if the coins themselves have an attractive appearance.

Nationality: it is quite noticeable that Islamic coins struck in Spain tend to fetch higher prices than those struck by the same rulers at their North African mints (eg. Almoravids). The same is true, though to a lesser extent, of some other Islamic series. Coins struck in Turkey tend to be slightly more desirable than those struck in Mesopotamia and there is an increasing Persian interest in the coinage struck in Iran. On the other hand some series of Islamic coins from India tend to be available in greater numbers than the collectors thereof. It is also sometimes noticeable that coins struck in countries which once formed part of the Classical Islamic Caliphate tend to be more sought after than those emanating from other, more distant, regions of the Islamic world.

Identification: due largely to the potential difficulty in identifying Islamic coins an identified specimen often commands a higher price than the same specimen among a group of un-attributed coins. This is particularly true of silver and copper coins. In the case of gold coins, their fairly high price means that the labour of identification is small in relation to the market value of the specimen.

In the list of valuations that follows it is assumed that all coins are as fully identified as possible and that (unless stated otherwise) they are all in standard condition. Thus : -

Gold coins	:	Extremely Fine	
Silver coins	:	Very Fine	(machine struck 20 th. century silver and copper coins
Copper coins	:	Fine	should be one grade better: Ex.F and VF)

Superior specimens may be saleable at a substantially higher price whereas worn coins with defective inscriptions may have virtually no market value.

Before suggesting valuations for individual coins it may be helpful to give some assessmant of the prices for which un-sorted coins of average quality can now be purchased in groups.

A.	*Gold*	Dinars and other similar size gold issues from the Middle East	average £ 30 each
		Broad double dinars from North Africa (Marinids etc.)	average £ 90 each
		Mohurs and other heavy (c. 11 gm) Indian gold coins	average £ 80 each
B.	*Silver*	Omayyad-Abbasid and related dirhems from the Middle East	average £ 5 each
		Ilkhan-Seljuq and comparable Middle Eastern dirhems	average £ 4 each
		Turcoman-Timurid tankahs	average £ 2 - £ 4 each
		Indian tankas of the Delhi and Bengal sultans	average £ 4 each
		Rupees of the Moghuls and Native States	average £ 3 to £ 4 each
C.	*Copper*	Omayyad-Abbasid fals from the Middle East	average £ ½ each
		Later Islamic copper from the Middle East	average £ ¼ - £ 1 each
		Urtukid and related pictorial copper from the Middle East	average £ 2 - £ 5 each
		Indian small sized coppers (eg. Delhi Sultans)	average £ 0.1 - £ 0.5 each
		Larger Indian coppers (eg. Moghul Dams)	average £ ½ - £ 1 each

The average prices of coins in lots reflect, in part, the observation that such lots usually (AE especially, AR less so) include a proportion of worn coins and/or mis-struck specimens whose defective legends preclude full identifiaction.

Giving due consideration to the various factors outlined above it is now possible to assess the relative desirabilities of the individual coins catalogued here and to value them accordingly.
All valuations are in £ (Pounds sterling).

ESPAGNE MUSULMANE

environ 450 de l'hégire

échelle 1 : 5.000.000

E. Zambaur, 1926.

By far the best set of maps for demonstrating the geographical distribution of Islamic mint towns is that prepared by Zambaur over half a century ago. Although it is possible to add a few mint names, particularly in the Indian section it would be very difficult to make any substantial improvement; his maps are therefore reproduced without alteration.

العمـــلات الشـــــرقيـــة
عـــــالم الأســـــلام

تقـــديم

منذ قرون عديدة ،انتشر الاسلام في مناطق كثيرة بجميع انحاء العالم ،وقد امتدت الخلافة ،بعد الانطلاقة الاولى لانتشار الاسلام اثناء القرن السابع والقرن الثامن الميلادى ،من جنوب فرنسا واسبانيا في الغرب،عبر شمال افريقيا الى مصر وشبه جزيرة العرب • ومن كرسي الخلافة في دمشق امتد سلطان الاسلام الى سوريا والعراق وشرق تركيا والقوقاز متجها نحو الشرق ،خلف هذه الاقاليم عبر ايران وافغانستان الى معظم مقاطعات بلاد ما وراء النهر والسند البعيدة الى ان المسيحية استعادت سيطرتها على جنوب فرنســـا وشمال اسبانيا وفي القرن الخامس عشر تم استبعاد المركز الاخير للاسلام من جنوب اسبانيا ولكن في نفس الوقت ،كان الاسلام في سبيله لطرد الاثر الباقي من المسيحية (بيزنطـه وتريبزوند) من تركيا كما تم اكتساب الساحل الشرقي ،لافريقيا وجزء اكبيرا من روسيا ومعظم الهند ،الى الاسلام •وقد بدأ الساحل الشرقي لافريقيا كمحط لانظار التجار الباحثين عن النحاس من المناجم الغنية في رود يسيا ،ولقد كان انتشار الاسلام في وسط آسيا ،لحد كبير نتيجة لاعتناق القبائل المغولية لدين الاسلام • وقد انتشر الاسلام في الهنـــد نتيجة للفتح عندما سار محمد الغورى مسيرته من افغانستان واقام ســـلطنة دلهي ولقد شاهد مستهل القرن السادس عشر اخر عملية توسع كبرى للاسلام حيث اعتنقـت الولايات المحلية ،في جنوب الملايو والجزر الاندونسية ، الاسلام واحدة بعد الاخرى ومع عام ١٥٢٠ ازدهرت غالبية السلطنات الشرقية الاسلامية في بروني بشمال بورنيو وفي جزر تيرنات وتيدور في الملقان وقد كانت هذه نبذه مختصرة عن التوسع الجغرافي للعالم الاسلامي •

ويمثل هذا الكتاب بحثا ،عند مقارنته بالمؤلفات العديدة التي يتطلبها الامر لتكوين كتالوج مفصل وقد روعيت العناية الخاصة في انتقاء المادة التي تجسم الصورة التفصيلية والاستعراض المتكامل للعملات الاسلاميـــة مشتملا العملات المسكوكة التي نقابلها بصفة عامة وكذلك اصدار العملات الضئيلة بواسطة امـراء الاسرات الصغيرة • ويتم نشر كل العملات الموضحة بهذا الكتالوج لاول مرة وبالرغم من وجود عملات عديدة شائعـــة الا انه يوجد ايضا عددا كبيرا من العملات الجديدة وكذلك بعض الحكام والاسر التي لم يعرف من قبل عنها انها قامت بسك اى عملات وتتمتع بعض العملات الموضحة بهذا الكتالوج بأهمية خاصة كما توضح التواريـــخ الدقيقة للاحداث وتسلسلها الزمني ،وتوجد كل هذه العملات في حوزة اشخاص ولهذا الحد يوضح انتقاء المواد ،توفر هذه العملات وافضليات انتقائها لهواة جمعها ويعد عنصر توفرها امرا هاما حيث يتأثر بواسطة تكوين حشد العملات المختلفة التي جلبت الى الاسواق اثناء السنين الاخيرة • ومن بين هذه المجموعات العديدة الحديثة يوجد (أ) الدراهم المتضاعفة السمانية الغزنوية في شمال افغانستان • (ب) سلاسل من العملات التيمورية ـ الاكوينلية التي تشمل العديد من العينات المسكوكة على الجانبين (جـ) سلاسل مـن الدراهم الارتكية الفضيـة الاخيرة • (د٠) سلاسل من العملات الفضية للسلاطنة البنغاليين الاوائل وقـــد كان عددا من هذه الانواع للعملات ،وبصفة خاصة تلك المذكورة في المجموعات الثلاث الاولى ، ممثلا بصـــورة ضعيفة في معظم الكتالوجات الرئيسية الخاصة بالعملات الاسلامية • ومن ناحية أخرى لقد اسفر الفحص في كتالوجات المتاحف عن ان معظمها قد تم تجميع مواده منذ عشرات السنين الماضية مما يبين عرضا مختلفا للعملات يعكس تنوعها واولويات اختيارها في السنين الماضية •

وحيث انه يوجد ،في بعض الاحيان ،اتجاه لدى الافراد ان يضعوا صوب اعينهم هذه النقطة الهامة " ان تكوين مجموعة ممثلة من العملات الاسلامية يعد هدفا صعب المنـال " كما يلزم التنوية ان كل العملات المبنية هنا قد تم جلبها بواسطة مالكيها خلال فترة السنين الاخيرة الماضية • وان معظم الاربعة الاف عملة يمتلكها المؤلف وقد تم جلب اغلبها في لندن • وقد وجد ان مجموعة واحدة من العملات ،المتواجدة في لندن بصورة غير مألوفة ،قد تم سكها بواسطة اسرات القرون الوسطى في شمال افريقيا ،وان معظم النماذج بهذه السلاسل الموضحة بالكتالوج يمتلكها الدكتور هنرى ادويو في طولون وتحتوى اى مجموعة واحدة من المواد على فراغـــات عديدة (حلقات مفقودة) يرغب المرء في ملئها ولتقديم المعونة لمثل هؤلاء الافراد قمت باعداد هذا الكتالوج للعملات مما يساعد على ملا بعض هذه الفراغات وانني اقدم شكرى واستناني ليس فقط للدكتور أرويـو ولكن ايضا الى السادة : ك• م • ماكينزى ،ن• رودس ،ب• سيمي ،ر• سنيـزر ،س• م ويبديل ،و• ك• ويجنز ،وايضا السادة أ • هـ• بالدوين واولاده ،والسادة سبينك وأولاده والى السادة جان لينجن وآخرين •
